CHAPTER 1

Introduction	1
The Electric Industry	2
The Case for Competition	3
The United States	9

PART ONE

The Standard Prescription	15
---------------------------	----

CHAPTER 2

The Essential Aspects of Electricity	17
Functions of the Electric Industry	17
Traditional Organization of the Industry	24
Key Factors Specific to the Electric Industry	29

CHAPTER 3

Reforming the Industry	37
Candidates for Competition	37
Other Objectives and Constraints	38
Four Models for Industry Structure	41
Restructuring Existing Companies	59
Ensuring Competitive Markets	67

CHAPTER 4

Requirements for Competition: Demand Side	71
The Role of Demand in Markets	71
Demand Responsiveness	74
Inelastic Demand and Price Caps	85

CHAPTERS

Requirements for Competition: Supply Side	89
Many Sellers	89
How Does Market Power Work?	90

Newly Deregulated Markets	95
Market Power Solutions	96
Price Caps, Bidding Restrictions, and Profit Controls	101
Small Markets, Big Plants, and Ancillary Services	102
Predicting and Detecting Market Power	103
Supply Responsiveness	105
Environmental Issues	107
 CHAPTERS	
Liquid, Efficient, and Complete Marketplaces	113
The Rules That Govern a Marketplace	113
Liquid Markets	114
Efficient Markets	115
Complete Markets	115
Electricity Marketplaces	117
 CHAPTER 7	
Trading Arrangements	121
Components of the Trading Arrangements	121
Why Electricity Is Different	123
Three Models of Trading Arrangements	127
A Preferred Model	129
The Integrated Trading Model	133
The Wheeling Trading Model	143
The Decentralized Trading Model	147
Ancillary Services	155
Summary of Trading Models	158
 CHAPTER 8	
Details of the Integrated Trading Model	161
Setting the Right Spot Price	162
Treatment of Contracts	168
Congestion Management	175
More on How Locational Prices Come About	177
Zonal versus Nodal versus Single Price	183
Complex versus Simple Bids	184
Pay-as-Bid or Marginal Bid Pricing?	186
Day-Ahead Markets	188
References	191

CHAPTER 8

Transmission Business Model	193
Transmission Functions	193
Long-Term Access	194
Transmission Pricing	196
Transmission Expansion	201
Transmission Rights	207
Ownership and Control: Transcos versus ISOs	212

CHAPTER 10

Issues in the Retail and Distribution Business	217
The Eventual Retail Access Framework	218
A Competitive Wholesale Market	219
Competing Retailers	220
Settlement for Retail Access	222
Metering Issues	226
Should the Distco Retail at Regulated Rates?	229
PBR for Distribution	236
Summary and Conclusions on Retail Access	237

CHAPTER 11

Summary and Conclusions to Part One	239
The Standard Prescription	239
The Five Major Issues	244
Transition Issues	244

PART TWO

The United States	247
--------------------------	------------

CHAPTER 12

The Structure of the industry	249
Key Facts and Dates	250
Vertically Integrated Investor Owned Utilities	252
Co-Operatives	254
Public Power	255
Independent Power Producers	257
Short-Term Trading Markets	258
Price Differences Emerge	259
Examples in Other Industries	263

CHAPTER 13

Changes in the 1990s	265
EPAct (1992)—Open Access for Wholesale Only	265
Order No. 888 (1996)—Stranded Costs and Trading Rules	266
Order No. 2000 (1999)—Consolidation	267
Deregulating State by State	270

CHAPTER 14

The New Players	279
Independent System Operators	279
Transcos	280
Marketers and Brokers	280
Retailers	282
Independent Generators	282
The New Jurisdictional Split	283
The New NERC	284

CHAPTER 15

Trading Arrangements in the United States	285
The Big States and the Tight Pools	286
Problems Elsewhere	287
Acronym Soup—The Current NERC Methods	291
The Trading Arrangements Must Be Totally Revised	295

CHAPTER 18

Transmission Business Model	299
Current Situation	299
Unbundling of ISO and Transmission Functions	300
Pricing	304
System Expansion	307

CHAPTER 17

Control of Market Power	311
Divestiture to Achieve Enough Competitors	311
Demand Response	312
Transmission to Expand Market Areas	312
FERC's Role in Prior Approvals	313
Price Caps	316

CHAPTER 18

Retail Regimes	318
Proposed Model	319
What the United States Has	322

Rate Design for Stranded Cost Collection	324
Shopping Credits and the Price of Default Service	329

CHAPTER 18

Current Jurisdictional Situation	333
What Is a Wholesale Sale?	334
Expansion of FERC Jurisdiction	335
The Jurisdictional Impasse	336
Possible Solutions	338

CHAPTER 20

Five Major Changes Revisited	341
Demand Responsiveness	342
Trading Arrangements	343
The Transmission Business Model	345
The First Three Steps Should Be Done Anyway	346
Supply Side	346
Federal Legislation?	352

APPENDICES

APPENDIX A

Electricity Restructuring In England and Wales	355
--	-----

APPENDIX B

National Grid Company (U.K.)	371
------------------------------	-----

APPENDIX C

The California Crisis 2000-2001	375
---------------------------------	-----

APPENDIX D

The U.S. Gas Experience—A Comparison with Electricity	385
---	-----

APPENDIX E

Building New Generators—When, Where, and How	403
--	-----

APPENDIX F

Building New Transmission—When, Where, and How	417
--	-----
