Preface to the Second Edition	xxiii

PART I: PLASTICS, ELASTOMERIC AND BIOBASED MATERIALS..... 1

1 Engineering Thermoplastics—Materials, Properties, Trends 3

Edward N. Peters

1.1 Introduction.....	3
1.2 Aliphatic Polyamides	4
1.3 Aromatic Polyamides, Aramids	5
1.4 SemiAromatic Polyamides.....	5
1.5 Polyacetals	5
1.6 Polycarbonates	6
1.7 Poly (phenylene ether)	7
1.8 Polysulfones.....	8
1.9 High-Temperature Sulfone Polymers (HTS)	9
1.10 Thermoplastic Polyesters	9
1.11 Liquid Crystalline Polymers (Polyesters)	11
1.12 Poly(phenylene sulfide)	12
1.13 Polyetherimide	13
1.14 Polyimides.....	13
1.15 Polyamide Imides.....	14
1.16 Aromatic Polyketones	14
1.17 Polyarylates.....	15
1.18 Aliphatic Polyketones	15
1.19 Syndiotactic Polystyrene.....	16
1.20 Self-Reinforcing Polyphenylene	16
1.21 Poly(<i>p</i> -xylylene)	17
1.22 Polybenzimidazole.....	17
1.23 Comparison of Physical Properties	18
1.24 Trends in Engineering Thermoplastics	20
1.25 Processing	24
1.26 Conclusions.....	24
References.....	24

2 Polyolefins 27

DI Werner Posch

2.1 Industrial Processes for Polyolefin Production	27
2.2 Classes of Polyolefins	29
2.3 Catalysts for Olefin Polymerization.....	41
2.4 Industrial Reactors	44
2.5 Polyolefine Properties	47
2.6 Applications	49
2.7 Polyolefin Composites	51

3 Introduction to Fluoropolymers	55
<i>Sina Ebnesajjad</i>	
3.1 Introduction.....	55
3.2 Fluoropolymer Classification.....	55
3.3 Fluoropolymer Products.....	56
3.4 Monomer Synthesis	56
3.5 Monomer Properties.....	59
3.6 Polymerization and Finishing	60
3.7 Structure–Property Relationship of PE to PTFE	63
3.8 Polymer Properties of PTFE	63
3.9 Fabrication Techniques	66
3.10 Applications	66
3.11 Safety	67
3.12 Polymerization Surfactant.....	67
3.13 Economics.....	68
3.14 Summary	68
Further Readings.....	68
References.....	68
4 Poly(Vinyl Chloride).....	73
<i>William F. Carroll, Jr., Richard W. Johnson, Sylvia S. Moore and Robert A. Paradis</i>	
4.1 Introduction.....	73
4.2 Synthesis of Vinyl Chloride	75
4.3 PVC Resin Synthesis and Characterization	76
4.4 PVC Compounds: Processing and Applications	79
4.5 Recycling PVC.....	86
4.6 Vinyl: Sustainability and Energy Efficiency	88
4.7 Vinyl Chloride and Health	88
4.8 Dioxin	89
References.....	89
5 Thermoplastic Elastomers.....	91
<i>Geoffrey Holden</i>	
5.1 Introduction.....	91
5.2 Classification and Structure	91
5.3 Production.....	95
5.4 Structure–Property Relationships	98
5.5 Applications	100
5.6 Economic Aspects and Trade Names.....	101
References.....	105
6 Thermoset Elastomers	109
<i>James E. Mark</i>	
6.1 Introduction.....	109
6.2 Some Experimental Details.....	111
6.3 Typical Stress–Strain Behavior.....	112
6.4 Control of Network Structure	113
6.5 Networks at Very High Deformations.....	113
6.6 Multimodal Chain-Length Distributions.....	114

