## **Complex Economic Dynamics**

Volume II An Introduction to Macroeconomic Dynamics

Richard H. Day

with contributions by Tzong-Yau Lin, Zhang Min, and Oleg Pavlov

The MIT Press Cambridge, Massachusetts London, England

## Contents

	List of Figures	xi
	Preface to Volume II	XV
	Notations	xvii
IV	BUSINESS CYCLES	1
13	The Real/Monetary Business Cycle Theory	3
13.1	Aggregate Demand and the Adjustment Process	5
13.2	An IY-LM Model	19
13.3	Numerical Experiments	27
13.4	The Static IS-LM Framework	30
13.5	Summary and Conclusions	33
14	Plausible Parameters, Counterfactual Histories, and the	
	Robustness of Chaos	35
14.1	Aggregate Demand and the Adjustment Process	35
14.2	The Quantity Adjustment Process	42
14.3	Plausible Parameters and Counterfactual Histories	45
14.4	The Algebra of Cycles and Chaos	52
14.5	Comparison with the Static IS-LM Framework	60
14.6	Summary and Conclusions	63
15	Comparative Monetary and Fiscal Policy	65
15.1	Model Summary	66
15.2	Government Expenditure	69
15.3	Changes in the Tax Rate	75
15.4	Monetary Policy	77
15.5	Summary and Conclusions	80
V	ECONOMIC GROWTH	83
16	Capital Accumulation, Balanced Growth, and Growth	
	Cycles	85
16.1	Production	86
16.2	Economic Growth with Constant Savings Rates	88
16.3	Variable Savings Rates	94
16.4	Caution and Restrained Growth	99
16.5	Technological Change and Growth Cycles	104

17	Adaptive Economizing: Generic Properties	107
17.1	The Model	' 107
17.2	Qualitative Dynamics	117
17.3	Example	125
17.4	Caution and Technological Change	130
17.5	Summary and Conclusions	131
18	Optimal Growth	133
18.1	The Golden Rule of Accumulation	134
18.2	The Principle of Intertemporal Optimality	139
18.3	Consistently Optimal Dynamic Structures and Strategies	143
18.4	The Dynamics of Intertemporally Consistent Optimal	
	Capital Accumulation '	146
18.5	Rationalizing Capital Accumulation Paths	150
18.6	Summary of Part V	156
VI	ECONOMIC DEVELOPMENT	157
19	Population, Productivity, and Generational Welfare	159
19.1	The Classical Growth Theory	161
19.2	The Classical Model with Welfare Threshold	169
19.3	Qualitative Behavior	173
19.4	An Example	181
19.5	Technological Change	185
19.6	Summary and Conclusions	185
19.7	Technical Discussion	185
20	Household Preferences, Social Infrastructure, and	
	Production Diseconomies	195
20.1	Background	195
20.2	The Adaptive Economizing Demoeconomic Growth Model	198
20.3	The Classical Model with Infrastructure Social Slack and	
	Production Diseconomies	204
20.4	Qualitative Behavior when Infrastructure and Social Slack	
	Matter	209
20.5	Continuous Technological Change	214
20.6	Technical Discussion	216

## Contents

21	Macroeconomic Evolution	221
21.1	Background	221
21.2	Multiple Technologies	225
21.3	The Basic Macroevolutionary Model	230
21.4	Structural Change with Continuous Productivity	
	Improvement	238
21.5	Summary	244
22	A Grand Dynamics of Economic Development	247
22.1	Background	247
22.2	Replication and Merging Processes	253
22.3	A "General" Model of Macroeconomic Evolution	260
22.4	A Mathematical World History	265
22.5	A Numerical Simulation of World Development	271
23	Existence of Evolutionary Scenarios	281
23.1	Epochal Evolutions and Transitional Histories	281
23.2	Scenarios	289
23.3	Appendix: Qualitative Histories	296
24	Generic Behavior in Macroeconomic Development	305
24.1	The Basic Evolutionary Model (BEM)	305
24.2	The Basic Evolutionary Model with Learning by Doing	
	(BEM-LD)	311
24.3	The Replication and Merging Model (RAM)	314
24.4	The Grand Dynamic Evolutionary Model (GEM)	320
24.5	Summary and Conclusions	323
VII	DYNAMICAL ECONOMIC SCIENCE AND POLICY	325
25	Precursors and Ongoing Developments	327
25.1	Nonlinear Dynamics	327
25.2	Complex Economic Dynamics	333
25.3	General References	342
26	Implications for Policy and Economic Science	345
26.1	Implications for Policy	347
26.2	Implications for Science	353
