DESIGNING THE USER INTERFACE

STRATEGIES FOR EFFECTIVE
HUMAN-COMPUTER INTERACTION
Contents

Preface 7
About the Authors 13

PART 1  INTRODUCTION 22

CHAPTER 1  Usability of Interactive Systems 24
1.1 Introduction 26
1.2 Usability Goals and Measures 33
1.3 Usability Motivations 35
1.4 Goals for Our Profession 40

CHAPTER 2  Universal Usability 56
2.1 Introduction 58
2.2 Variations in Physical Abilities and Physical Workplaces 59
2.3 Diverse Cognitive and Perceptual Abilities 61
2.4 Personality Differences 62
2.5 Cultural and International Diversity 63
2.6 Users with Disabilities 66
2.7 Older Adult Users 69
2.8 Children 71
2.9 Accommodating Hardware and Software Diversity 74

CHAPTER 3  Guidelines, Principles, and Theories 80
3.1 Introduction 82
3.2 Guidelines 82
3.3 Principles 88
3.4 Theories 104

PART 2  DESIGN PROCESSES 122

CHAPTER 4  Design 124
4.1 Introduction 126
4.2 Organizational Support for Design 128
Contents

4.3 The Design Process 131
4.4 Design Frameworks 137
4.5 Design Methods 141
4.6 Design Tools, Practices, and Patterns 149
4.7 Social Impact Analysis 155
4.8 Legal Issues 157

CHAPTER 5 Evaluation and the User Experience 166
5.1 Introduction 168
5.2 Expert Reviews and Heuristics 171
5.3 Usability Testing and Laboratories 175
5.4 Survey Instruments 187
5.5 Acceptance Tests 192
5.6 Evaluation during Active Use and Beyond 193
5.7 Controlled Psychologically Oriented Experiments 199

CHAPTER 6 Design Case Studies 210
6.1 Introduction 212
6.2 Case Study 1: Iterative Design Evaluation of Automated Teller Machines (ATMs) 213
6.3 Case Study 2: Design Consistency at Apple Computer 216
6.4 Case Study 3: Data-Driven Design at Volvo 218
6.5 General Observations and Summary 221

CHAPTER 7 Direct Manipulation and Immersive Environments 228
7.1 Introduction 230
7.2 What Is Direct Manipulation? 231
7.3 Some Examples of Direct Manipulation 238
7.4 2-D and 3-D Interfaces 248
7.5 Teleoperation and Presence 251
7.6 Augmented and Virtual Reality 256

CHAPTER 8 Fluid Navigation 270
8.1 Introduction 272
8.2 Navigation by Selection 274
8.3 Small Displays 287
8.4 Content Organization 290
8.5 Audio Menus 295
8.6 Form Fill-in and Dialog Boxes 296
CHAPTER 9 Expressive Human and Command Languages 310
9.1 Introduction 312
9.2 Speech Recognition 313
9.3 Speech Production 324
9.4 Human Language Technology 325
9.5 Traditional Command Languages 329

CHAPTER 10 Devices 336
10.1 Introduction 338
10.2 Keyboards and Keypads 340
10.3 Pointing Devices 346
10.4 Displays 364

CHAPTER 11 Communication and Collaboration 384
11.1 Introduction 386
11.2 Models of Collaboration 390
11.3 Specific Goals and Contexts 396
11.4 Design Considerations 404

PART 4 DESIGN ISSUES 422

CHAPTER 12 Advancing the User Experience 424
12.1 Introduction 426
12.2 Display Design 427
12.3 View (Window) Management 433
12.4 Animation 439
12.5 Webpage Design 441
12.6 Color 444
12.7 Nonanthropomorphic Design 450
12.8 Error Messages 454

CHAPTER 13 The Timely User Experience 464
13.1 Introduction 466
13.2 Models of System Response Time (SRT) Impacts 468
13.3 Expectations and Attitudes 472
13.4 User Productivity and Variability in SRT 474
13.5 Frustrating Experiences 476

CHAPTER 14 Documentation and User Support (a.k.a. Help) 484
14.1 Introduction 486
14.2 Shaping the Content of the Documentation 487
14.3 Accessing the Documentation 493
