

# **OECD Guidelines towards Environmentally Sustainable Transport**

**OECD **

ORGANISATION FOR ECONOMIC CO-OPERATION AND DEVELOPMENT

# Table of Contents

|  |    |
|--|----|
| <b>Executive Summary</b>   | 9  |
| <b>The EST Concept and Approach</b>  | 11 |
| 1. A New Policy Approach is Required   | 11 |
| 2. The OECD's EST Project  | 13 |
| 2.1. Purposes and overview of the EST project  | 13 |
| 2.2. Characterising Environmentally Sustainable Transport                                  | 15 |
| 2.3. Visions of transport in 2030.>s.  | 18 |
| 2.4. Policy instruments and strategies to achieve EST                                      | 24 |
| 2.5. The economic and social implications of BAU and EST                                   | 26 |
| 3. Conclusions from the EST Project  | 28 |
| Notes  | 30 |
| <b>Guidelines for Moving towards Environmentally Sustainable Transport</b>                 | 31 |
| 1. Scope and Purpose   | 31 |
| 2. Transport Challenges Sustainability: OECD Takes Action                                  | 31 |
| 3. Towards a New Transport Vision: EST!  | 33 |
| 4. Towards Sustainable Transport: the EST Guidelines                                       | 35 |
| References   | 37 |
| <b>Annexes I-IV</b>  | 39 |
| Annex 1. Key Signs of Unsustainable Transport Trends                                       | 40 |
| Annex II. Definition of Environmentally Sustainable Transport                              | 42 |
| Annex III. Health and Environmental Criteria for EST                                       | 43 |
| Annex IV. The EST Guidelines Checklist   | 46 |
| <b>Box</b>   |    |
| The EST Guidelines   | 35 |
| <b>Table</b>   |    |
| Long-term and Health Quality Objectives, Criteria and Derived Targets for EST              | 45 |
| <b>Figures</b>   |    |
| 1. Comparison of the EST approach and the conventional approach to transport policy-making | 12 |
| 2. Bridging the Policy Gap   | 13 |
| 3. Map of EST study areas  | 14 |
| 4. Definition of the three EST scenarios used in the EST project                           | 15 |

|  |    |
|--|----|
| 5. Exceedences of critical loads for sensitive ecosystems: assessment of ground-level ozone for ecosystems and human health, Europe, 1995 and 2010 ... | 17 |
| 6. Exceedences of critical loads for sensitive ecosystems: assessment of degrees of acidification and eutrophication, Europe, 1995 and 2010            | 17 |
| 7. Operationalising EST criteria   | 18 |
| 8. Quantification of EST criteria  | 19 |
| 9. "Business-as-usual" projections (BAU) of transport emissions in the six EST project study areas   | 20 |
| 10. Passenger transport activity by mode in 2030 for the EST3 scenarios, as compared with expected trends (BAU scenarios)                              | 20 |
| 11. Freight transport activity by mode in 2030 for the EST3 scenarios, as compared with expected trends (BAU scenarios)                                | 21 |
| 12. Overall comparisons of 1990 activity and that projected for the BAU and EST3 scenarios   | 22 |
| 13. Contributions of technological improvements and other measures to the construction of the EST3 scenarios   | 23 |
| 14. Broad characterisations of the instrument packages for attainment of EST developed by each of the EST project teams                                | 25 |
| 15. Estimated overall external costs of transport, based on the scenarios of the nine EST case studies   | 27 |
