Intergovernmental Transfers as a Macroeconomic Success Story of European Integration: Myth or Reality?

NOMOS Verlagsgesellschaft
Baden-Baden

Contents

Figures and Tables	11
Acknowledgements	15
0 The starting point of the study	17
1 Introduction	19
1.1 <i>Objective and scope of the study</i>	19
1.2 <i>Structure and results of the study</i>	20
2 EU intergovernmental transfers: facts and objectives	23
2.1 <i>Institutional framework of EU intergovernmental transfers</i>	23
2.1.1 The Structural Funds	23
2.1.2 The Cohesion Fund	26
2.2 <i>Scope of EU intergovernmental transfers</i>	28
2.2.1 Size and composition of EU intergovernmental transfers	28
2.2.2 Gross transfers vs. net transfers	31
2.3 <i>Economic objectives of EU intergovernmental transfers to the cohesion countries</i>	33
2.3.1 The layer of objectives	34
2.3.2 The predominance of long-run over short-run effectiveness	36
2.3.3 Dynamic efficiency: an ignored dimension?	38
2.3.4 Economic vs. social cohesion	40
3 Intergovernmental fiscal transfers, fiscal policy and growth: insights from the literature	43
3.1 <i>The stylised supply-side links between EU intergovernmental transfers and economic output</i>	43
3.2 <i>The supply-side links between fiscal policy and long-run growth: A selective review of the literature</i>	45
3.2.1 Long-run ineffectiveness of positive fiscal demand shocks	46
3.2.2 The supply-side effects of public expenditure policy	49
3.2.3 The supply-side effects of tax policy	66
3.2.4 The supply-side effects of public debt policy	69
3.3 <i>Kinds and scope of growth-impeding transfer-related absorption problems</i>	11
3.3.1 A classification of transfer-related absorption problems	71
3.3.2 The* role of economic institutions and the economic environment	74
3.3.3 Transfer fungibility and the ineffectiveness of conditionality	78

4	EU intergovernmental transfers and real convergence:	
	a critical assessment of existing evaluation studies	83
4.1	<i>Ex post explanation of real convergence of the cohesion countries</i>	83
4.1.1	Ex post evidence on the effects of EU transfers on growth and convergence	85
4.1.2	Alternative explanations for the convergence process of the cohesion countries	87
4.2	<i>Ex ante simulation models for the European Commission</i>	92
4.2.1	The input-output model of Beutel	93
4.2.2	The endogenous growth model of Pereira	94
4.2.3	The HERMIN modelling framework	97
4.2.4	The European Commission's QUEST II model	100
4.2.5	The LSE evaluation study of the macroeconomic impact of Cohesion Fund expenditure	102
4.3	<i>A critical assessment of the ex ante simulation models</i>	103
4.3.1	The predicted output effects are hardly a reason for satisfaction	104
4.3.2	The results are biased upwards through the model design	105
4.3.3	The predicted output effects are biased upwards from the input side	106
4.4	<i>The de facto fungibility of EU intergovernmental transfers</i>	110
4.4.1	The additionality principle: a paper tiger by design	111
4.4.2	The undermining of the Structural Funds provisions by the Cohesion Fund provisions	114
4.4.3	Conclusions for our own research	115
5	Transfers, fiscal policy reactions and economic growth:	
	A theoretical analysis	117
5.1	<i>General features of the analytical framework</i>	119
5.2	<i>The impact of exogenous intergovernmental transfers on national fiscal policy and growth when national fiscal policy is partially constrained by rules</i>	121
5.2.1	Model specification and policy scenario	121
5.2.2	The intertemporal effects of transfers in case of a totally inefficient tax administration	129
5.2.3	The intertemporal effects of transfers in case of an efficient tax administration	141
5.3	<i>First model extension: the government is no longer rule-bound</i>	153
5.3.1	A simplified model framework	153
5.3.2	Determination of the general dynamics of the model	155
5.3.3	Optimal fiscal policy and growth in the absence of transfers	157

5.3.4	The impact of transfers on the economy in the steady-state case	160
5.3.5	The impact of transfers on the economy in case of endogenous growth	165
5.3.6	Comparison with qualitative results when public expenditure policy is rule-constrained	171
5.3.7	Introducing tax policy as an endogenous adjustment instrument	176
5.3.8 /	Introducing the fiscal deficit as an endogenous adjustment instrument	178
5.4-	<i>Second model extension: transfers are no longer constant over time</i>	183
5.4.1	Letting transfers grow at an exogenous rate	184
5.4.2	Setting transfers as fixed ratio of output	188
5.4.3	Cutting off transfers after an exogenously given endpoint in time	191
5.4.4	Cutting off transfers after an endogenously determined endpoint in time	197
5.4.5	Transfers as a function of income disparities	204
5.5	<i>Summary of the main theoretical results</i>	206
6	EU intergovernmental transfers and fiscal policy reactions in the cohesion countries: empirical evidence	209
6.1	<i>Broad fiscal developments in the cohesion countries: a cross-country comparison</i>	211
6.1.1	The broad picture	211
6.1.2	A closer look at public expenditure developments	216
6.2	<i>EU intergovernmental transfers and national fiscal policy reactions: a descriptive analysis</i>	225
6.2.1	EU transfers and national fiscal policy: trend developments	225
6.2.2	Additionality of EU transfers: graphical findings	231
6.3	<i>Econometric evidence of the impact of EU intergovernmental transfers on national fiscal policy: the arithmetic approach</i>	236
6.3.1	The arithmetic approach: methodological procedure	236
6.3.2	The arithmetic approach: regression results	238
6.3.3	The arithmetic approach: extension to a dynamic system analysis	241
6.4	<i>Econometric evidence of the impact of EU intergovernmental transfers on national fiscal policy: the economic approach</i>	246
6.4.1 •	The economic approach: methodological procedure	247
6.4.2	The economic approach: regression results	254
6.4.3	The economic approach: robustness of the results	264
6.5	<i>EU regional transfers and economic growth: some tentative conclusions</i>	272
6.5.1	Summary of the main results concerning the impact of EU transfers on national fiscal policy in the cohesion countries	272
6.5.2	Conjectured impact of EU transfers on long-run growth	274

6.5.3 Comparison of the empirical with the theoretical results and suggestions for further research	276
7 General economic policy conclusions and outlook	281
7.1 <i>Main results of the study</i>	281
7.2 <i>An explanation for the results of the study</i>	282
7.3 <i>Proposals for a reform of EU cohesion policies</i>	284
7.4 <i>The challenge of eastern enlargement of the EU and an assessment of the 1999 Berlin agreements</i>	288
