Preface and Acknowledgments	vii
-----------------------------	-----

PART ONE THEORY AND METHOD IN QUALITATIVE RESEARCH

1	Beginning Research	1
	<i>Using theory to generate a research problem; the variety of qualitative methods</i>	
2	The Logic of Qualitative Methodology	20
	<i>'Schools' of social science; what is qualitative research?; some defining characteristics of qualitative research</i>	

PART TWO METHODS

3	Observation	30
	<i>The ethnographic tradition: from observation to gender; organising observational research; styles of theorising in observational work; the unity of the ethnographic project</i>	
4	Texts	59
	<i>Ethnographic analysis; semiotics; membership categorisation: description as a socially organised activity; using MCD analysis</i>	
5	Interview Data	90
	<i>Positivism; interactionism; membership work; moral tales</i>	
6	Transcripts	115
	<i>Language; transcripts; discourse analysis; conversation analysis; institutional talk</i>	

PART THREE IMPLICATIONS

7	Validity and Reliability	144
	<i>Reliability; validity; claims to validity in field research; testing hypotheses; counting in qualitative research; an example: analysing advice sequences</i>	
8	The Practical Relevance of Qualitative Research	171
	<i>Three roles for the sociologist; finding a place for sociology; responding to the critics; social science's contribution; context as social structure: policy and 'why' questions</i>	

PART FOUR SUMMARY

9 Six Rules of Qualitative Research	196
