Contents

<i>List of figures and tables</i>	vii
<i>Acknowledgments</i>	viii
1 Forecasting for sustainability	1
Projecting the shadow of humanity on the environment of the Earth	5
The why and how of forecasting alternative futures	7
Is there a tradeoff between economy and the environment?	10
Economic development paths and their ecological impacts	12
Our project: Forecasting Kentucky's environmental futures	15
2 Process overview and rationale	17
The policy context: Opportunities and constraints	19
Task definition: Opportunities and constraints	20
Identifying key areas of concern	24
Data scanning	27
Project modeling elements	29
Establishing the economy-environment links	31
Identifying possible alternative development paths	32
3 Scanning context and setting priorities	35
Kentucky — a brief socioeconomic sketch	36
The state of the environment in Kentucky	38
The policy context	40
Setting priorities: The initial issue scanning survey	46
Summary	52

4 Social research for forecasting: Nominal group techniques in scenario building	53
Scenario forecasting	55
The nominal group technique	59
Identification of significant environmental issues	64
Choosing impact priority from significant issues	69
Developing scenarios: Social, economic and environmental narratives	73
Summary of findings	77
5 Environmental impact modeling from scenario projections	79
Forecasting economic conditions and activities	80
The Kentucky regions analyzed — definitions and utility	85
Baseline and restructured projections: Imagining a different mix of economic activities	87
POLESTAR scenarios: Technology, policy and behavior change and the environment	91
6 Comparing the effects of economic activity, technologies and practices on environmental impacts	99
The baseline economy projection: Can past trends continue?	100
Adjusting for probable and possible change	106
The environmental consequences of economic restructuring	109
The range of change: Baseline status quo vs. restructured combined change	114
Implications for current policy: Sources of challenge, sources of hope	117
Conclusions	122
7 Forecasting for sustainability conclusions, findings and potential	125
Forecasting for sustainability	126
Forecasting Kentucky's environmental futures: A summary	128
Environmental research for the policy process: Context and credibility	130
Issues in measurement and valuation	137
Prospects: The potential contribution of environmental forecasts	142
<i>Bibliography</i>	<i>144</i>
<i>Appendix One: Current trends in Kentucky</i>	<i>151</i>
<i>List of acronyms</i>	<i>161</i>
