

The Institutional Economics of Water

A Cross-Country Analysis of
Institutions and Performance

R. Maria Saleth

*Senior Institutional Economist, International Water
Management Institute, Colombo, Sri Lanka*

Ariel Dinar

*Lead Economist, Agriculture and Rural Development
Department, The World Bank*

A CO-PUBLICATION WITH THE WORLD BANK

Edward Elgar

Cheltenham, UK • Northampton, MA, USA

<i>List of figures</i>	x
<i>List of tables</i>	xi
<i>List of acronyms and abbreviations</i>	xiii
<i>Acknowledgments</i>	xv
1 Water challenge: an institutional diagnosis	1
Physical dimension	1
Economic dimension	5
Policy dimension	8
Institutional dimension	11
Why this study?	14
Approach, scope, and objectives	16
Structure of the book	19
Notes	21
2 Understanding institutions: nature, performance, and change	23
Institutions: nature and definition	23
Features of institutions	26
Implications of institutional features	29
Institutions and performance	33
Theories of institutional change	36
Motivation for and sources of institutional change	41
Notes	44
3 Existing literature: approaches, attempts, and limitations	46
Institutional approaches: a stylized comparison	46
Institutional transaction cost approach	50
The literature: a review of issues and approaches	54
Dark and gray spots in current literature	64
Notes	67
4 Evaluating institutional linkages: toward an alternative methodology	70
Context, level, and focus of analysis	71
Ecosystem perspective and ex-ante approach	73

	Subjective theory of institutional change	75
	Complementary methodologies	83
	Institutional decomposition: rationale and basis	85
	Notes	91
5	Analytical framework and empirical models	94
	Conceptual basis	94
	Analytical decomposition	96
	Water institution and sector performance: linkages and influence	101
	Identification and definition of variables	106
	Empirical models of institution-performance interaction	113
	Notes	121
6	Empirical context: description and justification	124
	Stakeholders' perception as an empirical basis	124
	Subjective information: rationale and caveats	128
	Sample selection and description	130
	Perceptual information: empirical validity and interpretation	140
	Database	145
	Notes	152
7	Institutional changes in the water sector: a cross-country review	154
	Water institutional change: an analytical framework	154
	Water institutional changes: a cross-country review	156
	Selected best practices	174
	Common trends and patterns	178
	Factors motivating institutional change	182
	Implications for institutional transaction cost theory	184
	Notes	185
8	Institution-performance linkages: evidence and evaluation	187
	Empirical evaluation: approach and framework	187
	Evidence for institution-performance linkages	190
	Evaluation of institution-performance linkages	199
	Empirical results: validity and ramifications	210
	Notes	213
9	Institution-performance linkages: robustness and contextuality	216
	Evaluating robustness and sensitivity: context and approach	216
	Robustness of results	221
	Sensitivity of results: role of disciplinary bias	232
	Contextuality of results: role of reform environment	242

Role of exogenous factors in performance evaluation	251
All-sample results: consistency and reliability	260
Notes	262
10 Institutional sequencing and packaging	264
Approach and framework	265
Relative share of transmission channels: overall perspective	271
Relative share of transmission channels: role of recent reforms	278
Relative importance of exogenous variables	285
Implications for institutional design	290
Notes	300
11 Conclusions with implications for theory and policy	302
Analytical and methodological contributions	303
Implications for theory and policy	309
Implications for reform design and implementation	317
Implications for reform prospects	323
Limitations and caveats	327
<i>Appendix A: Questionnaire</i>	329
<i>Appendix B: List of experts who provided inputs and data</i>	349
<i>Appendix C: Mathematical analog for impact-transmission channels</i>	359
<i>Bibliography</i>	366
<i>Index</i>	385
