<i>Reader's guide</i> .....	xxix
<b>1 An introduction to consumer price index methodology</b> .....	1
The origins and uses of consumer price indices .....	1
Choice of index number .....	2
Price indices based on baskets of goods and services .....	2
Lowe indices .....	2
Laspeyres and Paasche indices .....	3
Decomposing current value changes using Laspeyres and Paasche indices .....	3
Ratios of Lowe and Laspeyres indices .....	4
Updated Lowe indices .....	4
Interrelationships between fixed basket indices .....	4
Young index .....	5
Geometric Young, Laspeyres and Paasche indices .....	5
Symmetric indices .....	5
Fixed base versus chain indices .....	6
Axiomatic and stochastic approaches to index numbers .....	7
First axiomatic approach .....	7
Ranking of indices using the first axiomatic approach .....	8
Some further tests .....	8
The stochastic approach and a second axiomatic approach .....	9
The unweighted stochastic approach .....	9
The weighted stochastic approach .....	9
A second axiomatic approach .....	9
Cost of living index .....	10
Upper and lower bounds on a cost of living index .....	11
Some special cases .....	11
Estimating COLIs by superlative indices .....	11
Representativity bias .....	12
Data requirements and calculation issues .....	12
Allowing for substitution .....	13
Aggregation issues .....	13
Illustrative numerical data .....	13
Seasonal products .....	13
Elementary price indices .....	14
Weights within elementary aggregates .....	15
Interrelationships between different elementary index formulae .....	15
Axiomatic approach to elementary indices .....	16
Economic approach to elementary indices .....	16
Concepts, scope and classifications .....	17
Acquisitions and uses .....	17
Unconditional and conditional cost of living indices .....	19
Specific types of transactions .....	19
Household production .....	20
Coverage of households and outlets .....	21
Price variation .....	21
Classifications .....	22
Consumer price indices and national accounts price deflators .....	22
Expenditure weights .....	22
Household expenditure surveys and national accounts .....	22
Other sources for estimating expenditure weights .....	23
Collection of price data .....	23
Random sampling and purposive sampling .....	24

Methods of price collection .....	25
Continuity of price collection .....	25
Resampling .....	26
Adjusting prices for quality changes .....	26
Evaluation of the effect of quality change on price .....	27
Implicit methods for adjusting for quality changes .....	27
Explicit quality adjustments .....	29
Item substitution and new goods .....	29
New goods and services .....	30
Calculation of consumer price indices in practice .....	30
Elementary price indices .....	31
Higher-level indices .....	31
Organization and management .....	32
Publication and dissemination .....	32
<b>2 Uses of consumer price indices .....</b>	<b>33</b>
A range of possible consumer price indices .....	33
Indexation .....	33
Indexation of wages .....	33
Indexation of social security benefits .....	33
The type of index used for indexation .....	34
Indexation of interest, rents and other contractual payments .....	34
Taxation .....	34
Real consumption and real income .....	35
Consistency between price indices and expenditure series .....	35
Purchasing power parities .....	35
Use of the consumer price index for accounting under inflation .....	36
Current purchasing power accounts .....	36
Current cost accounting .....	36
Consumer price indices and general inflation .....	36
Consumer price indices and inflation targets .....	36
Consumer price indices and international comparisons of inflation .....	36
Popularity of consumer price indices as economic statistics .....	37
The need for independence and integrity of consumer price indices .....	37
<b>3 Concepts and scope .....</b>	<b>39</b>
Introduction .....	39
Alternative consumption aggregates .....	39
Acquisitions and expenditures .....	40
Monetary versus non-monetary expenditures .....	40
Acquisitions and uses .....	40
Durables and non-durables .....	41
Consumer price indices based on acquisitions and uses .....	41
Basket indices and cost of living indices .....	42
Lowe indices .....	42
Cost of living indices .....	42
Expenditures and other payments outside the scope of consumer price indices .....	43
Transfers .....	43
Insurance .....	44
Gambling .....	44
Transactions in financial assets .....	44
Purchases and sales of foreign currency .....	44
Payments, financing and credit .....	44
Financial transactions and borrowing .....	45
The creation of a financial asset/liability .....	45
Hire purchase .....	45
Interest payments .....	46
Household production .....	46
Business activities .....	46
Consumption of own produce .....	47
Coverage of households and outlets .....	48
Definition of household .....	48
Types of household .....	49