6.7 Other Types of Deformation	116
6.8 Filler-Reinforced Elastomers and Elastomer-Modified Ceramics	116
6.9 Current Problems and Future Trends	118
References.....	118
7 Biodegradable and Biobased Polymers.....	127
<i>Long Jiang and Jinwen Zhang</i>	
7.1 Introduction.....	127
7.2 Naturally Occurring Biodegradable Polymers.....	127
7.3 Biodegradable Polymers Derived From Renewable Resources.....	132
7.4 Biodegradable Polymers Derived From Petroleum	135
7.5 Biobased Polymers Derived From Plant Oil.....	137
7.6 Concluding Remarks.....	139
References.....	139
8 Polymeric Biomaterials.....	145
<i>Wei He and Roberto Benson</i>	
8.1 Introduction.....	145
8.2 Polymeric Biomaterials in Ophthalmology	145
8.3 Polymeric Biomaterials in Orthopedics	149
8.4 Polymeric Biomaterials in Cardiovascular	151
8.5 Polymeric Biomaterials for Wound Closure	153
8.6 Polymeric Biomaterials in Extracorporeal Artificial Organs	155
8.7 Polymeric Biomaterials for Nerve Regeneration.....	156
8.8 Conclusions and Future Outlook	157
References.....	157
PART II: PLASTICS PROCESSING	165
9 Recycling of Plastics.....	167
<i>Adrian Merrington</i>	
9.1 Introduction.....	167
9.2 Technology to Recycle Plastics.....	170
9.3 Challenges.....	180
9.4 Industries and Industry Organizations	184
9.5 Products.....	185
9.6 Conclusions.....	185
Acknowledgment	186
References.....	186
10 Injection Molding Technology	191
<i>William G. Frizelle</i>	
10.1 The Injection Molding Screw.....	201
11 Microcellular Injection Molding.....	203
<i>Mark Berry</i>	
11.1 Introduction	203
11.2 Background	204
11.3 General Discussion of Foam Processing.....	205

11.4	General Discussion of Microcellular Processing	206
11.5	General Discussion of Microcellular Injection Molding	207
11.6	Process Monitoring and Control Methods for Microcellular Injection Molding	208
11.7	Equipment Requirements for Microcellular Foam Injection Molding	209
11.8	Trexel's MuCell Technology	210
11.9	Other Physical Foaming Techniques	210
11.10	Typical Objectives of Microcellular Injection Molding	212
11.11	Limitations of Microcellular Injection Molding	213
11.12	Best Target Applications	213
11.13	More Challenging Situations	213
11.14	Commercial Examples	214
11.15	Future Trends	214
	References	214
	Appendix	215
12	Extrusion Processes.....	217
	<i>Eldridge M. Mount, III</i>	
12.1	Introduction	217
12.2	Single-Screw Extruders	218
12.3	Single-Screw Extruder Mechanisms	219
12.4	Twin-Screw Extruder Equipment	236
12.5	Planetary Roller Extruders: Principle Components and Operating Principles.....	250
12.6	Shaping and Drawing and Extrusion Applications	256
12.7	Extrusion Laminations and Coatings	260
12.8	Solidification and Cooling	260
	References	263
13	Blow Molding	265
	<i>Samuel L. Belcher</i>	
13.1	Introduction	265
13.2	The Process	265
13.3	Formulas for Blow Molding.....	275
13.4	Troubleshooting	279
	Acknowledgments.....	289
14	Compression Molding.....	291
	<i>Robert A. Tatara</i>	
14.1	Basics of Processing by Compression Molding.....	291
14.2	Molding Force and Pressure.....	294
14.3	Typical Presses	294
14.4	Compression Molds and Associated Tooling	300
14.5	Commonly Used Resins.....	303
14.6	Resin Charge Characteristics	304
14.7	Processing Parameters for Granules, Powders, and Preforms	306
14.8	Resin Matrix Modifiers	308
14.9	Engineered Fiber-Reinforced Molding Compounds.....	310
14.10	Comparisons with Transfer Molding and Injection Molding.....	313
14.11	Similar Processes	314
14.12	Modeling the Fluid Dynamics and Heat Transfer of Mold Filling	314
14.13	Ensuring Part Quality and Process Efficiency.....	316

