UNIVERSITY PRESS

Contents

	Series editor's preface	*page* ix
	Volume editors' preface	xiii
	Editors	xxi
	List of contributors	xxv
I	**Philosophical and methodological implications of complexity and evolution in economic systems**	
1	Toward a generalized Coase theorem: a theory of the emergence of social and institutional structures under imperfect information • *Benin Martens*	3
2	Universal Darwinism and social research: the case of economics • *John Nightingale*	21
3	Uncertainty, risk, and chaos *James Juniper* , I	37
4	The role of innovation in economics *Russell K. Standish*	61
II	**Finance and the macroeconomy**	
5	The nonlinear economics of debt deflation *Steve Keen*	83
6	The emergence of complex dynamics in a "naturally" nonlinear integrated Keynesian model of monetary growth *Carl Chiarella and Peter Flaschel*	111
7	Stochastic volatility in interest rates and complex dynamics in velocity *William A. Barnett and Haiyang Xu*	147

8 A genetic-progi amming-based approach to the generation of foreign-exchange trading models 173
Andrew Colin

9 Hybrid option pricing with an optimal weighted implied standard deviation 191
Paul Lajbcygiet; Andrew Flit man, and Marimuthu Palaniswami

III Market and sectoral dynamics

10 Evolutionary patterns of multisectoral growth dynamics 215
Hermann Schnabl

11 The detection of evolutionary change in nonlinear economic processes: a new statistical methodology 233
John Foster and Phillip Wild

12 Ergodic chaos in a piecewise linear cobweb model 253
Akio Matsumoto

13 The cobweb model and a modified genetic algorithm 267
Janice Gaffney, Krystyna Parrott, Charles Pearce, and Franz Salzborn

14 The convergence of genetic learning algorithms, with particular reference to recent cobweb models 277
C. E, M. Pearce

IV Marketing and interdependent behavior

15 A complex-systems simulation approach to evaluating plan-based and reactive trading strategies 291
Robert B, Johnston and John M. Betts

16 Genetic algorithms and evolutionary games 313
Xin Yao and. Paul Darwen

17 Evolved perception and the validation of simulation models 335
Robert Marks

18 The application of cellular-automata and agent models to network externalities in consumers' theory: a generalization-of-life game 351
Sobei H. Oda, Ken Miura, Kanji Ueda, and Yasunori Baba

19 Engendering change 373
Joshua S. Gans
