

ENCYCLOPEDIA OF QUANTITATIVE RISK ANALYSIS AND ASSESSMENT

Volume 1 A-C

Editors-in-Chief

EDWARD L MELNIGK

New York University, New York, NY, USA

BRIAN S. EVERITT

Institute of Psychiatry, King's College, London, UK

WILEY

Contents

VOLUME 1

Absolute Risk Reduction	1	Bonus-Malus Systems	165
Accelerated Life Testing	2	Burn-in Testing: Its Quantification and Applications	170
Actuary	8	1,3-Butadiene	176
Adverse Selection	14	Cancer Risk Evaluation from Animal Studies	181
Air Pollution Risk	15	Canonical Modeling	189
Alternative Risk Transfer	21	Case-Control Studies	192
Arsenic	28	Causal Diagrams	205
As Low as Reasonably Practicable/ As Low as Reasonably Achievable	38	Causality/Causation	211
Asbestos	43	Censoring	221
Assessment of Risk Association with Beryllium Exposure	52	Change Point Analysis	225
Asset-Liability Management for Life Insurers	60	Chernobyl Nuclear Disaster	227
Asset-Liability Management for Nonlife Insurers	63	Clinical Dose-Response Assessment	233
Association Analysis	67	Coding: Statistical Data Masking Techniques	240
Attributable Fraction and Probability of Causation	73	Cohort Studies	243
Availability and Maintainability	77	Collective Risk Models	255
Axiomatic Measures of Risk and Risk-Value Models	84	Combining Information	259
Axiomatic Models of Perceived Risk	94	Common Cause Failure Modeling	264
Basic Concepts of Insurance	105	Comonotonicity	274
Bayes' Theorem and Updating of Belief	107	Comparative Efficacy Trials (Phase III Studies)	279
Bayesian Analysis and Markov Chain Monte Carlo Simulation	111	Comparative Risk Assessment	283
Bayesian Statistics in Quantitative Risk Assessment	119	Compensation for Loss of Life and Limb	292
Behavioral Decision Studies	136	Competing Risks	301
Benchmark Analysis	145	Competing Risks in Reliability	307
Benchmark Dose Estimation	149	Compliance with Treatment Allocation	312
Benzene	154	Computer Security: A Historical Perspective	321
Bioequivalence	159	Condition Monitoring	341
Blinding	163	Conflicts, Choices, and Solutions: Informing Risky Choices	346
		Confounding	353
		Considerations in Planning for Successful Risk Communication	362
		Continuous-Time Asset Allocation	366

Contents

Copulas and Other Measures of Dependency	372	Environmental Health Risk	574
Correlated Risk	374	Environmental Health Risk Assessment	580
Cost-Effectiveness Analysis	375	Environmental Health Triage, Chemical Risk Assessment for	589
Counterterrorism	387	Environmental Monitoring	591
Credibility Theory	390	Environmental Performance Index	602
Credit Migration Matrices	401	Environmental Remediation	606
Credit Risk Models	407	Environmental Risk Assessment of Water Pollution	611
Credit Scoring <i>via</i> Altman Z-Score	412	Environmental Risk Regulation	613
Credit Value at Risk	416	Environmental Risks	617
Cross-Species Extrapolation	419	Environmental Security	622
Cumulative Risk Assessment for Environmental Hazards	425	Environmental Tobacco Smoke	627
Cyber Risk Management ..	429	Epidemiology as Legal Evidence	630
		Equity-Linked Life Insurance	637
VOLUME 2		Estimation of Mortality Rates from Insurance Data	643
Data Fusion	441	Ethical Issues in Using Statistics, Statistical Methods, and Statistical Sources in Work Related to Homeland Security	647
Decision Analysis	447	Evaluation of Risk Communication Efforts	650
Decision Conferencing/Facilitated Workshops	451	Experience Feedback	656
Decision Modeling	459	Expert Elicitation for Risk Assessment	661
Decision Trees	462	Expert Judgment	667
Default Correlation	470	Extreme Event Risk	676
Default Risk	476	Extreme Value Theory in Finance	678
Degradation and Shock Models	481	Extreme Values in Reliability	686
Dependent Insurance Risks	489	Extremely Low Frequency Electric and Magnetic Fields	691
Design of Reliability Tests	493	Failure Modes and Effects Analysis	695
Detection Limits	498	Fair Value of Insurance Liabilities	700
Digital Governance, Hotspot Detection, and Homeland Security	502	Fate and Transport Models	705
Dioxin Risk	510	Fault Detection and Diagnosis	714
Disease Mapping	513	Federal Statistical Systems as Data Sources for Intelligence, Investigative, or Prosecutorial Work	718
Distributions for Loss Modeling	516	Fraud in Insurance	723
Dose-Response Analysis	523	From Basel II to Solvency II - Risk Management in the Insurance Sector	727
Dynamic Financial Analysis	528	Game Theoretic Methods	733
Early Warning Systems (EWSs) for Predicting Financial Crisis	535	Gene-Environment Interaction	737
Ecological Risk Assessment	539	Geographic Disease Risk	744
Economic Criteria for Setting Environmental Standards	542	Global Warming	748
Effect Modification and Interaction	553		
Efficacy	556		
Engineered Nanomaterials	558		
Enterprise Risk Management (ERM)	559		
Environmental Carcinogenesis Risk	566		
Environmental Exposure Monitoring	567		
Environmental Hazard	572		

