Handbook of
**MECHANICAL
ENGINEERING**

Edited by W. Beitz and K.-H. Kuttner
English Edition edited by B.J. Davies
Translation by M.J. Shields

With 1258 Figures

Springer-Verlag
London Berlin Heidelberg New York
Paris Tokyo Hong Kong
Barcelona Budapest

Contents

A Mechanics

1	Statics of Rigid Bodies	A1
1.1	Introduction	A1
1.2	Combination and Resolution of Concurrent Forces	A2
1.3	Combination and Resolution of Non-Concurrent Forces	A4
1.4	Conditions of Equilibrium	A5
1.5	Types of Support; the 'Free Body'	A7
1.6	Support Reactions	A7
1.7	Systems of Rigid Bodies	A10
1.8	Pin-Jointed Frames	A10
1.9	Cables and Chains	A12
1.10	Centre of Gravity	A13
1.11	Friction	A15
2	Kinematics	A19
2.1	Motion of a Particle	A19
2.2	Motion of a Rigid Body	A22
3	Dynamics	A27
3.1	Basic Concepts of Energy, Work, Power, Efficiency	A27
3.2	Particle Dynamics, Straight-Line Motion of Rigid Bodies	A28
3.3	Dynamics of Systems of Particles	A30
3.4	Dynamics of a Rigid Body	A33
3.5	Dynamics of Relative Motion	A39
3.6	Impact	A39
4	Mechanical Vibrations	A40
4.1	One-Degree-of-Freedom Systems	A40
4.2	Multi-Degree-of-Freedom Systems (Coupled Vibrations)	A44
4.3	Non-linear Vibrations	A48
5	Hydrostatics	A49
6	Hydrodynamics and Aerodynamics (Dynamics of Fluids)	A51
6.1	One-Dimensional Flow of Ideal Fluids	A51
6.2	One-Dimensional Flow of Viscous Newtonian Fluids	A52
6.3	One-Dimensional Flow of Non-Newtonian Fluids	A59
6.4	Forces Due to the Flow of Incompressible Fluids	A60
6.5	Multi-Dimensional Flow of Inviscid Fluids	A60
6.6	Multi-Dimensional Flow of Viscous Fluids	A63

7	Similarity Mechanics	A69
7.1	Introduction	A69
7.2	Similarity Laws.	A69
8	References	A72

B Strength of Materials

1	General Fundamentals	B1
1.1	Stress and Strain	B1
1.2	Strength and Properties of Materials.	B4
1.3	Failure Criteria, Equivalent Stresses.	B6
2	Stresses in Bars and Beams	B7
2.1	Tension and Compression.	B7
2.2	Transverse Shear Stresses.	B7
2.3	Contact Stresses and Bearing Pressures.	B8
2.4	Bending	B8
2.5	Torsion.	B27
2.6	Combined Stresses.	B31
2.7	Statically Indeterminate Systems.	B32
3	Theory of Elasticity	B36
3.1	General.	B36
3.2	Axisymmetric Stresses.	B36
3.3	Plane Stresses.	B37
4	Hertzian Contact Stresses (Formulae of Hertz)	B38
4.1	Spheres.	B38
4.2	Cylinders.	B38
4.3	Arbitrarily Curved Surfaces.	B38
5	Plates and Shells	B39
5.1	Plates.	B39
5.2	Discs, Plates Under In-Plane Loads.	B41
5.3	Shells.	B41
6	Centrifugal Stresses in Rotating Components	B43
6.1	Rotating Bars.	B43
6.2	Rotating Thin Rings.	B43
6.3	Rotating Discs.	B43
7	Stability Problems	B45
7.1	Buckling of Bars.	B45
7.2	Lateral Buckling of Beams.	B48
7.3	Buckling of Plates and Shells.	B48
8	Finite-Element and Boundary-Element Methods	B50
8.1	Finite Elements.	B50
8.2	Boundary Elements.	B53

9	Theory of Plasticity.	B55
9.1	Introduction to Theory of Plasticity.	B55
9.2	Uses.	B56
10	Appendix B: Diagrams and Tables.	B59
11	References.	B76

