Preface				
Part	I. T co de sy	he circumstances in which the onceptual problems are posed: legislators eliberating upon how well ah economic ystem is working.		
1	Thr	ee main concepts that inhere in the		
	circu	umstances cited	3	
	1.1	The three concepts introduced	3	
	1.2	Rudimentary illustrations	7	
	1.3	Further illustrations marking the		
		distinctions to be drawn	11	
	1.4	The physical reality in which		
		performance is manifested	13	
	1.5	The notion of a norm against which the		
		actuality is compared	17	
	1.6	The probabilistic character of the	10	
		concepts introduced	18	
	1.7	A juxtaposition: corresponding concepts	•	
	1.0	in the theory of probability	23	
	1.8	The person whose descriptive problems	2.5	
		are the subject of our inquiry	26	
2	On	the peculiarities of economics as a		
	descriptive science •			
	2.1	What free means, as in free society, and		
		the descriptive problems entailed	34	
	2.2	A preliminary exhibit of the		
		circumstances in which the descriptive		
		tasks are posed	40	
	2.3	A fundamental distinction illustrated:		
		what the physical reality is of which price,		
		stability is a statistical property	46	

#### Contents

	2.4 2.5	What, that working mechanism is for which <i>economic system</i> is the name The meaning of <i>statistical</i> , as in <i>statistical</i> <i>economics:</i> illustrations from a peripheral, literature	49 54
2	0	An Appendix to Section 2.5	39
3	on adve	erse reactions to an economic system's	
	perf	formance	66
	3.1	The sense in which a norm is said to	
		exist	66
	3.2	Two categories of norm as reality	67
	3.3	Avoiding the fallacy of "scientism"	69
	3.4	The reality of <i>health</i> contrasted with that	
	2.5	of <i>fairness</i> — or of <i>fullness</i> of employment	74
	3.5	Fair game theory as simple prototype of	77
	26	A case of a distinguished prestitioner in	//
	5.0	the act of practicing Smith's science of	
		the legislator	81
	3.7	A second case of the practice of this	01
		advisory science	86
	3.8	Two exhibits of the practice of the	
		profession -	90
Part	п	A nation's economy in geographic space	
1 ai i	11	and time: on the task of specifying norms	
		of various aspects of it	
1	On	constructing a small scale model of a	
4	nati	on's population of people	111
	4.1	An introductory statement of the	111
		descriptive task undertaken	111
	4.2	Steps in the first stage of a doing of this	
		task	115
	4.3	A city viewed as a detail in a population	
		density configuration	115
	4.4	The density configuration of which a	
	4 -	city is a detail	119
	4.5	I he development over time of this	100
		An Appendix to Section 4.5	122
		All Appendix to section 4.5	120

5	A p pop state	rovisional description of a nation's ulation developing over time while in a of full employment The unemployment rate as a measure of	136
	5.1	a physical property of a spatially . dispersed population The variation of this physical property	' 136
	5.2	over geographic space	138
	5.3	The variation of this property over geographic space and time	144
	5.4	A description of this variation over a time of full employment	148
	5.5	Toward a theory of the outcome of an economic system's working	161
6	Concluding remarks upon what an economic		
	norms of the outcome of its workings		170
	6.1	What an economic system is '	170
