Contents

Foreword.....	xi
Preface.....	xiii
List of Tables.....	xv
List of Figures.....	xvii
 Chapter 1 Introduction.....	 1
 Part I Which macroeconomic policy is most effective to reduce unemployment in the short run?.....	 11
 Chapter 2 Unemployment in a small macroeconomic disequilibrium model.....	 13
2.1 Introduction.....	13
2.2 Aggregation over micro markets.....	14
2.3 The theoretical model.....	21
2.4 The empirical model.....	23
2.5 Estimation of the model.....	28
2.6 Estimation results.....	30
2.7 ZOEM with disequilibrium model.....	38
2.8 ZOEM with and without the disequilibrium model; a comparison.....	44
2.9 Post-sample performance.....	46
2.10 In conclusion.....	53
2.a ZOEM, a small model for the Dutch economy.....	53
2.b Data.....	57
2.c Derivations.....	59
2.d Simulation base.....	63
2.e Definitions.....	64
 Part II Why did unemployment hit low-skilled labour so much harder? ...	 67
 Chapter 3 Structural changes in the demand for labour.....	 69
3.1 Introduction.....	69
3.2 The model.....	70
3.3 Factor demand and factor prices between 1969 and 1993.....	74

3.4	Results	76
3.5	Summary and conclusions	83
3.a	Definitions and data used	84
3.b	Estimation results	90
3.c	Decomposition in between- and within components....	91
3.d	Definitions	92
Part III	What explains persistent unemployment?	95
Chapter 4	Equilibrium unemployment in a small theoretical model	97
4.1	General outline	97
4.2	The behaviour of the agents	99
4.3	The markets	103
4.4	The equilibrium	105
4.5	Conclusions	113
4.a	Derivations	114
4.b	Substitution between labour and capital	120
4.c	Definitions	121
Chapter 5	Exports	123
5.1	Introduction	123
5.2	A theoretical model	125
5.3	Data	129
5.4	Econometric analyses	133
5.5	Conclusions	143
5.a	Data	144
5.b	Weak exogeneity	145
5.c	The implications of measurement errors	146
5.d	The influence of the competitor price on price setting ..	148
5.e	Definitions	148
Chapter 6	Imports	149
6.1	Introduction	149
6.2	A theoretical model for imports	150
6.3	Data	154
6.4	Econometric analyses	156
6.5	Conclusions	163
6.a	Derivation of the theoretical model	164
6.b	Data	167
6.c	Definitions	168
Chapter 7	Consumption	171
7.1	Introduction	171

7.2	The theoretical model	174
7.3	Estimation results	180
7.4	Simulation experiments	183
7.5	Conclusion	187
7.a	Data	188
7.b	Derivations	192
7.c	Definitions	199
Chapter 8	Wages, prices and factor demand	201
8.1	Introduction	201
8.2	The model	204
8.3	Data	209
8.4	Estimation	211
8.5	Conclusions	220
8.a	Capital demand and investments	221
8.b	Data	224
8.c	Test procedure	229
8.d	Definitions	230
Chapter 9	The equilibrium unemployment rate in a small econometric model	233
9.1	Introduction	233
9.2	A small econometric model for the Dutch economy....	234
9.3	Dynamic properties	238
9.4	Simulations	241
9.5	The equilibrium rate of unemployment	247
9.6	Conclusions	253
9.a	The econometric model	255
9.b	Definitions and data	263
	References	267
	Name Index	279