C Thermodynamics

1	Scope of Thermodynamics. Definitions	C1
1.1	Systems, Boundaries of Systems, Surroundings.	C1
1.2	Description of the State of a System. Thermodynamic Processes.	C1
2	Temperatures. Equilibria.	C2
2.1	Adiabatic and Diathermal Walls.	C2
2.2	Zeroth Law and Empirical Temperature.	C2
2.3	Temperature Scales.	C2
3	First Law.	C3
3.1	General Formulation.	C3
3.2	The Various Forms of Energy.	C4
3.3	Application to Closed Systems.	C4
3.4	Application to Open Systems.	C5
4	Second Law.	C6
4.1	The Principle of Irreversibility.	C6
4.2	General Formulation.	C6
4.3	Special Formulations.	C7
5	Exergy and Anergy.	C7
5.1	Exergy of a Closed System.	C7
5.2	Anergy.	C8
5.3	Exergy of an Open System.	C8
5.4	Exergy and Heat.	C8
5.5	Exergy Losses.	C8
6	Thermodynamics of Substances	C9
6.1	Thermal State Variables of Gases and Vapours.	C9
6.2	Caloric Properties of Gases and Vapours.	C10
6.3	Solids	C12
6.4	Mixing Temperature, Measurement of Specific Heat Capacities.	C13
7	Changes of State of Gases and Vapours	C14
7.1	Changes of State of Gases and Vapours at Rest.	C14
7.2	Changes of State of Gases and Vapours in Motion.	C15
8	Thermodynamic Processes	C16
8.1	Combustion Processes.	C16

8.2	Internal Combustion Engines.	C18
8.3	Cyclic Processes.	C19
8.4	Cooling and Heating.	C22
9	Ideal Gas Mixtures.	C23
9.1	Dalton's Law. Thermal and Caloric Properties of State.	C23
9.2	Mixtures of Gas and Vapour.	C24
9.3	Humid Air.	C24
10	Heat Transfer.	C26
10.1	Steady-State Heat Conduction.	C26
10.2	Heat Transfer and Heat Transmission.	C27
10.3	Instationary Heat Transmission.	C28
10.4	Heat Transfer by Convection.	C30
10.5	Radiative Heat Transfer.	C33
11	Tables.	C34
12	References.	C54

D Materials Technology

1	Fundamental Properties of Materials and Structural Parts.	D1
.1	Load and Stress Conditions.	D1
.2	Causes of Failure.	D2
.3	Materials Design Values.	D5
.4	Effect of Materials Structure, Manufacturing-Process and Environment Conditions on Strength and Ductility Behaviour	D8
.5	Strength Properties and Constructional Design.	D10
.6	Loadbearing Capability of Structural Components.	D13
2	Materials Testing.	D17
2.1	Fundamentals.	D17
2.2	Test Methods.	D18
3	Properties and Application of Materials.	D26
3.1	Iron Base Materials.	D26
3.2	Non-Ferrous Metals.	D43
3.3	Non-Metallic Materials.	D49
3.4	Materials Selection.	D53
4	Plastics.	D54
4.1	Introduction.	D54
4.2	Structure and Properties.	D54
4.3	Properties.	D54
4.4	Important Thermoplastics.	D55
4.5	Fluorinated Plastics.	D57
4.6	Thermosets.	D57
4.7	Plastic Foams (Cellular Plastics).	D58
4.8	Elastomers.	D58
4.9	Testing of Plastics.	D59

4.10	Processing of Plastics.	D62
4.11	Design and Tolerances of Formed Parts.	D66
4.12	Finishing	D67
5	Tribology.	D67
5.1	Friction.	D67
5.2	Friction States of Oil-Lubricated Sliding Pairs	D67
5.3	Elastohydrodynamic Lubrication.	D68
5.4	Wear.	D70
5.5	Systems Analysis of Friction and Wear Processes.	D71
5.6	Lubricants.	D72
6	Appendix D: Diagrams and Tables	D76
7	References	D121

