**PART ONE**  
**THEORY AND PRACTICE OF THE SMED SYSTEM** 3  

1 **The Structure of Production** 5  
   A Schematic Outline of Production 5  
   The Relationship Between Processes and Operations 7  
   Summary 9  

2 **Setup Operations in the Past** 11  
   Some Definitions of Terms 11  
      Small, Medium, and Large Lots  
      Excess Inventory and Excess Anticipated Production  
   Traditional Strategies for Improving Setup Operations 12  
      Strategies Involving Skill  
      Strategies Involving Large Lots  
      Economic-Lot Strategies  
      A Blind Spot in the Economic-Lot Concept  
   Summary 19

Techniques for Applying SMED
  Preliminary Stage: Internal and External Setup Are Not Distinguished
  Stage 1: Separating Internal and External Setup
    Using a Checklist
    Performing Function Checks
    Improving Transportation of Dies and Other Parts
  Stage 2: Converting Internal to External Setup
    Preparing Operating Conditions in Advance
    Function Standardization
  Stage 3: Streamlining All Aspects of the Setup Operation
    Radical Improvements in External Setup Operations
    Radical Improvements in Internal Setup Operations
Summary

Applying SMED to Internal Operations
  Implementation of Parallel Operations
  The Use of Functional Clamps
    One-Turn Attachments
    One-Motion Methods
    Interlocking Methods
  Elimination of Adjustments
    Fixing Numerical Settings
    Imaginary Center Lines and Reference Planes
    The Least Common Multiple System
    Mechanization

6 Basic Examples of SMED 93
   Metal Presses 93
      Single-Shot Presses
      Progressive Die Presses
      Transfer Die Presses
   Plastic Forming Machines 104
      Setting Up Dies
      Switching Resins
      Coolant Line Switching
      Die Preheating
   Summary 111

7 Effects of SMED 113
   Time Saved by Applying SMED Techniques 113

PART TWO
THE SMED SYSTEM—CASE STUDIES 129

8 Implementing SMED 131
   Matsushita Electric Industrial Co., Ltd.,
   Washing Machine Division (Mikuni Plant) 131
   The Company 131
   Applications of SMED 131
      Changing Blades on a Six-Spindle Lathe
      Grease Application Changeovers
      Changing Pallet Guides Automatically
      Automatic Welding on Washing Machines
      Changing Colors for Powder Coating Operations
      Achieving Instantaneous Press Die Changes
      Reducing Setup Time for Injection Molding Dies Used
         for Twin-Tub Washing Machine Plastic Bases
      Changing Yielding Rubber for Automatic Bond
         Applicator Machines
Setup Improvements Based on the Toyota Production System 153
Toyoda Gosei Co., Ltd.
The Company 153
  Company-Wide Activities Aimed at Lowering Costs
  Motivation for Tackling SMED
Applications of SMED 161
  Bit Setup in a Process for Machining Fittings
  Die Punch Setup Changes in a Cold-Forging Process

10  A Quick-Setting ("Q-S") Campaign 173
Nippon Kōjaku K.K. (Oi Plant)
The Company 173
  Philosophy and Direction
  Motivation for and Steps Involved in Tackling SMED
Applications of SMED 175
  Improving Collet Changes on a Semiautomatic Lathe
  Q-S on a Multipurpose Turret Lathe
  Mounting Replacement Gears
  Indexing with an All-Purpose Engraving Machine
  A Process Computer Lathe
  Benchless Processing of Nylon

11  Using SMED on a Farm Machinery Processing Line 191
Kubota, Ltd. (Sakai Plant)
The Company 191
  The Problem
  The U.S. Production System
  The Move to SMED
Applications of SMED 195
  Screw Improvement
  SMED Applied to an Air-Cooled Engine
    Connecting Rod Processing Line
  The Small Tractor Case Processing Line—Using
    SMED on Multiple-Axis Drill Presses
Setup Improvements Based on Shop Circle Activities

*Toyota Auto Body Co., Ltd.*

The Company

Applications of SMED

- Simplifying Materials Setting Changes
- Improved Setup for Accessory Transfer Die Equipment
- Improved Setting of Dies of a Fixed Bolster
- Improvement in the Attachment and Removal of Air Hoses for Automation
- Die Positioning
- Setting Coil Sheet Feed Volume
- Simplified Die Positioning
- Microshear Piling Setup Improvement
- Improving Setup by Means of a Feed Line Blanking Die Strike Die
- Automating Deck Pront Guard Frame Spot-Welding
- Eliminating Setup Operations for Urethane Bumper Loading Pallets
- Improved Separation of a Hat-Shaped Cutting Die
- Reducing Setup Times for Changing Automatic Patch Machine Attachments
- Reducing Loading Process Setup Times by Using a Tunnel Conveyor

Comprehensive Development of the SMED Concept to Include Affiliated Plants

*Arakawa Auto Body Industries K.K.*

The Company

Applications of SMED

- Improved Setup on a Cutting Press for Vinyl Interior Coverings (Kotobuki Plant)
- Using SMED on a 500-Ton Press (Sarunage Plant)

Improvements at Affiliated Plants

SMED Developments in Producing Slide Bearings

*T.H. Kogyo K.K.*

The Company
Applications of SMED
Concrete SMED Developments
SMED Software Improvement
SMED Hardware Improvement
Moving from SMED to OTED

15 **Examples and Effects of the SMED System**
*Glory Industries K.K.*
The Company
Applications of SMED
  Improvements on a Multipurpose Press
  Improvement for a Multipurpose V-Bending Die
  Improved Tip Changing on a Spot Welder
  Improved Caulking Table Mounting Hardware
  Clamp Improvement

16 **Achievement of SMED Through**
*Company-Wide Activities*
*Kyoei Kogyo K.K.*
The Company
Applications of SMED
  Improvement in Strike-Adjusting Type Cutting and Piercing Dies
  Improvement of Two-Story Strike-Type Bending Dies
  Improved Setup Methods for a Long Bending Die
  Improved Transfer Die Setup Operations

17 **SMED in Tire Manufacturing Processes**
*Bridgestone Tire Co., Ltd.*
The Company
Applications of SMED
  Improving Drum Width Changes for Tire Molding
  PCI Change Improvement
  Reduced Times for Changing Rubber Extrusion Mouthpieces
  One-Touch Rubber Extrusion and Indicator Line Setting
  Improved Switching of Bead Molding Formers
