# Table of Contents

<b>Preface</b>	<b>V</b>
<b>List of Contributors</b>	<b>XI</b>
<b>PART I INTRODUCTION AND INSTITUTIONAL SETTING</b>	
<b>Chapter 1. The Theoretical Foundations of the National Innovation Systems Approach</b>	<b>3</b>
<i>Wim Meeusen</i>	
1.1. Introduction	3
1.2. A characterisation from the viewpoint of the evolution of economic thought on technological progress and innovation	4
1.2.1. The mainstream neo-classical approach	4
1.2.2. Theories of endogenous growth	5
1.2.3. The systems approach	8
1.3. Some early insights and results from NIS-type studies	11
1.4. Technology policy from the neo-classical and the NIS angle	15
1.5. Conclusion	19
<b>Chapter 2. The Sources of Belgian Prosperity</b>	<b>21</b>
<i>Henri Capron</i>	
2.1. Introduction	21
2.2. The strengths and weaknesses of smallness	23
2.3. Belgium in the world economy	24
2.4. Surfing the long waves	25
2.5. The present economic structure	31
2.6. The challenge of the 21 <sup>st</sup> century	35
2.7. Conclusion	41

<b>Chapter 3. The Institutional Profile</b>	<b>43</b>
<i>Henri Capron, Michele Cincera and Michel Dumont</i>	
3.1. Introduction	43
3.2. The legal framework	44
3.3. The institutional structure	50
3.3.1. The federal state	50
3.3.2. The federated entities	51
3.4. Institutions of higher education	53
3.5. Research and Technology Organisations (RTOs)	55
3.6. Bridging institutions	57
3.6.1. Business-university/HEI interfaces	58
3.6.2. Science parks and incubators	58
3.7. Science and technology policies	59
3.7.1. The Federal Government	60
3.7.2. The Flemish Community	60
3.7.3. The Walloon Region	62
3.7.4. The French Community	64
3.7.5. The Brussels-Capital Region	64
3.8. Conclusion	65
Appendix: List of abbreviations	68

## **PART II THE INPUTS IN THE NATIONAL INNOVATION SYSTEM**

<b>Chapter 4. R&amp;D Expenditures and the National Innovation System</b>	<b>73</b>
<i>Henri Capron and Michele Cincera</i>	
4.1. Introduction	73
4.2. Financing and performing sectors	74
4.3. General structure of the industry: R&D and value added	76
4.4. Employment in R&D activities	80
4.5. Financing sources by industry	83
4.6. Regional R&D intensities	83
4.7. The role of the federal government and the emergence of regional authorities	87
4.8. The performance of higher education	91
4.9. The education and training challenge	94
4.10. R&D collaboration between Belgian firms and other actors of the NIS	97
4.11. Conclusion	100

<b>Chapter 5. R&amp;D Activities at the Firm Level</b>	<b>101</b>
<i>Klaus Vandewalle</i>	
5.1. Introduction	101
5.2. The R&D orientation of Belgian firms	101
5.2.1. Research versus development	102
5.2.2. Product versus process innovation	103
5.2.3. Capital- versus labour-intensive R&D	104
5.3. Firm size and R&D intensity	105
5.3.1. Descriptive approach	105
5.3.2. Regression results	112
5.4. Conclusion	115
<b>Chapter 6. The National Innovation System and its International Linkages</b>	<b>117</b>
<i>Henri Capron, Michele Cincera and Bruno van Pottelsberghe de la Potterie</i>	
6.1. Introduction	117
6.2. International technology transfers: concepts and channels	117
6.3. Imports and exports of high-tech products	120
6.4. The balance of technology payments	121
6.5. Inward and outward foreign direct investments	124
6.6. Participation in European networks	129
6.7. Conclusion	135
Appendix: Definition of indexes	136
<b>Chapter 7. The Network of Joint Research Projects and Alliances</b>	<b>137</b>
<i>Michel Dumont and Wim Meeusen</i>	
7.1. Introduction	137
7.2. The mapping of the network of joint R&D projects between firms, research institutions and universities	138
7.2.1. The model and the data	138
7.2.2. Description of the complete graph	138
7.3. Clusters in the National Innovation System	146
7.3.1. Concepts and methodologies of cluster approaches	146
7.3.2. Cliques and micro-clusters of R&D co-operation	147
7.4. Knowledge spillovers through R&D co-operation	148
7.5. The regional dimension of Belgian R&D collaboration	151
7.6. The Belgian R&D network in an international context	152
7.7. The Belgian specialisation pattern in high-tech trade	156
7.8. Conclusion	160
Appendices	162

## **PART III THE OUTPUTS OF THE NATIONAL INNOVATION SYSTEM AND CONCLUSION**

<b>Chapter 8. Technological Performance</b>	<b>175</b>
<i>Henri Capron and Michele Cincera</i>	
8.1. Introduction	175
8.2. Patents	176
8.2.1. The Belgian position inside the European Union	176
8.2.2. Patenting activities of firms	177
8.2.3. Product- and process-oriented patents at the USPTO	179
8.2.4. Patenting activities of universities, RTOs and government agencies	181
8.2.5. The impact of R&D on patenting and scientific publications	182
8.3. Differences in regional profiles	185
8.4. Co-patents	189
8.5. Technological specialisation and technological revealed comparative advantage	192
8.6. Scientific publications	195
8.7. Trademarks	196
8.8. Conclusion	197
<b>Chapter 9. Technological Performance and Performance in International Trade</b>	<b>199</b>
<i>Wim Meeusen and Glenn Rayp</i>	
9.1. Introduction	199
9.2. The stylised facts	200
9.3. Estimation of a hysteresis model of OECD export shares	206
9.4. Conclusion	209
<b>Chapter 10. Conclusions</b>	<b>211</b>
<i>Henri Capron and Wim Meeusen</i>	
10.1. The historical background and the institutional setting	211
10.2. Inputs in the NIS	213
10.3. Diffusion and co-operation	215
10.4. Outputs of the NIS	216
10.5. Policy implications	218
10.6. What next?	220
<b>List of Tables</b>	<b>223</b>
<b>List of Figures and Maps</b>	<b>227</b>