E Fundamentals of Engineering Design

1	Fundamentals of Technical Systems	E1
1.1	Energy, Material and Signal Transformation.	E1
1.2	Functional Interrelationship	E1
1.3	Working Interrelationships.	E2
1.4	Constructional Interrelationship.	E4
1.5	System Interrelationship.	E4
1.6	General Objectives and Constraints.	E4
2	Fundamentals of a Systematic Approach	E4
2.1	General Working Method.	E4
2.2	General Problem-Solving.	E4
2.3	Abstracting to Identify Functions.	E4
2.4	Search for Solution Principles.	E5
2.5	Evaluation of Solutions.	E6
3	The Design Process.	E10
3.1	Defining Requirements.	E10
3.2	Conceptual Design.	E11
3.3	Embodiment Design.	E12
3.4	Detail Design.	E12
3.5	Types of Engineering Design.	E12
4	Fundamentals of Embodiment Design	E13
4.1	Basic Rule of Embodiment Design.	E13
4.2	Principles of Embodiment Design.	E14
4.3	Guidelines for Embodiment Design.	E16
5	Fundamentals of the Development of Series and Modular Design.	E20
5.1	Similarity Laws.	E20
5.2	Decimal-Geometric Series of Preferred Numbers (Renard Series).	E20
5.3	Geometrically Similar Series.	E21
5.4	Semi-similar Series.	E21

5.5	Use of Exponential Equations.	E21
5.6	Modular System	E22
6	Fundamentals of Standardisation and Engineering Drawing	E23
6.1	Standardisation	E23
6.2	Basic Standards.	E24
6.3	Engineering Drawings and Parts Lists.	E25
6.4	Item Numbering Systems.	E30
7	References	E31

F Mechanical Machine Components

1	Connections	F1
1.1	Welding	F1
1.2	Soldering and Brazing	F18
1.3	Adhesive Bonding	F21
1.4	Connections with Force Transmission by Friction.	F23
1.5	Positive Connections.	F28
1.6	Bolted Connections.	F34
1.7	Selecting Types of Connection	F47
2	Elastic Connections (Springs).	F50
2.1	Uses, Characteristics, Properties.	F50
2.2	Metal Springs.	F51
2.3	Rubber Springs and Anti-vibration Mountings.	F59
2.4	Fibre Composite Springs.	F62
2.5	Gas Springs.	F63
3	Couplings, Clutches and Brakes.	F64
3.1	Survey, Functions.	F64
3.2	Permanent Torsionally Stiff Couplings.	F65
3.3	Permanent Elastic Couplings.	F66
3.4	Clutches.	F69
3.5	Automatic Clutches	F74
4	Rolling Bearings.	F75
4.1	Fundamentals.	F75
4.2	Types of Rolling Bearings.	F77
4.3	Load Capacity, Fatigue Life, Service Life.	F79
4.4	Lubrication of Rolling Bearings.	F84
4.5	Friction and Heating	F87
4.6	Design of Rolling Bearing Assemblies.	F87
5	Plain Bearings	F89
5.1	Fundamentals of Plain Bearing Design.	F89
5.2	Calculation of Plain Journal Bearings Under Steady Radial Load.	F89
5.3	Calculation of Plain Journal Bearings Under Variable Radial Load	F92
5.4	Turbulent Film Flow.	F92

