CONTENTS

PREFACE	xv
1 PRELIMINARIES	1
1.1 Random Variables and Distributions	1
1.2 Type of Distribution	4
1.3 Moment Characteristics	4
1.4 Shape Characteristics	7
1.5 Entropy	8
1.6 Generating Function and Characteristic Function	10
1.7 Decomposition of Distributions	14
1.8 Stable Distributions	14
1.9 Random Vectors and Multivariate Distributions	15
1.10 Conditional Distributions	18
1.11 Moment Characteristics of Random Vectors	19
1.12 Conditional Expectations	20
1.13 Regressions	21
1.14 Generating Function of Random Vectors	22
1.15 Transformations of Variables	24
1 DISCRETE DISTRIBUTIONS	27
2 DISCRETE UNIFORM DISTRIBUTION	29
2.1 Introduction	29
2.2 Notations	29
2.3 Moments	30
2.4 Generating Function and Characteristic Function	33
2.5 Convolutions	34
2.6 Decompositions	35
2.7 Entropy	36
2.8 Relationships with Other Distributions	36

3	DEGENERATE DISTRIBUTION	39
3.1	Introduction	39
3.2	Moments	39
3.3	Independence	40
3.4	Convolution	41
3.5	Decomposition	41
4	BERNOULLI DISTRIBUTION	43
4.1	Introduction	43
4.2	Notations	43
4.3	Moments	44
4.4	Convolutions	45
4.5	Maximal Values	46
4.6	Relationships with Other Distributions	47
5	BINOMIAL DISTRIBUTION	49
5.1	Introduction	49
5.2	Notations	49
5.3	Useful Representation	-50
5.4	Generating Function and Characteristic Function	50
5.5	Moments	-50
5.6	Maximum Probabilities	53
5.7	Convolutions	-56
5.8	Decompositions	56
5.9	Mixtures	57
5.10	Conditional Probabilities	-58
5.11	Tail Probabilities	-59
5.12	Limiting Distributions	-59
6	GEOMETRIC DISTRIBUTION	63
6.1	Introduction	63
6.2	Notations	63
6.3	Tail Probabilities	64
6.4	Generating Function and Characteristic Function	64
6.5	Moments	64
6.6	Convolutions	68
6.7	Decompositions	69
6.8	Entropy	70
6.9	Conditional Probabilities	71
6.10	Geometric Distribution of Order k	72
7	NEGATIVE BINOMIAL DISTRIBUTION	73
7.1	Introduction	73
7.2	Notations	74
7.3	Generating Function and Characteristic Function	74

7.4	Moments	74
7.5	Convolutions and Decompositions	76
7.6	Tail Probabilities	80
7.7	Limiting Distributions	81
8	HYPERGEOMETRIC DISTRIBUTION	83
8.1	Introduction	83
8.2	Notations	83
8.3	Generating Function	84
8.4	Characteristic Function	84
8.5	Moments	84
8.6	Limiting Distributions	88
9	POISSON DISTRIBUTION	89
9.1	Introduction	89
9.2	Notations	89
9.3	Generating Function and Characteristic Function	90
9.4	Moments	90
9.5	Tail Probabilities	91
9.6	Convolutions	92
9.7	Decompositions	92
9.8	Conditional Probabilities	94
9.9	Maximal Probability	95
9.10	Limiting Distribution	96
9.11	Mixtures	96
9.12	Rao-Rubin Characterization	99
9.13	Generalized Poisson Distribution	100
10	MISCELLANEA	101
10.1	Introduction	101
10.2	Polya Distribution	101
10.3	Pascal Distribution	102
10.4	Negative Hypergeometric Distribution	103
11	CONTINUOUS DISTRIBUTIONS	105
11	UNIFORM DISTRIBUTION	107
11.1	Introduction	107
11.2	Notations	107
11.3	Moments	108
11.4	Entropy	110
11.5	Characteristic Function	110
11.6	Convolutions	110
11.7	Decompositions	III
11.8	Probability Integral Transform	112
11.9	Distributions of Minima and Maxima	112

21 EXTREME VALUE DISTRIBUTIONS	189
21.1 Introduction	189
21.2 Limiting Distributions of Maximal Values	190'
21.3 Limiting Distributions of Minimal Values	191
21.4 Relationships Between Extreme Value Distributions	191
21.5 Generalized Extreme Value Distributions	193
21.6 Moments	194
22 LOGISTIC DISTRIBUTION	197
22.1 Introduction	197
22.2 Notations	197
22.3 Moments	199
22.4 Shape Characteristics	201
22.5 Characteristic Function	201
22.6 Relationships with Other Distributions	203
22.7 Decompositions	204
22.8 Order Statistics	205
22.9 Generalized Logistic Distributions	205
23 NORMAL DISTRIBUTION	209
23.1 Introduction	209
23.2 Notations	210
23.3 Mode	211
23.4 Entropy	211
23.5 Tail Behavior	212
23.6 Characteristic Function	214
23.7 Moments	215
23.8 Shape Characteristics	217
23.9 Convolutions and Decompositions	217
23.10 Conditional Distributions	219
23.11 Independence of Linear Combinations	220
23.12 Bernstein's Theorem	221
23.13 Darmois-Skitovitch's Theorem	224
23.14 Helmert's Transformation	226
23.15 Identity of Distributions of Linear Combinations	227
23.16 Asymptotic Relations	228
23.17 Transformations	229
24 MISCELLANEA	235
24.1 Introduction	235
24.2 Linnik Distribution	235
24.3 Inverse Gaussian Distribution	237
24.4 Chi-Square Distribution	239
24.5 t Distribution	240

24.5 t Distribution	240
24.6 F Distribution	245
24.7 Noncentral Distributions	246
III MULTIVARIATE DISTRIBUTIONS	247
25 MULTINOMIAL DISTRIBUTION	249
25.1 Introduction	249
25.2 Notations	250
25.3 Compositions	250
25.4 Marginal Distributions	250
25.5 Conditional Distributions	251
25.6 Moments	252
25.7 Generating Function and Characteristic Function	254
25.8 Limit Theorems	256
26 MULTIVARIATE NORMAL DISTRIBUTION	259
26.1 Introduction	259
26.2 Notations	260
26.3 Marginal Distributions	262
26.4 Distributions of Sums	262
26.5 Linear Combinations of Components	262
26.6 Independence of Components	263
26.7 Linear Transformations	264
26.8 Bivariate Normal Distribution	265
27 DIRICHLET DISTRIBUTION	269
27.1 Introduction	269
27.2 Derivation of Dirichlet Formula	271
27.3 Notations	272
27.4 Marginal Distributions	272
27.5 Marginal Moments	274
27.6 Product Moments	274
27.7 Dirichlet Distribution of Second Kind	27-5
27.8 Liouville Distribution"-	276
APPENDIX – PIONEERS IN DISTRIBUTION THEORY	277
BIBLIOGRAPHY	289
AUTHOR INDEX	294
SUBJECT INDEX	297
