Detailed table of contents

	Preface	*page* xix
	The present volume	xx
	Acknowledgments	xxiv
1	A unified framework	1
	The problem of pluralism	3
	A unified framework (Table 1.1)	11
	Clarifications	14
	Exclusions	16
	Terminology	18
	Examples	20
	Democracy	21
	Vouchers	21
	Advice to the reader	22
Part I	**General**	25
2	Beginnings	27
	General goals (Table 2.1)	28
	Discovery	28
	Appraisal	30
	Tradeoffs	32
	Finding a research question	37
	Study the tradition	38
	Begin where you are	40
	Get off your home turf	41
	Play with ideas	43
	Practice dis-belief	45

	Observe empathically	47
	Theorize wildly	48
	Think ahead	50
	Conduct exploratory analyses	52
	Concluding thoughts on beginnings	54
3	Arguments	58
	Criteria (Table 3.1)	60
	Truth	60
	Precision	61
	Generality	61
	Boundedness	64
	Parsimony	66
	Coherence	68
	Commensurability	68
	Relevance	69
4	Analyses	74
	Definitions (Figure 4.1)	75
	Research design versus data analysis	78
	Criteria (Table 4.1)	80
	Accuracy	81
	Validity, precision, uncertainty (Figure 4.2)	82
	Internal/external validity	84
	Sampling	86
	Representativeness	86
	Size (*N*)	88
	Level of analysis	90
	Cumulation	91
	Standardization	91
	Replication	92
	Transparency	94
	Theoretical fit	95
	Construct validity	95
	Severity	96
	Partition	100

Part II Description 105

5 Concepts 107
The quandary of description 110
Concepts 112
Criteria of conceptualization (Table 5.1) 116
Resonance 117
Domain 119
Consistency 121
Intension and extension: tradeoffs (Figure 5.1) 123
Fecundity 124
Differentiation 127
Causal utility 130
Strategies of conceptualization (Table 5.2) 131
Survey of plausible concepts 132
Classification of attributes (Table 5.3) 133
Definition: concept types 134
Minimal 135
Maximal 136
Cumulative (Table 5.4) 137
Discussion 138

6 Descriptive arguments 141
Strategies (Table 6.1) 142
Indicators 142
Syntheses 143
Typologies 144
Simple typology 145
Temporal typology 145
Matrix typology (Table 6.2) 146
Taxonomy (Table 6.3, Figure 6.1) 147
Configurational typology (Table 6.4) 147
Sequential typology 150
Associations 151
Trend 151
Network 151
Correlation 153
Conclusions 153

7 Measurements 155
Criteria 158
Overall goals: reliability/precision and validity (Figure 7.1) 160
Strategies (Table 7.1) 163
Levels of abstraction 164
Structure 165
Aggregation 167
Scales (Tables 7.2 and 7.3) 167
Objectives 172
Approaches: deductive and inductive 173
Ethnography 175
Surveys and experiments 177
Cross-referencing 179
Causal relations 181
Corruption: a detailed example 184
Ex post validity tests 191

Part III Causation 195

8 Causal arguments 197
Definitions 198
A simple causal graph (Figure 8.1) 200
Causal criteria (Table 8.1) 202
Clarity 204
Manipulability 207
Separation 212
Independence 213
Impact 214
Mechanism 215

9 Causal analyses 218
Causal effects 219
Varieties of treatment effects (Table 9.1) 220
Varieties of causal relationships (Table 9.2) 224
Departures from the treatment effect 225
An elaborated causal graph (Figure 9.1) 228
Criteria (Table 9.3) 231

	Treatment	232
	Exogeneity	232
	Variation	233
	Simplicity	234
	Discrete-ness	235
	Uniformity	236
	Even distribution	237
	Strength	238
	Proximity	238
	Scaleability	239
	Outcome	240
	Variation	240
	Sample	242
	Independence	242
	Comparability (Figure 9.2, Table 9.4)	246
10	Causal strategies: *X* and *Y*	256
	Summary (Table 10.1)	257
	Randomized designs (Table 10.2)	258
	Examples	262
	Example 1: employment discrimination	262
	Example 2: corruption control	263
	Example 3: historic election campaigns	264
	Example 4: gender and leadership	265
	Example 5: democracy promotion	267
	Obstacles	268
	Internal validity	269
	External validity	271
	Conclusions	273
	Nonrandomized designs	273
	Regression-discontinuity (RD) designs (Figure 10.1)	275
	Panel designs	279
	Cross-sectional designs	283
	Longitudinal designs (Table 10.3)	285
11	Causal strategies: beyond *X* and *Y*	291
	Conditioning and confounding: a primer	292
	Conditioning (Figure 11.1)	293
	Confounders (Figure 11.2)	294

Strategies of causal inference that reach beyond X and Y 299
Conditioning on confounders (Figures 11.3 and 11.4) 299
Instrumental variables (Figure 11.5) 304
Mechanisms (Figure 11.6) 306
Alternate outcomes (Figure 11.7) 310
Causal heterogeneity (Figure 11.8) 315
Rival hypotheses (Figure 11.9) 316
Robustness tests 319
Causal reasoning 321
The assignment problem revisited 324
Beyond randomization 326

12 Varying approaches to causal inference 327
Causal-process observations 328
Causes of effects 333
Necessary/sufficient causal arguments (Table 12.1) 335
Discussion 337
Qualitative comparative analysis (QCA) (Tables 12.2, 12.3, 12.4, Figure 12.1) 342
cs-QCA (Table 12.2) 343
fs-QCA (Tables 12.3 and 12.4, Figure 12.1) 346
Discussion 350

IV Conclusions 359

13 Unity and plurality 361
Qualitative versus quantitative 362
Culturalism versus rationalism 366
Models of causality 368
The covering-law model 368
The potential-outcomes model 369
Pluralism and monism 373
A unified account 376

14 Setting standards 379
Ceteris paribus 379
Trade-ups 381
Multimethod research 382

Setting standards 386
Threshold tests 387
Best-possible, all things considered 389

Postscript: Justifications 394
The practice of social science 398

Appendix: A few words on style 402