Acknowledgments.....	319
References.....	319
15 Rotational Molding.....	321
<i>Paul Nugent</i>	
15.1 Introduction.....	321
15.2 Rotational Molding Process.....	322
15.3 Materials for Rotational Molding.....	324
15.4 Molds for Rotational Molding.....	330
15.5 Machinery for Rotational Molding.....	334
15.6 Design for Rotational Molding.....	339
References.....	343
16 Thermoforming.....	345
<i>Jim Throne</i>	
16.1 Introduction.....	345
16.2 Thermoforming Characteristics.....	345
16.3 Thermoformed Product Characteristics.....	346
16.4 The Thermoforming Concept.....	346
16.5 Thermoforming Machinery.....	351
16.6 Thin-Gauge Thermoforming.....	352
16.7 Thick-Gauge Thermoforming.....	355
16.8 Other Thermoforming Technologies.....	359
16.9 Heaters.....	361
16.10 Thermoforming Mold Materials.....	363
16.11 Plastic Materials.....	366
16.12 Product Design.....	370
16.13 Operational Aspects of Thermoforming.....	374
References.....	375
17 Process Monitoring and Process Control: An Overview.....	377
<i>Mark Berry and Nick Schott</i>	
17.1 Introduction.....	377
17.2 Historical Factors Affecting the Development of Process Monitoring and Controls.....	377
17.3 Basic Concepts: Open-Loop and Closed-Loop Controls.....	379
17.4 Transducers Used in Plastics Processes.....	382
17.5 Data Acquisition Systems.....	384
17.6 General Control Strategies: Extrusion Versus Injection Molding.....	384
17.7 Process Control Applications Overview: Extrusion.....	386
17.8 Process Control Applications Overview: Injection Molding.....	389
17.9 Process Development Tools.....	391
17.10 Conclusions.....	393
References.....	393
18 Polymer Stabilization.....	395
<i>Pieter Gijsman</i>	
18.1 Introduction.....	395
18.2 Degradation Chemistry.....	396
18.3 Stabilizers.....	398
18.4 Performance of Stabilizers.....	405

18.5 Other Factors Determining the Choice of Stabilizers	408
Appendix 18.1 Chemical structure, CAS number, and several trade names of several stabilizers	409
References	413
19 Chaotic Advection and Its Application to Extruding Micro- and Nanostructured Plastic Materials	423
<i>David A. Zumbrunnen</i>	
19.1 Applicability and Fundamentals	423
19.2 Machinery and Process Control	425
19.3 Micro- and Nanolayered Plastics	430
19.4 Polymer Blends	431
19.5 Polymer–Solid Composites and Nanocomposites	432
19.6 Mixtures and Nanodispersions	434
19.7 Decoration	435
19.8 Rheology Measurements with Concurrent In Situ Structuring	436
References	438
PART III: ADDITIVES, COLORANTS AND FILLERS	441
20 Surface Modification of Plastics	443
<i>Kent S. Johansson</i>	
20.1 Introduction: Surface Modification of Plastics: For What Reasons?	443
20.2 Overview of Surface Modification Techniques	443
20.3 Surface Modification (Activation) Techniques	443
20.4 Surface-Coating Deposition Techniques	464
References	479
21 Plastics Additives	489
<i>Ernest A. Coleman</i>	
21.1 Introduction	489
21.2 Overview	489
21.3 Thermal Stabilizers	490
21.4 Nucleating Agents	491
21.5 Antioxidants	491
21.6 Flame Retardants	493
21.7 Color and Colorants	494
21.8 Fillers	494
21.9 Reinforcements	496
21.10 Impact Modifiers and Impact Modification	497
21.11 Miscellaneous	498
22 Dispersants and Coupling Agents	501
<i>Chris DeArmitt and Roger Rotheron</i>	
22.1 Introduction	501
22.2 Dispersants	501
22.3 Practical Use Considerations	505
22.4 Types of Dispersants	505
22.5 Property Effects	506

22.6 Coupling Agents.....	508
22.7 Conclusions.....	516
Further Reading.....	516
23 Functional Fillers for Plastics	517
<i>Chris DeArmitt</i>	
23.1 Introduction.....	517
23.2 The Basics	517
23.3 Thermal and Electrical Properties.....	523
23.4 Hardness, Friction, Scratch Resistance, and Wear.....	525
23.5 Barrier Properties	526
23.6 Optical Properties.....	526
23.7 Processing	527
23.8 Extra Phase Effects	528
23.9 Popular Fillers	529
23.10 Specialty Fillers.....	529
References	531
24 Plasticizers	533
<i>Allen D. Godwin</i>	
24.1 Introduction.....	533
24.2 Mechanism of Plasticization	534
24.3 Types of Plasticizers.....	536
24.4 Phthalate Esters	539
24.5 Terephthalate Esters	541
24.6 Dibasic Acid Esters	541
24.7 Epoxy Plasticizers	541
24.8 Trimellitate Esters	542
24.9 Benzoate Esters	542
24.10 Cyclohexanoate Esters	543
24.11 Polymeric Plasticizers	543
24.12 Phosphate Esters	543
24.13 Citrate Esters	543
24.14 Other Plasticizers	544
24.15 Plasticizer Characteristics and Performance of Flexible PVC.....	545
24.16 Plasticizer Selections for Specific Applications.....	548
24.17 Plasticizers for Other Polymers.....	549
24.18 Human Health Aspects of Plasticizers	550
24.19 Future of Plasticizers.....	551
References	552
25 Adhesion Promoters: Silane Coupling Agents.....	555
<i>Peter G. Pape</i>	
25.1 General Concepts	555
25.2 Silane Adhesion Promoters	555
25.3 Adhesion Promoter Mechanism with Silanes	557
25.4 Optimizing Coupling Agent Performance.....	559

