Contents

Authors.................................................................................................................. ix
Contributors......................................................................................................... xi

1 Introduction ........................................................................................................ 1-1

SECTION I Production and Operations Analysis

2 Construction-Supply Chain Modeling: Issues and Perspectives ................. 2-1
   Marcelo Azambuja and William J. O’Brien

3 Production Planning and Control and the Coordination of Project Supply Chains .......... 3-1
   Carlos T. Formoso and Eduardo L. Isatto

4 Supply Chain Management in Product Development ................................ 4-1
   Patricia Tzortzopoulos, Mike Kagioglou, Rachel Cooper, and Erica Dyson

5 Collaboration and Communication in the Design Chain: A Value-Based Approach .................. 5-1
   Stephen Emmitt and Anders Kirk, Christoffersen

6 Supply Chain Management for Lean Project Delivery ................................ 6-1
   Iris D. Tommelein, Glenn Bollard, and Philip Kaminsky

7 Application of Integrated Materials Management Strategies ..................... 7-1
   Roberto J. Arbulu
Contents

8 Production System Instability and Subcontracted Labor .................................................. 8-1
Rafael Sacks

9 Understanding Supply Chain Dynamics Via Simulation ................................................... 9-1
Severine Strohheckern (nee Hong-Minh), Stephen M. Disney, and Mohamed M. Nairn

Commentary I .................................................................Commentary I-1
Glenn Ballard

SECTION II Organizational Perspectives

10 Review of Organizational Approaches to the Construction Supply Chain ..................... 10-1
Ruben Vrijhoef and Kerry A. London

11 Construction Supply Chain and the Time Compression Paradigm ................................ 11-1
Denis R. Towill

12 Strategic Management of Construction Procurement ................................................. 12-1
Andrew Cox

13 Industrial Organization Object-Oriented Project Model of the Facade Supply Chain Cluster ................................................................. 13-1
Kerry A. London

14 Innovation Management in the Construction Supply Chain ...................................... 14-1
Bart A.G. Bossink and Ruben Vrijhoef

Commentary II .................................................................Commentary II-1
Will Hughes

SECTION III Information Technology

15 Overview of IT Applications in the Construction Supply Chain ................................ 15-1
Kalyanaraman Vaidyanathan

16 Field Technologies and Their Impact on Management of Supply Chains ..................... 16-1
Semiha Kizeltas, Burcu Akinci, Esin Ergen, Pingbo Tang, and Anu Pradhan
17 Benefits of Using E-Marketplace in Construction Companies: A Case Study-------------------------------17-1
   Luis F. Alarcon, Sergio Maturana, and Ignacio Schonherr

18. Standards-Based Approaches to Interoperability in Supply Chain Management: Overview and Case Study Using the ISO 18629 PSL Standard---------------------18-1
   A.F. Cutting-Decelle, R.I. Young, B.P. Das, CJ. Anumba, and J. Stal-Le Cardinal

19 Lean Enterprise Web-Based Information System for Supply Chain Integration: Design and Prototyping.............19-1
   Nashwan Dawood

Commentary III........................................Commentary II11 -1
   Richard H.F. Jackson