Geographical coverage .....	49
Outlet coverage .....	50
Price variation .....	50
Price discrimination .....	51
Price variation between outlets .....	51
Outlet rotation .....	51
Treatment of some specific household expenditures .....	52
Fees of agents and brokers .....	52
Undesirable or illegal goods and services .....	52
Luxury goods and services .....	52
Second-hand goods .....	52
Imputed expenditures on goods and services .....	53
Price coverage .....	53
Taxes and subsidies .....	53
Discounts, rebates, loyalty schemes and “free” products .....	54
Classification .....	55
Criteria for classifying consumption expenditure .....	55
Classification by product <sup>1</sup> type .....	55
Classification by purpose .....	56
Classifications for consumer price indices .....	56
Publication level .....	56
Classification of Individual Consumption according to Purpose (COICOP) .....	57
Appendix 3.1 Consumer price indices and national accounts price deflators .....	58
<b>4 Expenditure weights and their sources .....</b>	<b>59</b>
Introduction .....	59
The weighting structure of the consumer price index .....	59
Group, class and sub-class weights .....	61
Regional weights .....	61
Outlet or outlet-type weights .....	61
Elementary aggregate weights .....	61
Data sources .....	62
Household expenditure surveys .....	62
National accounts .....	63
Retail sales data .....	63
Point-of-purchase surveys .....	63
Scanner data .....	63
Population censuses .....	63
Deriving the weights in practice .....	64
Payments that are not consumption expenditures .....	64
Unimportant expenditures .....	64
Products that are difficult to price .....	64
Use and combination of different sources .....	64
Adjusting the weights derived from household expenditure surveys .....	64
Weight reference period .....	65
Need for revising the weights .....	65
Frequency of updating the weights .....	65
Classification .....	66
Items requiring special treatment .....	66
Errors in weighting .....	68
<b>5 Sampling .....</b>	<b>69</b>
Introduction .....	69
Probability sampling techniques .....	69
Implementing probability sampling in consumer price indices .....	70
Sampling techniques based on probability proportional to size .....	70
Sampling methods used by the US Bureau of Labor Statistics .....	71
Non-probability sampling techniques .....	71
Reasons for using non-probability sampling .....	71
Cut-off sampling .....	72
Quota sampling .....	73
The representative item method .....	73
Sampling in time .....	73

Choice of sampling method .....	73
Estimation procedures .....	74
Implementing estimation procedures for consumer price indices .....	75
Variance estimation .....	76
Variances of elementary index formulae .....	76
The United States approach .....	76
The Swedish approach .....	76
The French approach .....	77
The Luxembourg approach .....	77
Other approaches .....	78
Optimal allocation .....	78
Summary .....	78
<b>6 Price collection .....</b>	<b>81</b>
Introduction .....	81
Frequency and timing of collection .....	81
Taking account of hyperinflation .....	83
Item specification .....	83
Collection procedures .....	84
Price collection techniques .....	85
Questionnaire design .....	87
Field procedures .....	90
Central and head office collection .....	90
Price reductions .....	91
Price bargaining .....	93
Forced replacements, product substitution and quality adjustment .....	94
Related issues .....	95
Electronic reporting .....	95
Purchasing power parities .....	96
Data quality and quality assurance .....	97
Documentation .....	97
Appendix 6.1 Extract from a simple price collection form .....	98
<b>7 Adjusting for quality change .....</b>	<b>99</b>
Introduction .....	99
Why the matched models method may fail .....	99
Missing items .....	99
Sampling concerns .....	100
New products .....	101
The nature of quality change .....	101
A utility-based approach .....	102
Conditional indices .....	103
An overview of methods of quality adjustment when matched items are unavailable .....	104
Additive versus multiplicative adjustment .....	105
Base versus current period adjustment .....	105
Long-run versus short-run comparisons .....	106
Implicit methods of quality adjustment .....	106
Overlap .....	106
Overall mean or targeted mean imputation .....	108
Class mean imputation .....	111
Comparable replacement .....	111
Linked to show no price change .....	112
Carry-forward .....	112
Explicit methods of quality adjustment .....	112
Expert judgement .....	112
Quantity adjustment .....	113
Differences in production or option costs .....	114
Hedonic approach .....	116
Limitations of the hedonic approach .....	120
Choice between quality adjustment methods .....	122
High-technology and other sectors with a rapid turnover of models .....	124
Some examples .....	124
Hedonic price indices .....	125

