Preface	13
----------------------	----

Part 1

Methodological Questions, Conceptual Debates and Frameworks

Conflict-resolution in the Context of Sustainable Development

Naturalistic versus Culturalistic Approaches	19
--	----

Armin Grunwald

1 Introduction	19
2 Sustainability as a Conflict-generating Vision	20
3 Approaches to Conflict Resolution	25
3.1 Naturalistic Approach	25
3.2 Culturalistic Approach	27
4 Conclusions	28

Culture and Culturality

Approaching a Multi-faceted Concept	33
---	----

Robert Hauser, Gerhard Banse

1 Concepts of Culture – The Plurality of the Concept of Culture	33
2 History – The Genesis of the Concept of Culture	34
3 Concepts of Culture – Cultural Concepts in Current Research Practice	37
4 Concepts of Culture at the Macro- and Microlevels	39
5 An Evolutionist Concept of Culture	41
6 The Difference-based Concept of Culture by Hansen	42
7 Areas of Standardization	45
8 Culture and Sustainability	46

Habitats – Habits – Inhabitants

A Biocultural Triad to Promote Sustainable Cultures	53
<i>Ricardo Rozzi, Alexandria Poole</i>	
1 Introduction	53
2 Biocultural Diversity: Interrelations of Human Languages, Cultures, and Regional Ecosystems	54
2.1 Humans as Components of Ecosystems and Biodiversity: Cultural Landscapes	55
2.2 Humans' Biocultural Lenses	58
3 Amerindian and Scientific Perspectives of the Inextricable Links of <i>Habitats, Habits, and Inhabitants</i>	58
4 Loss of the Sustainability of Regional Communities by Disrupting Their Habitats and Habits	61
5 Losses of Biocultural Diversity	65
6 Formal Education: A Major Driver of Biocultural Homogenization	67
7 The Inextricable Links of <i>Habitats, Habits, and Inhabitants</i> for Sustainable Cultures	68

Three Steps towards a Culture of Sustainability

Oliver Parodi

1 Start and Finish: Culture and Sustainability	75
1.1 On the Concept of Culture	75
1.2 On the Concept of Sustainability	76
1.3 Culture and Sustainability – Some Links	76
1.4 Culture of Sustainability	77
2 Readjusting Basic Cultural Attitudes	78
2.1 Prevailing Separation of Culture and Nature	79
2.2 Present Separation of Technology and Nature	79
2.3 Outdated Separation	80
2.4 Correcting Misconceptions	80
3 Cultivation of Technology	82
3.1 From Making Culture Technical to Making Technology Cultural	82
3.2 Functioning Technology	83
3.3 Luhmann's Effective Isolation	84
3.4 Implications of Functioning Cultured Technology	85
4 The Individual Side of Sustainability	86
4.1 Two Faces of a Culture of Sustainability: The Collective and the Individual	86
4.2 The Impact and the Attractiveness of the Idea of Sustainability	87
4.3 Existential Questions and Life Plans	88
4.4 Changing Awareness	89

From the Cultural Dimension of Sustainable Development to the Culture of Sustainable Development 93

Jürgen Kopf Müller

1	Introduction	93
2	“Culture” in the Key Documents of the Sustainability Debate	94
3	Culture in the Concepts of Sustainability	95
4	The Politico-societal Level	99
5	Conclusion and Perspectives	103

Culture and Sustainability in the Web of Everyday Life 107

Karl Heinz Hörning

Part 2

Epistemic Topics, Knowledge and Ethical Dilemmas

Material Goods and Individuation Processes

The Ethics of Consumerism between Mankind’s Potential for Transcendence and the Forces of Culture	121
---	-----

Renate Hübner

1	Introduction and Structure of the Article	121
2	Individuation – Prerequisites and Processes in the Development of Identity	123
2.1	The Right to Free Development of the Personality	123
2.2	Processes of Individuation	126
3	The Dialectics of Objects: The Potential for Identification and Self-expression	131
3.1	Producing Things – Individuation through Production	131
3.2	Using Objects – Individuation through Usage	133
3.3	Acquiring Things – Individualization through Retail Activity	134
3.4	Having things – Individuation through Ownership	135
4	Summary: Sustainable Consumption between <i>Buying, Having, and Using</i>	137
4.1	Buying and Throwing away – the Logic of Industrial Mass Production	137
4.2	Meaning – Coming and Going: The Problem of Sustainable Use of Goods	138

On the Way to a Culture of Sustainable Decisions 143

Larissa Krainer

1	The Concept of Culture Caught in a Web of Contradictions	143
2	The Concept of Culture in the Context of the Sustainability Debate	145

3	Culture in a Conflict among Scientific Disciplines	146
4	Comments on Culture as an Integral Part of Human Existence	148
5	About the Connection between Culture and Reflection	151
6	On the Way to Sustainable Decisions	152
7	A Sustainable Culture is a Deliberate Decision-making Culture	155

On Substantiating the Conception of Strong Sustainability 159

Konrad Ott

1	Historic Review	159
2	Observation and Participation: A Methodical Remark	161
3	Contributions of the Environmental Advisory Council (SRU) to the German Sustainability Debate	161
4	Problems of Justification	162
5	Arguments in Favour of “Strong” Sustainability	164
6	On How to Conclude	171
7	Result and Consequences	172

Cultural Heritage: Dilemmas of Preservation in the Midst of Change 175

Caroline Y. Robertson-von Trotha

1	Status Quo	175
1.1	UNESCO Conventions and Programmes Pertaining to Culture	175
1.2	Sensitization and Education Programme	177
2	Dilemmas of Preservation in the Midst of Change	178
2.1	The Internationalization of Memory	179
2.2	New Media and Memory	181
2.3	Heritage Industry: Cultural Tourism versus Ecological Sustainability	181
2.4	Local Interests versus World Cultural Heritage	183
2.5	Private versus Public Interests	184
3	The Outlook, and a Selection of Possible Questions	185

Education and Communication as Prerequisites for and Components of Sustainable Development

Reflections for Policies, Conceptual Work, and Theory, Based on Previous Practises 187

Ute Stoltenberg, Verena Holz

1	Social Perception and Reception of the Programme of Education for Sustainable Development	187
---	---	-----

2	The Institutional Establishment of Education for Sustainable Development in Educational Domains	190
3	Current Challenges and Stimuli for Further Work on Education for Sustainable Development	191
3.1	Common Knowledge and Education for Sustainable Development	191
3.2	Value Orientation as a Foundation	193
3.3	Dealing with Complexity and Openness	196
4	Concluding Remarks	198

Sustainability, Uncertainty, and Environmental Ethics 201

Teresa Kwiatkowska, Wojciech Szatzschneider

1	Remarks about Sustainability	201
2	Private Morality and Public Policy	203
3	What Uncertainty Are We Talking About?	205
4	A Step towards Realistic Answer	207

Science, Responsibility and Global Sustainability:

Steps toward a New Ethical Paradigm? 213

Ignacio Ayestaran

1	Introduction: The Catastrophic Convergence and the Tropic of Chaos	213
2	Symptoms and Indicators of Global Change	214
3	Two Different Earth Ethics: the Heidegger-Lévinas Clash	216
4	Science, Responsibility, and Global Sustainability	219
5	Mondialization, Globalization and Universalisation	221
6	The Principle of Responsibility and the Culture of Sustainability	222