Group Decision	760	Managing Foodborne Risk	1029
Hazard and Hazard Ratio	771	Managing Infrastructure Reliability, Safety, and Security	1033
Hazardous Waste Site(s)	777	Managing Risks of Consumer Products	1040
Hazards Insurance: A Brief History	784	Markov Modeling in Reliability	1045
Health Hazards Posed by Dioxin	786	Mathematical Models of Credit Risk	1049
Hexavalent Chromium	796	Mathematics of Risk and Reliability: A Select History	1054
History and Examples of Environmental Justice	808	Mercury/Methylmercury Risk	1062
History of Epidemiologic Studies	817	Meta-Analysis in Clinical Risk Assessment	1064
Homeland Security and Transportation Risk	830	Meta-Analysis in Nonclinical Risk Assessment	1075
Hormesis	838	Methylmercury	1084
Hotspot Geoinformatics	844	Microarray Analysis	1089
Human Reliability Assessment	851	Mobile Phones and Health Risks	1092
Imprecise Reliability	875	Model Risk	1094
Individual Risk Models	881	Modifiable Areal Unit Problem (MAUP)	1098
Inequalities in Risk Theory	888	Molecular Markers and Models	1101
Inferiority and Superiority Trials	895	Monte Carlo Methods	1104
Influence Diagrams	897	Moral Hazard	1107
Informational Value of Corporate Issuer Credit Ratings	910	Multiattribute Modeling	1109
Insurability Conditions	915	Multiattribute Utility Functions	1114
Insurance Applications of Life Tables	916	Multiattribute Value Functions	1119
Insurance Pricing/Nonlife	922	Multistate Models for Life Insurance Mathematics	1128
Integration of Risk Types •	933	Multistate Systems	1139
Intensity Modeling: The Cox Process	937	Multivariate Reliability Models and Methods	1144
Intent-to-Treat Principle	940		
Interpretations of Probability	943		
VOLUME 3		Natural Resource Management	1149
Kriging	953	Near-Miss Management: A Participative Approach to Improving System Reliability	1154
Large Insurance Losses Distributions	961	No Fault Found	1163
Latin Hypercube Sampling	969	Non- and Semiparametric Models and Inference for Reliability Systems	1167
Lead	973	Nonlife Insurance Markets	1176
Levy Processes in Asset Pricing	978	Nonlife Loss Reserving	1180
Life Insurance Markets	983	Nonparametric Calibration of Derivatives Models	1187
Lifetime Models and Risk Assessment	987	Nuclear Explosion Monitoring	1191
Linkage Analysis	991	Numerical Schemes for Stochastic Differential Equation Models	1197
Logistic Regression	1003		
Longevity Risk and Life Annuities	1014	Occupational Cohort Studies	1203
Low-Dose Extrapolation	1019	Occupational Risks	1214
Maintenance Modeling and Management	1023		