The difference between hedonic indices and matched indices .....	128
Chaining .....	129
Long-run and short-run comparisons .....	130
Quality adjustment methods in short-run comparisons .....	130
Implicit short-run comparisons using imputations .....	131
Single-stage and two-stage indices .....	132
Appendix 7.1 Data on personal computers, obtained from United Kingdom Compaq and Dell web sites, July 2000, to illustrate hedonic regression .....	134
<b>8 Item substitution, sample space and new products .....</b>	<b>137</b>
Introduction .....	137
Matched samples .....	137
Sample space and item replacement or substitution .....	138
Sample rotation, chaining and hedonic indices .....	140
Information requirements for a quality adjustment strategy .....	140
Statistical metadata system .....	140
New products and how they differ from products with quality changes .....	141
Incorporation of new products .....	142
Sample rebasing and rotation .....	143
Directed replacements and sample augmentation .....	144
Reservation prices .....	146
Summary .....	146
Appendix 8.1 Appearance or disappearance of products or outlets .....	148
Appendix 8.2 New goods and substitution .....	151
<b>9 Calculating consumer price indices in practice .....</b>	<b>153</b>
Introduction .....	153
The calculation of price indices for elementary aggregates .....	153
Construction of elementary aggregates .....	153
Construction of elementary price indices .....	154
Chain versus direct indices for elementary aggregates .....	159
Consistency in aggregation .....	160
Missing price observations .....	160
Other formulae for elementary price indices .....	162
Unit value indices .....	164
Formulae applicable to scanner data .....	164
The calculation of higher-level indices .....	164
Consumer price indices as weighted averages of elementary indices .....	165
A numerical example .....	166
Young and Lowe indices .....	166
Factoring the Young index .....	167
Price-updating from the weight reference period to the price reference period .....	167
The introduction of new weights and chain linking .....	168
Decomposition of index changes .....	171
Some alternatives to fixed weight indices .....	172
Data editing .....	173
Identifying possible errors and outliers .....	174
Verifying and correcting data .....	176
<b>10 Some special cases .....</b>	<b>179</b>
Introduction .....	179
Owner-occupied housing .....	179
Use .....	179
Payments .....	181
Acquisitions .....	183
Clothing .....	185
The clothing market .....	185
Approaches to constructing indices for non-seasonal clothing .....	185
Replacement of items and quality change .....	186
Approaches to including seasonal clothing in the consumer price index .....	187
Summary comments .....	190
Telecommunication services .....	191
Representative items – matched samples .....	192
Representative items – unit values .....	193

Customer profiles .....	193
Sample of bills .....	194
Financial services .....	194
Currency exchange .....	195
Stockbroking services .....	195
Deposit and loan facilities .....	196
Real estate agency services .....	198
Property insurance services .....	198
Payments .....	199
Use .....	199
Acquisitions .....	200
Pricing gross insurance premiums .....	200
Using gross premiums as a proxy for the net insurance service .....	200
Appendix 10.1 Calculation of a price index for a deposit product .....	202
<b>11 Errors and bias .....</b>	<b>207</b>
Introduction .....	207
Types of error .....	207
Sampling error .....	207
Non-sampling error .....	207
Measuring error and bias .....	208
Estimation of variance .....	208
Qualitative descriptions of non-sampling errors .....	209
Procedures to minimize errors .....	209
Types of bias .....	210
Components of bias .....	211
Upper-level substitution bias .....	211
Elementary aggregate bias .....	212
Quality change and new products bias .....	213
New outlet bias .....	213
Summary of bias estimates .....	214
Conclusion .....	214
<b>12 Organization and management .....</b>	<b>215</b>
Introduction .....	215
Local collection .....	215
Contracting out .....	215
Central collection .....	217
Quality in the field .....	217
Descriptions .....	217
Continuity .....	217
Data entry queries .....	218
Feedback .....	218
Quality checks in local collection: The role of auditors .....	218
Monitoring .....	218
Backchecking .....	219
Other auditor functions .....	219
Quality checks in head office .....	219
Reports .....	220
Algorithms .....	221
Producing and publishing the index .....	221
Monthly compilation .....	221
Spreadsheets .....	222
Introducing changes .....	222
Disaster recovery .....	222
Quality management and quality management systems .....	223
Quality management systems .....	223
Scope for greater use of quality management techniques .....	224
Performance management, development and training .....	225
Training requirements .....	225
Specific training for compilers and collectors .....	225
Documentation .....	225
Reviews .....	226

