Preface	15
Introduction	16
 <i>1. Chapter: The institutional setting of currency boards</i>	 19
§ 1: The main features of currency boards	19
I. Orthodox currency board	19
II. The Estonian and Lithuanian currency boards	21
1. Fixed exchange rates	22
2. Full convertibility	24
3. Coverage of the monetary base with gold and foreign assets	25
§ 2: The significance of the institutional setting for the credibility of monetary arrangements in transition countries	33
I. Theoretical considerations: "The rules versus discretion"	35
1. Classification of monetary rules	35
2. The currency board as a rule-based system	36
3. The traditional debate about rules versus discretion	37
4. The new debate about rules versus discretion	40
II. Empirical evidence for the credibility effects of currency boards in Estonia and Lithuania	42
1. Overall economic situation	45
2. Monetary indicators	48
3. Real indicators	52
§ 3: Conclusion	54
§ 4: Appendix Chapter 1: Classification system of the EBRD	56

<i>2. Chapter: Adjustment processes under currency boards</i>	58
§ 1: Adjustment and money supply processes in the short-term	58
I. Balance of payments, foreign reserves and the monetary base	59
1. Theoretical considerations	59
2. Empirical evidence	63
II. Model: Money supply process under currency board systems	66
1. The money market for high powered money	67
2. The macroeconomic market for credit and money	70
3. The complete model	73
4. The money supply process under shocks	76
5. Empirical evidence	80
§ 2: Adjustment processes in the medium-term under the gold standard and the currency board	86
I. Theoretical considerations	87
1. The institutional setting of the gold standard and the currency board	87
2. The price-specie-flow-mechanism	88
3. Additional adjustment mechanisms: Capital movements	90
II. Empirical evidence for the gold standard and the currency board	91
1. Rules of the game	91
2. Adjustment through the price-specie-flow-mechanism	92
3. Adjustment through capital movements	94
§ 3: The adjustment processes in the long-term: the purchasing power parity theory	98
I. Theoretical considerations	99
II. Empirical evidence	101
§ 4: Conclusion	105
<i>3. Chapter: Scope for monetary policy under currency boards</i>	107
§ 1: Scope for monetary policy under the Estonian currency board	107
I. Reserve requirements	110
1. Functions of reserve requirements	111
2. Rules for the calculation of the reserve requirements	114
3. Rules for the calculation of the required actual level	118
4. Reserve requirements as a liquidity support for banks	122
5. Exceptional treatment of various banks	123
6. Deposit facility: Remuneration of reserve requirements	126
II. Short-term certificates of deposit	127
III. Emergency credits	129
IV. Standing facility	130
V. Money markets	131

§ 2: Scope for monetary policy under the Lithuanian currency board	137
I. Monetary policy instruments before the Monetary Policy Programme (1994-97)	138
1. Reserve requirements	138
2. Standing facility	143
3. Emergency credits	143
4. Excursion: Government security auction	144
II. The Monetary Policy Programme and the Guidelines for Monetary Policy	149
1. Overnight lombard facilities	152
2. Liquidity loans	152
3. Open market operations: Repurchase agreements for government securities	153
4. Open market operations: Time deposit auctions	155
III. Money markets	157
§ 3: Outlook: Participation in the EMU	160
I. Choice of the exchange rate regime before the introduction of the euro	160
II. Criteria for participation in the EMU	161
III. Reform of the operational frameworks	163
§ 4: Conclusion	164
 <i>4. Chapter: Drawbacks of currency boards</i>	 167
§ 1: Competitiveness: Current account deficits and real appreciation	167
I. Current account development	168
II. Indicators of competitiveness	171
1. Real exchange rates based on consumer price indices	172
2. Real effective exchange rates	176
3. Wages	177
4. Productivity	180
5. Unit labour costs in the manufacturing sector	180
6. Export performance	182
III. Conclusion	185
§ 2: Capital account liberalisation	185
I. Volume and composition of capital flows to transition countries	186
II. Degree of capital account liberalisation in transition countries	189
III. Benefits of capital account liberalisation in transition countries	190
1. Overall benefits of capital flows: Model	190
2. Benefits of long-term capital flows	193
3. Benefits of short-term capital flows	195

IV. Costs of capital account liberalisation for transition countries	195
1. Overall costs	195
2. Costs of short-term capital flows: Currency crises	200
V. Conclusion	206
§ 3: Lender of last resort and banking crisis	206
I. Lender of last resort	207
1. Theoretical considerations	207
2. Empirical evidence	210
II. Banking crisis in all of the Baltic states	216
1. Causes of the banking crises	216
2. Consequences of the banking crises	226
III. Conclusion	230
§ 4: Appendix Chapter 4: Development of and policy responses to the banking crises	232
5. Chapter: Conclusion	236
