On the Use of Credit Rating Migration Matrices	1
<i>Janez Barle, Anton Zunic</i>	
1 Introduction	1
2 Credit rating migration matrices	2
3 Some applications of credit rating migration matrices	5
4 Conclusions	11
References	12
Do Stock Market Anomalies Disappear? The Example of Small Size and Market-to-Book Premia at the London Stock Exchange	13
<i>Leonardo Becchetti, Laura Cavallo</i>	
1 Introduction	13
2 Descriptive evidence	15
3 Testing the stability of risk adjusted premia	16
4 Empirical findings	18
5 Conclusions	19
References	27
Testing Independence: A New Approach	31
<i>Jorge Belaire, Dulce Contreras</i>	
1 Introduction	31
2 Independence tests (I) and (II)	32
3 Properties	35
4 Chaotic variance models	51
5 Empirical application	52
6 Concluding comments	54
References	55
Forecasting Exchange Rates Volatilities Using Artificial Neural Networks	57
<i>Maria Bonilla, Paulina Marco, Ignacio Olneda</i>	
1 Introduction	57
2 A short introduction to artificial neural networks	57
3 Parametric models of volatility	59
4 Conclusions	66
References	67

An Application of Hybrid Models in Credit Scoring	69
<i>Maria Bonilla, Ignacio Olmeda, Rosa Puertas</i>	
1 Introduction	69
2 Parametric vs. nonparametric models	70
3 Database and results	73
4 Conclusions	76
References	76
Portfolio Selection Via Goal Programming	79
<i>Rafael Caballero, Jose Manuel Cabello, Analia Cano, Francisco Ruiz</i>	
1 Introduction	79
2 Program	80
3 Simulations	87
4 Conclusions	91
References	91
ARCH Factor: A New Methodology to Estimate Value at Risk 93	
<i>J. David Cabedo, Ismael Moya</i>	
1 Introduction	93
2 Value at Risk calculation	94
3 ARCH factor methodology	98
4 VaR evaluation procedure	100
5 ARCH factor methodology and evaluation procedure implementation	101
6 Concluding remarks	107
References	108
A Problem of Optimization in a Case of Foreign Investment . .	111
<i>Trinidad Casaus, Juan Carlos Perez</i>	
1 Introduction	111
2 The model	112
3 Conclusions	116
4 Simulations	117
5 Simulation conclusions	121
6 Appendix	122
References	123
Improving Portfolio Performances Using Options Strategies . .	125
<i>Rosella Castellano, Rosella Giacometti</i>	
1 Introduction	125
2 The general framework	127
3 The data	131
4 Empirical results	133
5 Portfolio performances evaluation	139
6 Concluding remarks	140
References	141

An X-Efficiency Analysis of Different Banking Organizational Types in Europe	143
<i>Laura Cavallo, Stefania P.S. Rossi</i>	
1 Introduction	143
2 Methodological issues	144
3 Data and variables description	145
4 Model specification	147
5 Empirical findings	149
6 Conclusion	154
References	155
Towards a Coherent Volatility Pricing Model: An Empirical Comparison	159
<i>Gianna Figa-Talamanca, Maria Letizia Guerra</i>	
1 Volatility models	159
2 Estimation's methodologies	162
3 Numerical results: a comparison	165
References	169
Direction Indicators in Financial Modelling	171
<i>Ronald L. Giles</i>	
1 Introduction	171
2 Market efficiency and long memory processes	172
3 Formalising technical analysis	173
4 Appropriate technical analysis methods	174
5 Empirical results	176
6 Conclusion	177
References	178
Stock-Split Ex-Dates: Evidence from the Spanish Stock Market	181
<i>J. Carlos Gomez Sala</i>	
1 Introduction	181
2 Sample and data	183
3 The movement in prices around the split ex-date	184
4 The split factor	187
5 The effect of the bid-ask spread on the abnormal returns	193
6 Conclusions	199
References	200
Portfolio Performance Through the Eyes of Monkeys	203
<i>A art Groenendijk, Jaap Spronk</i>	
1 Introduction	203
2 A general framework for performance evaluation	204
3 The set of all possible portfolios	207