<b>13 Publication, dissemination and user relations</b>	227
Introduction	227
Time series presentation of level and change	227
Seasonal adjustment and smoothing of the index	228
Analysis of contributions to change	228
Economic commentary and interpretation of the index	228
Presentation of related or alternative measures	229
Core inflation	229
Alternative indices	229
Sub-aggregate indices	229
Press release, bulletin and methodological statement	230
International standards concerning the dissemination of consumer price indices	231
Timing of dissemination of the consumer price index	231
Timeliness of release versus data accuracy	231
Access to data	232
Confidentiality	232
Electronic dissemination	232
User consultation	232
Different uses of consumer price indices	232
Presentation of methodology	233
Role of advisory committees	233
Explaining index quality	233
<b>14 The system of price statistics</b>	235
Introduction	235
National accounts as a framework for the system of price statistics	236
Aggregate supply and use of goods and services	236
Institutional units and establishments	237
Accounts of institutional units	238
The consumer price index among major price indices	252
Scope of the expenditure aggregates of the consumer price index	252
The consumer price index as a measure of inflation in market transactions	255
Treatment of cross-border shopping in the consumer price index	255
Other price indicators in the national accounts	255
Price indices for total supply	255
Price indices for intermediate consumption	256
Price indices for final uses	256
Price indices for gross domestic product	256
Price indices for labour services	257
Framework for a system of price statistics for goods and services	257
International comparisons of expenditure on goods and services	261
<b>15 Basic index number theory</b>	263
Introduction	263
The decomposition of value aggregates into price and quantity components	264
The decomposition of value aggregates and the product test	264
The Laspeyres and Paasche indices	265
Symmetric averages of fixed basket price indices	266
The Fisher index as an average of the Paasche and Laspeyres indices	266
The Walsh index and the theory of the "pure" price index	268
Annual weights and monthly price indices	270
The Lowe index with monthly prices and annual base year quantities	270
The Lowe index and mid-year indices	274
The Young index	275
The Divisia index and discrete approximations to it	278
The Divisia price and quantity indices	278
Discrete approximations to the continuous time Divisia index	279
Fixed base versus chain indices	280
Appendix 15.1 The relationship between the Paasche and Laspeyres indices	285
Appendix 15.2 The relationship between the Lowe and Laspeyres indices	285
Appendix 15.3 The relationship between the Young index and its time antithesis	286
Appendix 15.4 The relationship between the Divisia and economic approaches	287

<b>16 The axiomatic and stochastic approaches to index number theory</b>	289
Introduction	289
The levels approach to index number theory	291
An axiomatic approach to unilateral price indices	291
A second axiomatic approach to unilateral price indices	292
The first axiomatic approach to bilateral price indices	292
Bilateral indices and some early tests	292
Homogeneity tests	293
Invariance and symmetry tests	294
Mean value tests	295
Monotonicity tests	296
The Fisher ideal index and the test approach	296
The test performance of other indices	297
The additivity test	297
The stochastic approach to price indices	299
The early unweighted stochastic approach	299
The weighted stochastic approach	301
The second axiomatic approach to bilateral price indices	304
The basic framework and some preliminary tests	304
Homogeneity tests	305
Invariance and symmetry tests	306
A mean value test	306
Monotonicity tests	306
Weighting tests	307
The Törnqvist–Theil price index and the second test approach to bilateral indices	307
The test properties of the Lowe and Young indices	309
Appendix 16.1 Proof of the optimality of the Törnqvist–Theil price index in the second bilateral test approach	311
<b>17 The economic approach to index number theory: The single-household case</b>	313
Introduction	313
The Konüs cost of living index and observable bounds	314
The true cost of living index when preferences are homothetic	316
Superlative indices: The Fisher ideal index	318
Quadratic mean of order $r$ superlative indices	320
Superlative indices: the Törnqvist index	322
The approximation properties of superlative indices	324
Superlative indices and two-stage aggregation	325
The Lloyd–Moulton index number formula	327
Annual preferences and monthly prices	328
The Lowe index as an approximation to a true cost of living index	329
A first-order approximation to the bias of the Lowe index	330
A second-order approximation to the substitution bias of the Lowe index	330
The problem of seasonal commodities	332
The problem of a zero price increasing to a positive price	334
<b>18 The economic approach to index number theory: The many-household case</b>	337
Introduction	337
Plutocratic cost of living indices and observable bounds	337
The Fisher plutocratic price index	339
Democratic versus plutocratic cost of living indices	341
<b>19 Price indices using an artificial data set</b>	345
Introduction	345
The artificial data set	345
Early price indices: The Carli, Jevons, Laspeyres and Paasche indices	346
Asymmetrically weighted price indices	346
Symmetrically weighted indices: Superlative and other indices	348
Superlative indices constructed in two stages of aggregation	349
Lloyd–Moulton price indices	349
Additive percentage change decompositions for the Fisher ideal index	351
The Lowe and Young indices	352
Mid-year indices based on the Lowe formula	353
Young-type indices	353

