

Fossil Fuels in a Changing Climate

Impacts of the Kyoto Protocol and
Developing Country Participation

ULRICH BARTSCH and BENITO MULLER

1 Introduction

PART I The Setting

2	The Kyoto Protocol	9
2.1	Introduction	9
2.2	The Road to Kyoto	9
2.3	Bubbles, Baskets and Banking	16
2.4	Sinks: Land-use Change and Forestry (LUCF)	21
2.5	Mechanisms for International Transfer	24
3	Oil Production Capacity and Supplies	
3.1	Introduction	34
3.2	Capacity versus Reserves	34
3.3	Time Lags and Shocks	37
3.4	Producers' Policies	38
3.5	Geological Potential	39
3.6	Prospects of Capacity Expansion by Country	40
3.7	A Base-Case Projection of Oil Production Capacity	45
3.8	Conclusions	48
4	Methodology and 'Business-as-Usual' Projections	50
4.1	Introduction	50
4.2	The Oxford Model for Climate Policy Analysis (CLIMOX)	50
4.3	Regions and Economic Sectors	52
4.4	Economic Growth	53

4.5	Fossil Fuel Production and Demand	54
4.6	Emission Projections	61
Annex		
	List of Countries Included in the Regions of the Model	62

PART II Methodology and Assumptions

5	The Oxford Model for Climate Policy Analysis (CLIMOX)	69
5.1	Introduction	69
5.2	The GTAP Equilibrium Model	69
5.3	Adjusting GTAP	74
5.4	The CLIMOX Equations	76
5.5	Dynamic Macro-Economic Structure	79
5.6	Alternative Energy	87
5.7	Policy Simulations: Taxes and Flexibility Mechanisms in the CLIMOX Model	89
6	Technological Change and Energy Intensity	94
6.1	Introduction	94
6.2	Technological Progress	95
6.3	Energy Efficiency Across Regions in a Macro-economic Framework	108
6.4	Conclusions	121
7	Coal and its Future	123
7.1	Introduction	123
7.2	Coal Availability and Supply	123
7.3	The Demand for Coal	130
7.4	Conclusions	133
8	Natural Gas •	135
8.1	Introduction	135
8.2	Natural Gas Availability and Supply	135
8.3	The Demand for Gas	143
8.4	Conclusions	147
9	Anthropogenic Greenhouse Gas Emissions	148
9.1	Introduction	148
9.2	Carbon Dioxide Emissions	149

9.3	Methane Emissions	150
9.4	Energy Emission Projections	156

PART III Policy Scenarios and Simulation Results

10	The Kyoto Scenario: Description	161
10.1	Introduction	161
10.2	Greenhouse Gas Policies of the Annex I Regions	164
10.3	Summary of the Model Assumptions	184
11	The 'Most Likely' Kyoto Scenario: Implications	186
11.1	Introduction	186
11.2	Emission Reductions	187
11.3	Impacts on the Fossil Fuel Markets	194
11.4	Sectoral Demand for Fossil Fuels	204
11.5	Oil Revenues	211
11.6	Concluding Remarks	212
12	The Impact of Specific Policy Instruments	214
12.1	Introduction	214
12.2	National Carbon Taxes or Emission Quotas	214
12.3	Energy Taxes	218
12.4	International Emissions Trading	221
12.5	Energy Prices	223
12.6	Concluding Remarks	224
13	The Global Compromise Scenario	226
13.1	Introduction	226
13.2	The Global Compromise Regime	226
13.3	Emission Reductions, Emission Trading and the 'Hot Air Problem'	234
	Annex	
	Detailed Analysis of the Global Compromise Regime	246
14	The Implications of a New Climate Change Agreement (the Global Compromise Scenario)	266
14.1	Introduction	266
14.2	Energy Prices	267
14.3	Impacts on the Fossil Fuel Markets	268
14.4	Sectoral Demand for Fossil Fuels	273

14.5	Oil Revenues	277
14.6	Concluding Remarks	279
15	Sensitivity Analysis	280
15.1	Introduction	280
15.2	Inflexible Oil Supplies	281
15.3	High Level of Oil Availability	283
15.4	High Economic Growth Scenario	285
15.5	Changes in Elasticity Parameters	287
15.6	Unrestricted 'Hot Air' and Surplus Permit Supply	290
15.7	Concluding Remarks	295
16	Comparison with Other Studies	297
16.1	Introduction	297
16.2	Modelling Approaches	298
16.3	Emission Abatement Costs	300
16.4	Modelling Effects of Climate Policies on Oil Markets	306
17	Summary and Conclusions	311
17.1	Methodology	311
17.2	Scenarios for Policy Analysis	312
17.3	Emission Reductions	314
17.4	Fossil Fuel Markets	315
17.5	Oil Revenues and Instrument Choice	317
17.6	Emission Trading and Excess Permits	319
17.7	A New Global Climate Change Agreement	319
17.8	Non-energy Emission Abatement and Sinks	320
17.9	Policy Implications	321
	Appendices	327
	Index	353
