Contents

List of Figures	5
List of Tables	6
Acknowledgement	9
1 Introduction	11
2 Job matching across occupational labour markets	19
2.1 Introduction	21
2.2 Motivation and theoretical framework	22
2.3 Data	27
2.4 Empirical strategy and results	28
2.4.1 An occupational "topology"	28
2.4.2 Estimation approach and results	30
2.4.3 Pooled OLS and FE estimators	31
2.4.4 Stationarity and the pooled mean-group model	34
2.5 Conclusions	37
2.A Appendix to chapter 2	39
2.A.1 Observing occupational changes in administrative data	39
2.A.2 Theoretical model	42
2.A.3 Additional information tables	49
2.A.4 Construction of the occupational segments	55
2.A.5 Real GDP and the proportion of all vacancies that are registered vacancies	60
2.A.6 Additional empirical results	62
2.A.7 Hadri's LM test	64
2.A.8 Maximum likelihood estimation	64
2.A.9 Falsification test on the weight matrix	65
3 Revisiting German labour market reform effects – a panel data analysis for occupational labour markets	69
3.1 Introduction	71
3.2 Labour market reforms and job matching	73
3.2.1 <i>Hartz</i> reforms, organisational changes, and organisational outcomes	73
3.2.2 Random matching	74
3.3 Data	77
3.4 Empirical strategy and results	79
3.4.1 Aggregated estimations	79
3.4.2 Occupational labour markets	82

3.5	Validity and robustness checks	90
3.5.1	Another theoretical perspective: selective search	90
3.5.2	Aggregated data	98
3.6	Conclusions	98
3.A	Appendix to chapter 3	100
3.A.1	Occupational labour markets	100
3.A.2	Effect coding	109
3.A.3	Further empirical results	110
4	Identifying the Employment Effect of Invoking and Changing the Minimum Wage: A Spatial Analysis of the UK	119
4.1	Introduction	121
4.2	Data	126
4.2.1	The employment variable	127
4.2.2	Measuring the National Minimum Wage	127
4.2.3	Modelling conditional and compositional covariates	128
4.2.4	Modelling the spatial nature of labour markets	129
4.2.5	Measuring the recession	131
4.2.6	The logic of identification from the data	132
4.3	Methodology and identification	135
4.3.1	Invoking and change of the National Minimum Wage	135
4.3.2	Basic identification issues	138
4.3.3	Modelling spatial dependencies	139
4.3.4	Dynamics	143
4.4	Results	145
4.5	Conclusions	153
4.A	Appendix to chapter 4	157
4.A.1	Data	157
4.A.2	Spatial autocorrelation in the residuals	162
4.A.3	Lagrange multiplier tests for spatial specification	162
4.A.4	Weight matrix in spatial specifications	168
4.A.5	Specification tests for the SGMM model	168
4.A.6	SEMP specifications without the GVA variable	171
4.A.7	Restricted geography sample	172
4.A.8	Alternative variable: proportion of workers paid at or below the minimum wage	172
5	General conclusions	179
	Bibliography	183
	Abstract	193
	Kurzfassung	195
