Contributors	ix
About the Contributors	xi
Series Preface	xvii
Preface	xxi
THEME I MODEL AND FORECAST COMBINATIONS	1
1 What Exactly Should We Be Optimising? Criterion Risk in Multicomponent and Multimodel Forecasting	
<i>A. Neil Burgess</i>	3
Abstract	3
1.1 Introduction	3
1.2 Model Combination and Criterion Risk	5
1.3 A Population-based Algorithm to Perform Joint Optimisation of a Portfolio of Models	10
1.4 Simulation Results with Synthetic Data ' '	14
1.5 Empirical Results for a Portfolio of Statistical Arbitrage Models	20
1.6 Conclusion	25
References	26
2 A Meta-parameter Approach to the Construction of Forecasting Models for Trading Systems	
<i>Neville Towers and A. Neil Burgess</i>	27
Abstract	27
2.1 Introduction	27
2.2 Developing Forecasting Models for Trading Systems	29
2.3 Synthetic Example of the Joint Optimisation Technique	32
2.4 Application to Statistical Arbitrage Trading	38

Contents

- 2.5 Conclusions
- References

3 The Use of Market Data and Model Combination to Improve Forecast Accuracy

Christian L. Dunis, Jason Laws and Stephane Chauvin

- Abstract
- 3.1 Introduction
- 3.2 The Exchange Rate and Volatility Data
- 3.3 The Volatility Models and Estimation Procedure
- 3.4 The Out-of-Sample Estimation Results
- 3.5 Conclusion
- References
- Appendix 3.1
- Appendix 3.2
- Appendix 3.3
- Appendix 3.4

4 21 Nonlinear Ways to Beat the Market

George T. Albanis and Roy A. Batchelor

- Abstract
- 4.1 Introduction
- 4.2 Data and Trading Rules
- 4.3 Classification Methods
- 4.4 Implementation
- 4.5 Results
- 4.6 Conclusion
- Acknowledgements
- References
- Appendix 4.1

5 Predicting High Performance Stocks Using Dimensionality Reduction Techniques Based on Neural Networks

George T. Albanis and Roy A. Batchelor

- Abstract
- 5.1 Introduction
- 5.2 Principal Components Analysis
- 5.3 Neural Network Linear Principal Components Analysis
- 5.4 Neural Network Nonlinear Principal Components Analysis
- 5.5 Data and Forecast Methodology
- 5.6 Results
- 5.7 Conclusion
- Acknowledgements
- References
- Appendix 5.1

THEME II	STRUCTURAL CHANGE AND LONG MEMORY	143
6	Structural Change and Long Memory in Volatility: New Evidence from Daily Exchange Rates	145
	<i>Michel Beine and Sebastien Laurent</i>	
	Abstract	145
6.1	Introduction	145
6.2	Preliminary Evidence	146
6.3	The Single-regime FIGARCH Model	148
6.4	The Markov-Switching FIGARCH Model	149
6.5	Conclusion	156
	Acknowledgements	156
	References	156
7	Long-run Volatility Dependencies in Intraday Data and Mixture of Normal Distributions	159
	<i>Aurelie Boubel and Sebastien Laurent</i>	
	Abstract	159
7.1	Introduction	159
7.2	The Intraday Volatility	160
7.3	Long Memory from Intraday Returns	169
7.4	Conclusion	174
	Acknowledgements	175
	References	175
	Appendix 7.1: Data Construction	177
	Appendix 7.2: Data Transformation	177
8	Comparison of Parameter Estimation Methods in Cyclical Long Memory Time Series	179
	<i>Laurent Ferrara and Dominique Guegan</i>	
	Abstract	179
8.1	Introduction	179
8.2	Semiparametric Estimation	182
8.3	Pseudo-Maximum Likelihood Estimation	186
8.4	Application	188
8.5	Conclusion	193
	Acknowledgements	194
	References	194
THEME III	CONTROLLING DOWNSIDE RISK AND INVESTMENT STRATEGIES	197
9	Building a Mean Downside Risk Portfolio Frontier	199
	<i>Gustavo M. de A'thayde</i>	
	Abstract	199
9.1	• Introduction	199

Contents

- 9.2 The Mean DSR Portfolio Frontier: The Bivariate Case
- 9.3 The Algorithm
- 9.4 The Multivariate Case
- 9.5 Asset Pricing
- 9.6 Conclusion
- Acknowledgements
- References

10 Implementing Discrete-time Dynamic Investment Strategies with Downside Risk: A Comparison of Returns and Investment Policies

Mattias Persson

Abstract

- 10.1 Introduction
- 10.2 Investment Models
- 10.3 Data
- 10.4 Results
- 10.5 Summary and Concluding Remarks
- References

11 Portfolio Optimisation in a Downside Risk Framework

Riccardo Bramante and Barbara Cazzaniga

Abstract

- 11.1 Introduction
- 11.2 Methodology
- 11.3 Empirical Evidence
- 11.4 Summary and Concluding Remarks
- References and Bibliography

12 The Three-moment CAPM: Theoretical Foundations and an Asset Pricing Model Comparison in a Unified Framework

Emmanuel Jurczenko and Bertrand Maillet

Abstract

- 12.1 Introduction
- 12.2 Investor's Preferences and the Three-moment CAPM
- 12.3 The Three-moment CAPM
- 12.4 Conclusion
- Acknowledgements
- References
- Appendix 12.1
- Appendix 12.2
- Appendix 12.3
- Appendix 12.4
- Appendix 12.5
- Appendix 12.6
- Appendix 12.7
- Appendix 12.8

Appendix 12.9	271
Appendix 12.10	272

13 Stress-testing Correlations: An Application to Portfolio

Risk Management

<i>Frederick Bourgojn</i>	275
Abstract	275
13.1 The Fall of LTCM and the Credit Crisis of August 1998	275
13.2 Stressing the General Level of Correlation of a Given Portfolio	280
13.3 Stress-testing Correlation Matrices	289
13.4 Conclusion	297
References	297
 Index	 299
