## CONTENTS

**Foreword**

**Introduction**

### **PART I. DYNAMICS WITHOUT OPTIMIZATION 15**

#### **1. Linear Difference Equations**

- 1.1 Difference equations
- 1.2 General linear systems
- 1.3 Planar linear systems
- 1.4\* Linear control systems

#### **2. Discrete-Time Linear Models**

- 2.1 Linear model of accelerator-multiplier
- 2.2 Linear models of control by stock signals
- 2.3\* Linear decentralized control with expectations

#### **3. Nonlinear Difference Equations**

- 3.1 Existence and stability of fixed points
- 3.2 Limit cycles
- 3.3 Chaos

#### **4. Discrete-Time Nonlinear Models**

- 4.1 Irregular growth cycles
- 4.2 Nonlinear model of accelerator-multiplier
- 4.3 Nonlinear model of control by stock signals
- 4.4\* Nonlinear stock control with expectations
- 4.5 Mixed expectations
- 4.6 Related issues

<b>5. Ordinary Differential Equations</b>	<b>114</b>
5.1 Basic concepts and theorems	114
5.2 Linear systems	123
5.3 Nonlinear systems	129
5.4 Control in continuous time	133
<b>6. Continuous-Time Models</b>	<b>136</b>
6.1 Growth models	136
6.2* Government stabilization	141
6.3 Competitive price adjustment	144
<b>PART II. DYNAMICS WITH OPTIMIZATION</b>	<b>155</b>
<b>7. Dynamic Programming</b>	<b>157</b>
7.1 Deterministic principle of optimality	157
7.2 Stochastic principle of optimality	166
7.3 Optimal LQ control with perfect observation	168
7.4* Optimal LQG control with imperfect observation	172
<b>8. Applications of Dynamic Programming</b>	<b>174</b>
8.1 Optimal saving	174
8.2 One-sector optimal accumulation	178
8.3* Multisector optimal accumulation	183
8.4 The great fish war	186
<b>9. Optimal Control</b>	<b>191</b>
9.1 Basic problem	191
9.2 Calculus of Variations	197
9.3 Supplements	201
<b>10. Optimal Consumption Paths</b>	<b>208</b>
10.1 Exogenous wage and interest	208
10.2 Endogenous wage and interest: infinite horizon	213
10.3 Constant capital-output ratio: finite horizon	218

PART III. SUPPLEMENTS	227
Appendix A. Linear Algebra	229
Appendix B. Overlapping Generations	240
Appendix C. Overlapping Cohorts	253
C.1 An exchange economy	253
C.2 Steady states	262
C.3 Dynamics with rational expectations	266
C.4 Dynamics with naive expectations	275
Solutions	283
References	295
Index of subjects	310
