Eleonora Cavallaro

Real and Financial Dynamics in a Macroeconomic Growth Model with Endogenous Cycles

TABLE OF CONTENTS

INTRODUCTION
CHAPTER I. The "Stylized Facts" in the Dynamics of Capitalist Economies
CHAPTER II. Models and Methods in Endogenous Business Cycle
Theory. An Overview of the Literature
2.1 -Preface
 2.2 - The Role of Real Factors in the Analysis of Economic'Fluctuations. 45 The business cycle in Kalecki. The non-linear Hicks model. The non-linear acceleration and the cyclical process in Goodwin. The business cycle in Kaldor. The Goodwin growth cycle'model. 2.3 -The Introduction of Money in Business Cycle Modelling
Debt, financial fragility and systemic instability. The Franke- Semmler model. , CHAPTER III. The Role of Real Factors in Economic Fluctuations. A Basic Set Up
3.3 - Long-Run Equilibrium and Dynamics

CHAPTER IV. Real and Financial Factors in Economic Fluctuations.
An Extension of the Basic Model
4.1 - The Short-Run Equilibrium within an "Enlarged" IS-LM
Framework
4.2 - Long-Run Equilibrium and Dynamics
CONCLUSIONS
APPENDIX A
A.I - Some Notes on the Nature of Non-Linear Systems of Differential
Equations and their Applications to the Study of Economic
Fluctuations
A.2 - On the Notion of Limit-Cycles. The Poincare-Benedixson Theorem 161
A.3 - A Proof of the Existence of a Limit-Cycle in Goodwin (1951)
A.4 - On the Existence of a Limit-Cycle in the Kaldor Model164
A.5 - Analytical Details on the Asada Model166
APPENDIX B
B.I - A Simplified Presentation of the Basic Model. IS-iM Equilibrium
and Comparative-Statics
B.2 - Steady-State Equilibrium and Dynamics
B.3 - A Numerical Illustration:
B.4 - A Brief Note on Monetary Policy
B.5- Notes on the Dynamics of the "Enlarged" Model