Odds and Odds Ratio	1219	Randomized Controlled Trials	1415
Operational Risk Development	1220	Recurrent Event Data	1419
Operational Risk Modeling	1224	Reinsurance	1425
Optimal Risk-Sharing and Deductibles in Insurance	1230	Relative Risk	1429
Optimal Stopping and Dynamic Programming	1236	Reliability Data	1430
Options and Guarantees in Life Insurance	1244	Reliability Demonstration	1438
Ordering of Insurance Risk	1250	Reliability Growth Testing	1443
		Reliability Integrated Engineering Using Physics of Failure	1448
Parametric Probability Distributions in Reliability	1255	Reliability of Consumer Goods with "Fast Turn Around"	1462
Persistent Organic Pollutants	1261	Reliability of Large Systems	1466
Pesticide Risk	1271	Reliability Optimization	1471
Pharmaceuticals in the Environment	1273	Remote Sensing	1477
Players in a Decision	1277	Repair, Inspection, and Replacement Models	1481
Point Source Modeling	1278	Repairable Systems Reliability	1493
Polychlorinated Biphenyls	1281	Repeated Measures Analyses	1500
Potency Estimation	1285	Risk and the Media	1508
Precautionary Principle	1290	Risk Attitude	1512
Precautionary Principles: Definitions, Issues, and Implications for Risky Choices	1293	Risk Characterization	1524
Premium Calculation and Insurance Pricing	1302	Risk Classification in Nonlife Insurance	1530
Pricing of Life Insurance Liabilities	1314	Risk Classification/Life	1535
Privacy Protection in an Era of Data Mining and Record Keeping	1322	Risk from Ionizing Radiation	1540
Probabilistic Design	1325	Risk in Credit Granting and Lending Decisions: Credit Scoring	1546
Probabilistic Risk Assessment	1349	Risk Management of Construction Defects	1553
Product Risk Management: Testing and Warranties	1356	Risk Measures and Economic Capital for (Re)insurers	1556
Professional Organizations in Risk Management	1360	Risk-Benefit Analysis for Environmental Applications	1566
Protection of Infrastructure	1364	Risk-Neutral Pricing: Importance and Relevance	1569
Public Health Surveillance	1371	Role of Alternative Assets in Portfolio Construction	1574
Public Participation	1381	Role of Risk Communication in a Comprehensive Risk Management Approach	1584
Quantitative Reliability Assessment of Electricity Supply	1373	Ruin Probabilities: Computational Aspects	1587
		Ruin Theory	1591
VOLUME 4			
R&D Planning and Risk Management	1399	Safety	1599
Radioactive Chemicals/Radioactive Compounds	1403	Sampling and Inspection for Monitoring Threats to Homeland Security	1600
Radon	1409	Scenario Simulation Method for Risk Management	1603
Radon Risk	1411		

Scenario-Based Risk Management and Simulation Optimization	1611	Threshold Models	1769
Scientific Uncertainty in Social Debates Around Risk	1618	Toxic Torts: Implications for Risk Management	1771
Securitization/Life	1623	Toxicity (Adverse Events)	1777
Simulation in Risk Management	1627	Truncation	1779
Social Networks	1634	Ultrahigh Reliability	1783
Societal Decision Making	1640	Uncertainty Analysis and Dependence Modeling	1789
Software Testing and Reliability	1642	Uncertainty and Variability Characterization and Measures in Risk Assessment	1797
Soil Contamination Risk	1653	Understanding Large-Scale Structure in Massive Data Sets	1804
Solvency	1657	Use of Decision Support Techniques for Information System Risk Management	1811
Spatial Risk Assessment	1663	Utility Function	1818
Spatiotemporal Risk Analysis	1665	Value at Risk (VaR) and Risk Measures	1823
Stakeholder Participation in Risk Management Decision Making	1668	Value Function	1830
Statistical Arbitrage	1672	Volatility Modeling	1832
Statistics for Environmental Justice	1678	Volatility Smile	1839
Statistics for Environmental Mutagenesis	1682	Vulnerability Analysis for Environmental Hazards	1845
Statistics for Environmental Teratogenesis	1687	Warranty Analysis	1849
Statistics for Environmental Toxicity	1692	Water Pollution Risk	1857
Stochastic Control for Insurance Companies	1697	Wear	1862
Stratospheric Ozone Depletion	1702	Weather Derivatives	1868
Stress Screening	1704	What are Hazardous Materials?	1873
Structural Models of Corporate Credit Risk	1707	Zero Failure Data	1879
Structural Reliability	1712		
Structured Products and Hybrid Securities	1715		
Subjective Expected Utility	1719		
Subjective Probability	1724		
Supra Decision Maker	1734		
Survival Analysis	1736		
Syndromic Surveillance	1743		
Systems Reliability	1753