5.5	Calculation of Plain Thrust Bearings.	F92
5.6	Form Design of Plain Bearings.	F96
5.7	Lobed and Multi-pad Plain Bearings.	F98
5.8	Bearing Seals.	F98
5.9	Dry Bearings.	F99
5.10	Bearing with Hydrostatic Jacking Systems.	F99
5.11	Hydrostatic Bearings.	F99
6	Belt and Chain Drives	F101
6.1	Types, Uses.	F101
6.2	Flat Belt Drives.	F101
6.3	V-Belts.	F107
6.4	Synchronous Belts.	F109
6.5	Chain Drives.	F109
7	Friction Drives	F110
7.1	Mode of Operation, Definitions.	F110
7.2	Types, Examples.	F111
7.3	Principles of Calculation.	F112
7.4	Hints on Use and Operation.	F115
8	Gearing	F116
8.1	Spur and Helical Gears - Gear Tooth Geometry.	F117
8.2	Tooth Errors and Tolerances, Backlash.	F124
8.3	Lubrication and Cooling.	F125
8.4	Materials and Heat Treatment - Gear Manufacture.	F126
8.5	Load Capacity of Spur and Helical Gears.	F128
8.6	Bevel Gears.	F137
8.7	Crossed Helical Gears.	F139
8.8	Worm Gears.	F139
8.9	Epicyclic Gear Arrangements.	F143
8.10	Design of Geared Transmissions.	F153
9	Kinematics	F157
9.1	Systematics of Mechanisms.	F157
9.2	Analysis of Mechanisms.	F161
9.3	Synthesis of Mechanisms.	F166
9.4	Special Mechanisms.	F168
10	Crank Mechanisms.	F168
10.1	Kinematics.	F168
10.2	Dynamics.	F170
10.3	Components of Crank Mechanism.	F172
11	Appendix F: Diagrams and Tables.	F176
12	References.	F194
G	Hydraulic and Pneumatic Power Transmission	
1	Fundamentals of Fluid Power Transmission Systems.	G1

1.1	The Flow Process.G1
1.2	Hydraulic Fluids.G2
1.3	Systematology.G2
2	Components of Hydrostatic Transmissions.G4
2.1	Pumps.G4
2.2	Hydraulic Motors.G8
2.3	Valves.G9
2.4	Hydraulic Equipment.G12
3	Structure and Function of Hydraulic Transmissions	G12
3.1	Hydraulic Circuits.G12
3.2	Operation of Hydraulic Transmissions.G12
3.3	Control.G13
4	Configuration and Design of Hydraulic Transmissions.G15
4.1	Hydraulic Circuit Arrangements.G15
4.2	Design of Hydraulic Circuits.G15
5	Pneumatic Installations.G16
5.1	Pneumatic Components.G16
5.2	Circuits.G17
6	Water Hydraulic Systems.G17
7	Appendix G: Diagrams and Tables.G18
8	References.G20

H Components of Thermal Apparatus

1	Fundamentals.HI
1.1	Heat Exchanger Characteristics.HI
1.2	Thermodynamic and Fluid Dynamic Design.HI
1.3	Heat Exchanger Flow Arrangements and Operating Characteristics.H4
1.4	Efficiency, Exergy Losses.H4
2	Apparatus and Piping Components.H5
2.1	Basis for Design Calculations.H5
2.2	Cylindrical Shells and Tubes Under Internal Pressure.H6
2.3	Cylindrical Shells Under External Pressure.H6
2.4	Flat End Closures and Tube Plates.H7
2.5	Domed End Closures.H7
2.6	Cutouts.H8
2.7	Flange Joints.H8
2.8	Piping.H10
2.9	Shutoff and Control Valves.H14
2.10	Seals.H18
3	Types of Heat Exchanger.H21

3.1	Tube-Bundle (Shell-and-Tube) Heat Exchangers	H21
3.2	Other Types	H22
4	Condensers and Reflux Coolers	H23
4.1	Principles of Condensation	H23
4.2	Surface Condensers.	H24
4.3	Injection (Direct-Contact) Condensers.	H25
4.4	Air-Cooled Condensers	H26
4.5	Auxiliary Equipment	H26
4.6	Indirect Air Cooling and Cooling Towers.	H27
5	Appendix H: Diagrams and Tables	H29
6	References	H31

J Machine Dynamics

1	Crank Operation, Forces and Moments of Inertia, Flywheel Calculations	J1
1.1	Graph of Torque Fluctuations in Multi-Cylinder Reciprocating Machines	J1
1.2	Forces and Moments of Inertia	J4
2	Vibrations.	J10
2.1	The Problem of Vibrations in Machines.	J10
2.2	Some Fundamental Concepts.	J11
2.3	Basic Problems in Machine Dynamics.	J14
2.4	Representation of Vibrations in the Time and Frequency Domains.	J16
2.5	Origin of Machine Vibrations, Excitation Forces $F(f)$	J18
2.6	Mechanical Equivalent Systems, Equations of Motion.	J21
2.7	Application Examples for Machine Vibrations.	J25
3	Acoustics in Mechanical Engineering	J29
3.1	Basic Concepts.	J29
3.2	The Generation of Machine Noise.	J31
3.3	Methods for Reducing Machine Noise.	J33
4	References.	J36