<b>20 Elementary indices</b>	355
Introduction	355
Ideal elementary indices	355
Aggregation and classification problems for elementary aggregates	358
Elementary indices used in practice	360
Numerical relationships between the frequently used elementary indices	361
The axiomatic approach to elementary indices	363
The economic approach to elementary indices	364
The sampling approach to elementary indices	366
The use of scanner data in constructing elementary aggregates	367
A simple stochastic approach to elementary indices	369
Conclusion	370
<b>21 Quality change and hedonics</b>	373
Introduction	373
New and disappearing items	373
Hedonic prices and implicit markets	374
Items as tied bundles of characteristics	374
The consumer or demand side	375
The producer or supply side	376
Equilibrium	377
What hedonic prices mean	377
An alternative, consumer-based hedonic theoretical formulation	379
Hedonic indices	381
Theoretical characteristics price indices	381
Hedonic regressions and dummy variables of time	382
Hedonic imputation indices	382
Superlative and exact hedonic indices	383
Unweighted hedonic indices and unweighted matched index number formulae	385
New goods and services	385
Appendix 21.1 Some econometric issues	388
<b>22 The treatment of seasonal products</b>	393
Introduction	393
A seasonal commodity data set	394
Year-over-year monthly indices	396
Year-over-year annual indices	400
Rolling year annual indices	402
Predicting a rolling year index using a current period year-over-year monthly index	405
Maximum overlap month-to-month price indices	407
Annual basket indices with carry forward of unavailable prices	411
Annual basket indices with imputation of unavailable prices	412
Bean and Stine Type C or Rothwell indices	413
Forecasting rolling year indices using month-to-month annual basket indices	414
Conclusion	416
<b>23 Durables and user costs</b>	419
Introduction	419
The acquisitions approach	420
The rental equivalence approach	421
The user cost approach	422
The relationship between user costs and acquisition costs	424
Alternative models of depreciation	426
A general model of depreciation for (unchanging) consumer durables	426
Geometric or declining balance depreciation	427
Straight line depreciation	428
"One hoss shay" or light bulb depreciation	428
Unique durable goods and the user cost approach	429
The user cost of owner-occupied housing	430
The treatment of costs that are tied to owner-occupied housing	433
The treatment of mortgage interest costs	433
The treatment of property taxes	434
The treatment of property insurance	434

The treatment of maintenance and renovation expenditures .....	435
The treatment of the transactions costs of home purchase .....	437
User costs for landlords versus owners .....	437
Damage costs .....	437
Non-payment of rent and vacancy costs .....	437
Billing and maintenance costs .....	437
The opportunity cost of capital .....	437
The supply of additional services for rented properties .....	438
The payments approach .....	438
Alternative approaches for pricing owner-occupied housing .....	439
The acquisitions approach .....	439
The rental equivalence approach .....	439
The user cost approach .....	440
 <b>A glossary of main terms</b> .....	 443
Appendix to the glossary. Some basic number formulae and terminology .....	450
 <b>Annex 1 Harmonized Indices of Consumer Prices (European Union)</b> .....	 453
 <b>Annex 2 Classification of Individual Consumption according to Purpose (COICOP)-Extract</b> .....	 465
 <b>Annex 3 Resolution concerning consumer price indices adopted by the Seventeenth International Conference of Labour Statisticians, 2003</b> .....	 483
 <b>Annex 4 Spatial comparisons of consumer prices, purchasing power parities and the International Comparison Program</b> .....	 495
 <b>Bibliography</b> .....	 507
 <b>Index</b> .....	 521
