

# Frontiers of Evolutionary Economics

Competition, Self-Organization and Innovation  
Policy

*Edited by*  
John Foster

*Professor of Economics and Head of the School of Economics,  
The University of Queensland,  
Brisbane, Australia*

*and*

J. Stanley Metcalfe

*Stanley Jevons Professor of Economics  
and Co-Director,  
ESRC Centre for Research on Innovation and Competition,  
University of Manchester, UK*

Edward Elgar  
Cheltenham, UK • Northampton, MA, USA

# Contents

<i>Contributors</i>	vii
<i>Preface</i>	ix
1 Modern evolutionary economic perspectives: an overview <i>John Foster and J. Stanley Metcalfe</i>	1
i'	
PART I THEORETICAL PERSPECTIVES	
2 The coevolution of technology and institutions as the driver of economic growth <i>Richard R. Nelson</i>	19
Commentary: institutions, macroevolution and economic selection <i>John M. Gowdy</i>	31
3 From evolution to language and learning <i>Bart Nooteboom</i>	41
Commentary: from evolution to language and learning <i>Paolo Ramazzolti</i>	70
4 Theorizing complexity <i>Robert Delorrie</i>	80
Commentary: simplicity in theories of complexity - defining, knowing and doing <i>Drew Wollin</i>	109
5 Self-organizing and Darwinian selection in economic and biological evolutions: an enquiry into the sources of organizing information <i>Pavel Pelikan</i>	121
Commentary: the origins of successful economic organizations - a Darwinian explanation with room for self-organizing <i>Bryan Morgan</i>	152

6	History-friendly theories in economics: reconciling universality and context in evolutionary analysis <i>Kurt Dopfer</i>	160
	Commentary: history-friendly theories in economics - reconciling universality and context in evolutionary analysis <i>Jason Potts</i>	188
PART II EMPIRICAL PERSPECTIVES		
7	Considerations about a production system with qualitative change <i>Paolo Saviotti</i>	197
8	Heterogeneity and evolutionary change: empirical conception, findings and unresolved issues <i>Uwe Cantner and Hoist Hanusch</i>	228
	Commentary: heterogeneity and evolutionary change - empirical conception, findings and unresolved issues <i>John Nightingale</i>	270
9	Measuring complexity: puzzles and tentative solutions <i>Francisco Louga</i>	278
	Commentary <i>Steve Keen</i>	307
10	Knowledge, ignorance and the evolution of complex systems <i>Peter M. Allen</i>	313
	Commentary: knowledge, ignorance and the evolution of complex systems <i>Kevin Bryant</i>	351
11	Promoting innovation: an overview of the application of evolutionary economics and systems approaches to policy issues <i>Kevin Bryant</i>	361
	<i>Index</i>	385
