<i>List of Figures</i>	<i>vii</i>	
<i>List of Tables</i>	<i>xiii</i>	
<i>Preface</i>	<i>xv</i>	
<i>List of Abbreviations</i>	<i>xix</i>	
Chapter 1	The Science and Policy of Sustainability	1
1.1	Background	1
1.2	The Concept of Sustainable Development	2
1.3	The Sustainability of the Transport System	3
1.4	The Sustainability of the Air Transport System	8
	References	16
Chapter 2	Performances of the Air Transport System	19
2.1	The Concept of Performances	19
2.2	Airlines	21
2.3	Airports	50
2.4	Air Traffic Control/Management	75
	References	99
Chapter 3	The Sustainability of the Air Transport System	105
3.1	Background	105
3.2	Physics of Impacts	107
3.3	Evaluation of Impacts	129
3.4	Evaluation of Effects - Benefits	146
3.5	Assessment of Sustainability	156
3.6	Incremental Approach - The Indicator Systems	160
3.7	Perspectives of Sustainability of the Air Transport System	183
	References	195
Chapter 4	Modelling Sustainability of the Air Transport System	201
4.1	Introduction	201
4.2	Performances of an Air Transport Network After Internalising Externalities	202
4.3	Evaluation of Sustainability of the Airline Hub-and-Spoke Networks	219
4.4	Vulnerability of the Airline Hub and Spoke Networks	238
4.5	Flying at the Fuel Non-Optimal Altitudes	255
4.6	Innovative Technologies and Land Use at Airports	266

vi	<i>The Sustainability of Air Transportation</i>	
	4.7 Optimisation of Utilisation of the Airport Capacity	284
	4.8 Demand Management at Airports by Charging for Congestion	297
	4.9 Comparison of the Environmental Performances of High-Speed Systems (HSS)	316
	References	329
Chapter 5	Epilogue	341
	<i>Index</i>	<i>345</i>