4	Illustration: Free monkeys against the Amsterdam exchanges (AEX) index	209
5	Use of the framework for different purposes	210
6	Conclusions	212
	References	212

Approximation Properties of the Neuro-Fuzzy Minimum Function 215

Andreas Gottschling, Christof Kreuter

1	Introduction	215
2	Universal approximation	216
3	Characteristics of the fuzzy minimum system	220
4	A differentiable quasi-minimum function	223
5	Conclusions	227
	References	228

A Stakeholder Approach to the Valuation of Corporate Cash Flows 229

Klaus Hellwig, Gerhard Speckbacher, Paul Wentges

1	Introduction	229
2	The assumption of perfect and complete capital markets	231
3	The assumption of complete contracting	233
4	Maintaining capital intact	235
5	Implementing capital maintenance as a requirement for corporate planning	237
	References	238

Fuzzy Mathematical Programming for Portfolio Management. 241

Teresa Leon, Vicente Liern, Enriqueta Vercher

1	Introduction	241
2	Fuzzy logic and fuzzy mathematical programming	242
3	A fuzzy linear model for portfolio selection	245
4	Infeasible specifications	248
5	Numerical examples	251
6	Conclusions	255
	References	256

Business Investment and Financial Constraints. Evidence of Spanish Case by Using Company Level Panel Data 257

Monica Melle, Juan A. Maroto, Jose L. Raymond

1	Econometric models of business investment	258
2	Estimates with microdata from a sample of Spanish firms	266
3	Implications of the empirical analysis	271
4	Conclusions	274
	References	276

A Portfolio Problem with Uncertainty	279
<i>Manuel Mocholi, Ramon Sala, Vicente Sanchis</i>	
1 Introduction	279
2 The problem of cash flow matching	280
3 Introduction of uncertainty	281
4 Robust models for cash flow matching	284
5 Conclusions	287
References	288
Pricing Seats as Barrier Options. Implications for the Futures Markets	291
<i>Francesco M. Paris</i>	
1 Introduction	291
2 The pricing model	293
3 Locals' characteristics and behaviour	297
4 A simple signalling model	298
5 Viability conditions for the seat's trading	303
6 Conclusions	304
References	305
Volatility Transmission Between Stock Markets	309
<i>Bartolome Pascual</i>	
1 Introduction	309
2 Theoretical fundamentals	312
3 The data	316
4 Empirical analysis	318
5 Conclusions	324
References	325
Incentive Contracts and Performance Measures Based on Accrual Accounting Numbers	329
<i>Thomas Pfeiffer</i>	
1 Introduction	329
2 The model	330
3 Conclusion	334
References	337
A General Approach to Different Concepts of Cost of Capital	339
<i>Axel Pierru, Denis Babusiaux</i>	
1 Introduction	339
2 Preliminary remarks	340
3 Project subject to a different tax rate from the one normally applied to company income	341
4 Revisiting the conventional methods through a new approach	343

5 Consistency with adjusted present value . . .	344
6 Conclusions	350
References	351 •

European Banks and the Creditmetrics Model: Can We Make its Implementation Easier? 353

Andrea Resti

1 Foreword: credit risk, the "good ol' killer" of bank profits in Europe	353
2 New approaches: the mark-to-market methodology and its greed for data	354
3 Can we make Creditmetrics easier?	358
4 Final remarks	372
5 Appendix: data used for the test portfolio in §3.1	374
References	375

Informational and Operational Financial Modelling as Strategic Part of the Corporate Criminal Intelligence Analysis 377

Vladimir Simovic, Zdravko Zrinusip

1 Introduction	377
2 Informational and operational financial modelling as strategic part of the CCIA	379.
3 Conclusion	387
References	389

Immunitization of Portfolios with Liabilities! . . 391

Mariacristina Uberti

1 Introduction	391
2 Notation	392
3 Convex shift assumption	394
4 Non-convex shift assumption	394
5 Results	395
6 Concluding remarks	397
7 Appendix A	397
8 Appendix B	399
References	399

Analysis and Forecasting of Social Security: A Study of Robustness 401

Anders Westlund, Tatiana Ermolieva, Landis MacKellar

1 Introduction	401
2 The model	404
3 Robustness studies: numerical experiments	406
4 Conclusions	418
References	426
