The Economics of Keynes in Historical Context

An Intellectual History of the *General Theory*

Michael S. Lawlor
Wake Forest University, USA

palgrave
macmillan

Contents

<i>List of Figures</i>	xii
<i>Acknowledgments</i>	xiii
<i>Preface</i>	xv
Introductory Material: Motivation, Methodology and Overview	1
Chapter 1 Motivation: Approaching the <i>General Theory</i> Historically	3
I. A “history” of a book	3
II. Keynes’s question	4
III. The Keynes literature	7
Chapter 2 Methodological Stance: The Marshallian Structure of the <i>General Theory</i>	16
I. The Marshallian method	16
II. Keynes’s treatment of time	18
III. Keynes’s use of equilibrium	22
Chapter 3 Overview	25
Part I Keynes, Cambridge and the Economics of Employment	33
Chapter 4 Introduction: Keynes, the <i>General Theory</i> and the Labor Market	35
I. Unemployment and the <i>General Theory</i>	35
II. Labor markets in the <i>General Theory</i>	36
Chapter 5 The “Late Victorian” Intellectual Context of Marshall’s Labor Market Views	40
I. Unemployment to the Victorians: The Background to Marshallianism	40
II. Marshall and the late Victorian labor question	44

Chapter 6	The Treatment of Labor Markets in Marshallian Economics	53
I.	Marshall's method and his treatment of distribution in the <i>Principles of Economics</i>	53
II.	Marshall's marginal product of labor, efficiency wages and the national dividend	56
III.	Dobb: Labor market orthodoxy in interwar Cambridge	63
IV.	Pigou: Mechanical Marshallianism	66
Chapter 7	Keynes and the Labor Market	71
I.	Keynes as a Marshallian	71
II.	Keynes as a young don	75
III.	Keynes in the twenties: An emerging social theory of wages	79
IV.	Conclusion: The labor market in the <i>General Theory</i> in Historical Context	86
Part II	A Philosopher and a Speculator	93
Chapter 8	Looking Backward from the <i>General Theory</i>: On the Historical Origins of Keynes's Financial Market Views	95
I.	Introduction to Part II	95
II.	Two problems of later Marshallian economics: "The Representative Firm" and the joint-stock company	96
III.	Looking backward from the <i>General Theory</i>	103
Chapter 9	Stock Equilibrium in Asset Markets and "The Folly of Amateur Speculators": The Marshallian Setting	107
I.	Introduction	107
II.	Marshall's 1871 essay "Money"	108
III.	Marshall on speculation	111
IV.	H. C. Emery: <i>Speculation on the Stock and Produce Exchanges of the United States</i>	116

V. The historical record and Keynes's developing views of speculation	123
Chapter 10 The Evolution of Keynes's Views on Asset Markets and Speculation	126
I. The young don as philosopher of speculation, 1909–14	126
II. The philosopher starts speculating, 1919–23	132
III. Speculation and the credit cycle, 1923–30	139
IV. Conclusion: "Faithful" investing and speculative economics, 1931–36	147
Part III "Shifting Equilibria" in a Monetary Economy	153
Chapter 11 The Development of Cambridge Monetary Thought 1870–1935	155
I. Introduction	155
II. Early twentieth century monetary and business cycle theory	158
III. Specific Marshallian monetary antecedents	160
IV. Marshallian monetary and cycle theory as a precursor to the <i>General Theory</i>	165
V. Marshall's pupils	168
VI. Keynes and Marshallian monetary economics	176
Chapter 12 Keynes's Development as a Cambridge Monetary Theorist	178
I. Introduction	178
II. The historical context for Keynes as a monetary economist	179
III. Pre-war lectures: "The Theory of Money"	181
IV. Debates with Dennis Robertson and "Forced savings"	183
V. The <i>Tract</i> : Portrait of a monetary society in crisis	188
VI. "A Piece of Financial Machinery"	195

VII. From the <i>Tract</i> to the <i>Treatise</i>	201
VIII. <i>A Treatise on Money</i>	203
Chapter 13 Sraffa and Hayek on "Own Rates of Interest"	213
I. Introduction	213
II. Setting the stage	215
III. "Assuming Away the Object"	218
IV. "Incantations and a Little Poison"	221
V. "Essential Confusion"	224
VI. Curtain Call: The method of neutral money once again	227
VII. The goals of monetary theory	229
Chapter 14 Keynes: "The Essential Properties of Interest and Money"	237
I. Introduction	237
II. From Sraffa to Keynes: The state of monetary theory, 1935	240
III. Keynes: The theory of interest and the theory of employment	243
IV. The essential properties of interest: Own-rates in a monetary economy	244
V. The Structure of own-rates in asset market equilibrium	249
VI. Stocks of assets and flows of activity: The <i>General Theory</i> viewed through the own-rates equilibrium construct	259
VII. Keynes's views of capital	264
VIII. The essential properties of money	268
IX. Money, prices and conventions: The social context for monetary analysis	272
X. The "Keynes Connection" versus the "Wicksell Connection"	275
XI. Conclusion	278

Conclusion: A Theory of a Monetary Economy	281
Chapter 15 "Natural Rate" Mutations: Keynes, Leijonhufvud and the Wicksell Connection	283
I. Introduction	283
II. "The Wicksell Connection"	284
III. Leijonhufvud and Keynes on liquidity preference	285
IV. Chapter 17: Stock equilibrium and "own-rates" of interest	288
V. Liquidity preference, saving, and investment	292
VI. Conclusion: Wicksell revisited	298
