

Carlos Alós-Ferrer • Klaus Ritzberger

The Theory of Extensive Form Games

 Springer

Contents

1 Introduction	1
1.1 The Starting Point	2
1.1.1 Historical Notes	2
1.1.2 Extensive Form Games	3
1.2 How to Model Games	5
1.2.1 Kuhn's Graph Approach	6
1.2.2 Von Neumann and Morgenstern's Refined-Partitions Approach	7
1.2.3 The Synthesis	8
1.2.4 The Sequence Approach	10
1.2.5 Some Illustrative Examples	11
1.2.6 Plan of the Book	14
References	15
2 Game Trees	17
2.1 Preview	19
2.2 Set Representations	20
2.2.1 Trees and Subtrees	21
2.2.2 Motivating Examples	25
2.2.3 Decision Trees	29
2.2.4 Representation by Plays	32
2.3 Set Trees	35
2.3.1 Reduced Form and Plays	38
2.3.2 Irreducible Set Trees	39
2.3.3 Proper Order Isomorphism	41
2.3.4 Bounded Set Trees	43
2.4 Game Trees	47
2.4.1 Complete Game Trees	49
2.5 Summary	53
References	55

3	Pseudotrees and Order Theory	57
3.1	Pseudotrees	58
3.2	Directed Sets and Pseudotrees	59
3.3	Pseudotrees as (Semi)Lattices	61
3.4	Representation of Pseudotrees	63
3.5	Summary	66
	References	66
4	Extensive Decision Problems	67
4.1	Preview	68
4.2	Definition of Extensive Decision Problems	68
4.2.1	Information Sets	71
4.2.2	Simultaneous Decisions	73
4.2.3	Absent Mindedness	75
4.2.4	Independence of the Conditions	78
4.2.5	EDP2 When Chains Have Lower Bounds	79
4.3	Choices and Strategies	80
4.3.1	Plays and Choices	80
4.3.2	Strategies	80
4.4	Game Trees Revisited	81
4.4.1	Examples	82
4.4.2	A Classification of Nodes	86
4.4.3	Removing Singletons	89
4.5	Available Choices	91
4.5.1	Perfect Information Choices	91
4.5.2	Existence of EDPs	94
4.6	Summary	95
	References	96
5	Extensive Forms	99
5.1	Preview	100
5.2	Strategies and the Desiderata	101
5.2.1	Randomized Strategies	102
5.3	Plays Reached by Strategies	103
5.4	When Do Strategies Induce Outcomes?	104
5.4.1	Examples for Non-existence	104
5.4.2	Undiscarded Nodes	105
5.4.3	Perfect Information and Playability	107
5.4.4	Everywhere Playable EDPs	108
5.4.5	Up-Discrete Trees	112
5.5	Uniqueness	116
5.5.1	Examples with Multiple Outcomes	116
5.5.2	Extensive Forms	118
5.5.3	A Uniqueness Result	123
5.6	A Joint Characterization	124
5.7	Note: Games in Continuous Time	125