25.5	How to Choose a Silane Coupling Agent.....	561
25.6	General Applications of Silane Coupling Agents	562
25.7	Industry and Utility	562
25.8	Non-Silane Adhesion Promoters	570
25.9	Sources of Adhesion Promoters	570
	References	571
PART IV: DESIGN AND APPLICATIONS		573
26	Plastics Joining	573
	<i>Avraham Benatar</i>	
26.1	Introduction	575
26.2	Mechanical Joining	575
26.3	Adhesive Bonding	580
26.4	Welding	582
	References	591
27	Design of Plastic Parts	593
	<i>David Kazmer</i>	
27.1	Introduction	593
27.2	Material Selection	593
27.3	Process Selection.....	598
27.4	Structural Design.....	602
27.5	Design for Manufacturing and Assembly	606
27.6	Conclusions	613
	Acknowledgments	614
	References	614
28	Three-Dimensional Printing of Plastics	617
	<i>David Kazmer</i>	
28.1	Introduction	617
28.2	3D Printing Processes	617
28.3	Design with 3D Printing	622
28.4	Manufacturing Strategy.....	627
28.5	Future Outlook	632
28.6	Conclusions	633
	Acknowledgments	633
	References	633
29	Plastics in Buildings and Construction	635
	<i>Sushant Agarwal and Rakesh K. Gupta</i>	
29.1	Introduction	635
29.2	Applications	635
29.3	Plastic Applications in Green Building Design.....	646
29.4	Conclusions	647
	Acknowledgments	647
	References	647

30 Automotive Applications of Plastics: Past, Present, and Future.....	651
<i>Sai Aditya Pradeep, Rakesh K. Iyer, Hakan Kazan and Srikanth Pilla</i>	
30.1 Introduction.....	651
30.2 Exterior Components.....	652
30.3 Interior Components.....	658
30.4 Under-the-Hood Components.....	663
30.5 Future Outlook.....	667
30.6 Conclusions.....	668
References.....	668
31 Infrastructure Applications of Fiber-Reinforced Polymer Composites.....	675
<i>Hota GangaRao</i>	
31.1 Introduction.....	675
31.2 Products and Applications.....	675
31.3 Durability of Polymer Composites.....	691
31.4 Summary.....	693
References.....	694
32 The Plastic Piping Industry in North America.....	697
<i>Thomas Walsh</i>	
32.1 Introduction.....	697
32.2 Thermoplastic Pipe and Fittings Materials.....	698
32.3 Chlorinated Polyvinyl Chloride Materials.....	699
32.4 Cross-Linked Polyethylene (PEX) Materials.....	699
32.5 Polypropylene Materials.....	700
32.6 Polybutylene Materials.....	700
32.7 Acrylonitrile Butadiene Styrene Materials.....	701
32.8 Nylon (PA) Materials.....	701
32.9 Fluoropolymer Materials.....	701
32.10 Engineering Plastic Materials.....	701
32.11 Multilayer Piping Products.....	702
32.12 Composite Piping Products.....	702
32.13 Fiberglass-Reinforced Thermoset Piping.....	702
32.14 Cured-in-Place Piping.....	703
32.15 Pipeline and Piping Rehabilitation Technologies.....	703
32.16 Plastic Pipe and Fittings Manufacturing Processes.....	705
32.17 Long-Term Strength Testing of Thermoplastic Piping Materials.....	708
32.18 Test Methods for Determining Long-Term Hydrostatic Strength.....	710
32.19 Validation of Polyethylene Pipe Materials.....	711
32.20 Popelar Shift Function Calculations for PE Pipe Materials.....	711
32.21 Design of Plastic Piping Systems.....	712
32.22 Specifications, Product Standards, Test Methods, and Codes.....	713
32.23 Regulatory Matters.....	714
32.24 Applications of Thermoplastic Plastic Piping.....	715
32.25 Installation Using Thermoplastic Pipe for Pipeline Replacement.....	715
32.26 Other Piping Applications.....	716

33 PET Use in Blow Molded Rigid Packaging	717
<i>Dan Weissmann</i>	
33.1 Introduction	717
References	740
Index.....	743
