COOPERATION AND CONFLICTS IN  
HIGH SEAS FISHERIES

HELSINKI SCHOOL OF ECONOMICS AND  
BUSINESS ADMINISTRATION

ACTA UNIVERSITATIS OECONOMICAE HELSINGIENSIS

# CONTENTS

<b>1</b>	<b>INTRODUCTION</b>	<b>1</b>
1.1	Management Regimes of High Seas Fisheries	1
1.2	Objectives and Methodology	3
1.2.1	Terminology of High Seas Fish Stocks	3
1.2.2	Objectives	3
1.2.3	Methodology	4
1.3	Modelling Cooperation and Conflicts in Fisheries	7
1.3.1	Management of High Seas Fisheries	8
1.3.2	Cooperative Game Theory in Fisheries Economics	10
1.3.3	Other Models of Game Theory and Fisheries Economics	12
1.4	Summary of the Results	16
	<b>REFERENCES</b>	<b>24</b>
	<b>I THE MANAGEMENT OF HIGH SEAS FISHERIES</b>	<b>32</b>
<b>1</b>	<b>Introduction</b>	<b>33</b>
<b>2</b>	<b>The Economic Theory of Fishery</b>	<b>35</b>
2.1	Sole-owner Fishery	35
2.2	Open-access Common-property Fishery	37
2.3	Multi-agent Fishery - the Case of Shared Fish Stocks	37
<b>3</b>	<b>The Revised United Nations Law of the Sea Agreement and Possible Regional Arrangements for the Management of Highly Migratory and Straddling Fish Stocks</b>	<b>41</b>
<b>4</b>	<b>The Norwegian Spring-spawning Herring</b>	<b>43</b>
<b>5</b>	<b>Conclusions</b>	<b>46</b>

<b>II ECONOMIC AND BIOLOGICAL RISK ANALYSIS OF THE NORWEGIAN SPRING-SPAWNING HERRING</b>	<b>51</b>
<b>1 Introduction</b>	<b>52</b>
<b>2 Bioeconomic Model</b>	<b>53</b>
2.1 Description of the Model	54
2.1.1 Population Dynamics	54
2.1.2 Recruitment	55
2.1.3 Catch	55
2.1.4 Economic Yield	56
2.2 Equilibrium Study	57
<b>3 Data</b>	<b>60</b>
<b>4 Risk Analysis</b>	<b>60</b>
4.1 Risk Assessment Method	61
4.2 Biological Risk	62
4.3 Economic Risk	63
4.4 Price Influence on the Economic Risk	64
4.5 Discussion	65
<b>5 Conclusion and Perspectives</b>	<b>66</b>
<b>III SHARING THE BENEFITS OF COOPERATION IN THE NORWEGIAN SPRING-SPAWNING HERRING FISHERY</b>	<b>81</b>
<b>1 Introduction</b>	<b>82</b>
<b>2 Model</b>	<b>84</b>
2.1 Biological Model	84
2.2 Game-theoretic Model	85
<b>3 Shapley Value in Time</b>	<b>90</b>
<b>4 Benefit Sharing under Uncertainty</b>	<b>95</b>
4.1 Effect of Biological Uncertainty	95
4.2 Modifying Full Cooperation Strategy	98
4.3 Price Uncertainty	99
<b>5 Conclusions</b>	<b>101</b>

<b>IV NASH EQUILIBRIA FOR A COALITIONAL GAME OF ATLANTO-SCANDIAN HERRING</b>	<b>103</b>
1 Introduction	104
2 The Bioeconomic Model	106
3 Coalitional Game of Herring	110
3.1 The Case of Efficient Fleets	111
3.2 The Case of Inefficient Fleets	115
4 On the New Member Problem	118
5 Conclusions	119
<b>V WHEN TO SIGN AN ENVIRONMENTAL AGREEMENT: THE CASE OF HIGH SEAS FISHERIES</b>	<b>123</b>
1 Introduction	124
2 Model Framework	125
3 Optimal Timing of a Fisheries Agreement	128
4 Simulation Results	132
5 Conclusions	140
<b>VI RESTRICTED COALITIONS IN THE MANAGEMENT OF REGIONAL FISHERIES ORGANISATIONS</b>	<b>142</b>
1 Introduction	143
2 Basic C-game Model of High Seas Fisheries	146
3 Coastal States versus Distant Water Fishing Nations	150
3.1 Restricted Coalitions	150
3.2 On Stability	160
4 Increasing the Number of Players	162
5 Discussion	164

**VH SHARING THE BENEFITS OF COOPERATION IN HIGH SEAS  
FISHERIES: A CHARACTERISTIC FUNCTION GAME APPROACH**

- 1 Introduction**
- 2 The Economics of Fisheries Conservation and Management**
- 3 Games and High Seas Fisheries**
- 4 Applying Characteristic Function Games to Straddling and  
Highly Migratory Stocks**
- 5 Searching for a Fair Solution: The Nucleolus and Shapley Value**
  - 5.1 The Nucleolus**
  - 5.2 The Shapley Value**
- 6 Discussion**
