Preface	VII
Contents	IX
List of tables	XIII
List of figures	XV
List of boxes	XVI
PART I Introduction and overview	1
1 Purpose and method	
1.1 Introduction	3
1.2 Labour market and public-finance trends in the Netherlands	5
1.3 The history of MIMIC and the interaction with the policy debate	11
1.4 Methodological aspects of MIMIC	17
1.5 The structure of MIMIC	22
1.6 How to read this book	30
2 MINI-MIMIC: A core representation of MIMIC	
2.1 Household behaviour	35
2.2 Firm behaviour	39
2.3 Equilibrium on the labour market	41
2.4 The public sector	43
2.5 Calibration	44
2.6 Simulation results	45
2.7 Conclusion	49
3 From MINI-MIMIC to MIMIC	
3.1 Introduction	51
3.2 More economic mechanisms and institutions	51
3.3 Higher degree of disaggregation	55
3.4 Links between submodels and exogenous inputs	63

PART II	Model structure of MIMIC	69
4	Household behaviour: Labour supply and consumption	
4.1	Introduction	71
4.2	The allocation of time	71
4.3	The allocation of consumption	78
4.A	The distribution of labour supply over different options	84
5	Household behaviour: Training and job search	
5.1	Introduction	87
5.2	Training and schooling	87
5.3	Search strategies of the unemployed	94
5.4	Welfare analysis	103
6	Firm behaviour	
6.1	Introduction	105
6.2	Output markets and price setting	105
6.3	The demand for production factors	108
6.4	Selection of applicants, grey labour and supply of child care	115
7	Equilibrium on the labour market	
7.1	Introduction	119
7.2	Wage bargain between employers' organizations and unions	121
7.3	Allocation of inactivity to unemployment and disability	127
7.4	The matching process and unemployment duration	131
7.5	Equilibrium on the black market	137
8	The public sector	
8.1	Introduction	139
8.2	Public revenues and outlays	139
8.3	The 1998 system of income taxes and social premiums	143
9	Data sources, historical and base path and reduced-form elasticities	
9.1	Introduction	151
9.2	Data sources and construction of the base year	152
9.3	Historical analysis	157
9.4	The base projection	165
9.5	The reduced form of MIMIC	169

PART III	Simulation results	173
10	Across s-the-board tax policies	
10.1	Introduction	175
10.2	Simulations on single tax parameters	176
10.3	Comparison with results from other models	184
10.4	Sensitivity analysis	186
10.5	Conclusions	196
11	Earned income tax credit	
11.1	Introduction	199
11.2	The EITC in the US	199
11.3	An EITC in the Netherlands	206
11.4	Sensitivity analysis	217
11.5	Conclusions	220
12	Vouchers and payroll tax cuts for the unskilled	
12.1	Introduction	223
12.2	Deadweight costs, displacement and substitution: theoretical notions	224
12.3	Evaluation studies	225
12.4	Model simulations with MIMIC	231
12.5	Sensitivity analysis	241
12.6	Conclusions	243
13	Child care subsidies	
13.1	Introduction	245
13.2	The child care market in the Netherlands	246
13.3	An overview of the model mechanisms	248
13.4	Simulation results	251
13.5	Sensitivity analysis	260
13.6	Comparison with other research	264
13.7	Conclusions	267
14	MIMIC at work: Tax reform in the Netherlands	
14.1	Introduction	269
14.2	White paper: Taxes in the 21 st century	270
14.3	From white paper to tax reform	282
14.4	Sensitivity analysis	289
14.5	Towards a flat tax?	292

15	Simulation results: Summing up	
15.1	Introduction	299
15.2	Modelling lessons: Comparing MINI-MIMIC with MIMIC	299
15.3	Policy lessons	304
15.4	Sensitivity analysis	306
	References	309
	Name index	321