Manufacturing Processes

1	Survey of Manufacturing Processes	K1
1.1	Definition and Criteria.	K1
1.2	Classification.	K1
2	Primary Shaping	K2
2.1	General	K2
2.2	Shaping of Metals by Casting.	K3
2.3	Forming of Plastics.	K15

2.4	Forming of Metals and Ceramics by Powder Metallurgy	K17
2.5	Other Methods of Primary Shaping	K19
3	Metal Forming	K19
3.1	Classification and Introduction	K19
3-2	Fundamentals of Metal Forming.	K20
3.3	Theoretical Models	K23
3.4	Stresses and Forces in Selected Metal Forming Processes	K25
3.5	Technology.	K28
4	Cutting	K35
4.1	General	K35
4.2	Machining with Geometrically Well-defined Tool Edges	K35
4.3	Machining with Geometrically Non-defined Tool Edges	K50
4.4	Chipless Machining	K57
4.5	Shearing and Blanking	K61
5	Special Technologies	K67
5.1	Thread Production	K67
5.2	Gear Cutting.	K70
5.3	Manufacturing in Precision Engineering and Micro technology	K81
5.4	Surface Coating.	K90
6	Assembly.	K91
6.1	Definitions	K92
6.2	Tasks of Assembly.	K93
6.3	Realisation of Assembly.	K93
7	Production and Works Management	K96
7.1	Job Planning.	K96
7.2	Manufacturing Systems.	K100
7.3	Quality Engineering	K103
7.4	Operational Costing	K105
7.5	Basic Ergonomics.	K107
8	Appendix K: Diagrams and Tables	K109
9	References	K118

L Manufacturing Systems

1	Machine Tool Components	LI
1.1	Fundamentals.	LI
1.2	Drives.	L4
1.3	Frames.	L21
1.4	Linear and Rotary Guides and Bearings.	L25
2	Control Systems	L34
2.1	Fundamentals of Control	L34
2.2	Means of Control	L37
2.3	Programmable Logic Controller (PLC).	L41

2.4	Numerical Control (NC).	L42
2.5	Equipment for Position Measurement at NC Machines.	L48
3	Shearing and Blanking Machines.	L52
3.1	Shearing Machines.	L52
3.2	Blanking Machines.	L53
3.3	Nibbling Machines.	L53
3.4	Beam Cutting Machines.	L54
4	Presses and Hammers for Metal Forging	L54
4.1	Characteristics of Presses and Hammers.	L54
4.2	Mechanical Presses.	L55
4.3	Hydraulic Presses.	L60
4.4	Hammers and Screw Presses.	L61
4.5	Safety.	L65
5	Metal-Cutting Machine Tools.	L66
5.1	Lathes.	L66
5.2	Drilling and Boring Machines.	L73
5.3	Milling Machines.	L79
5.4	Horizontal Boring and Milling Machines.	L83
5.5	Machining Centres.	L83
5.6	Planing, Shaping and Slotting Machines.	L85
5.7	Broaching Machines.	L86
5.8	Sawing and Filing Machines.	L87
5.9	Grinding Machines.	L89
5.10	Honing Machines.	L92
5.11	Lapping Machines.	L94
5.12	Multi-machine Systems.	L97
6	Welding and Soldering (Brazing) Machines	L97
6.1	Arc Welding Machines.	L97
6.2	Resistance Welding Machines.	L99
6.3	Soldering and Brazing Equipment.	L100
7	Industrial Robots.	L100
7.1	Systematics of Handling Systems.	L100
7.2	Components of Robots.	L101
7.3	Kinematic and Dynamic Models.	L102
7.4	Characteristics, Accuracy.	L102
7.5	Industrial Robot Control Systems.	L102
7.6	Programming.	L104
7.7	Main Applications and Selection of Robots.	L107
8	References.	L108
	Index.	1
