the essence of knowledge

Boston - Delft

Contents

1 I	ntroduction	1
2 8	Static Spatial Panels — Fixed Effects Models	13
2.1 2.2	A Spatial Panel Model with Individual Effects A Spatial Panel Model with Both Individual	13
	and Time Effects	20
2.3	A General Spatial Panel Model with Space Time Filters	25
3 8	Static Spatial Panels — Random Effects Models	33
3.1	Random Individual Effects	35
3.2	The Hausman Specification Test	40
3.3	The Long Panel Case with Time Effects	42
3.4	Monte Carlo Results	45
4 \$	Spatial Dynamic Panels — Stable Models with	
]	Fixed Effects	47
4.1 4.2	A Spatial Dynamic Panel Model with Individual Effects A Spatial Dynamic Panel Model with	48
4.3	Time Varying W_{nt} A Spatial Dynamic Panel Model with Both	51
	Individual and Time Effects	56
4.4	GMM Estimation	61

5 S	Spatial Dynamic Panels — Unstable Models with Fixed Effects	79
5.1	Unit Roots in Spatial Panels	80
5.2	Spatial Cointegration	85
5.3	Estimation of Models with Explosive Roots	93
6 9	Some Empirical Applications	99
6.1	Regional Growth	99
6.2	Market Integration	101
7 (Conclusions	103
AS	Some Basic Technical Theorems and Proofs	105
A.1	Basic Technical Theorems	105
A.2	Theorems for Some Statistics for a	
	General Spatial Panel Model	130
B Notations		135
B.l	Notations for Static Spatial Panels —	
	Fixed Effects Models	136
B.2	Notations for Static Spatial Panels —	
	Random Effects Models	143
B.3	Notations for Spatial Dynamic Panels —	
	Stable Models with Fixed Effects	149
B.4	Notations for Spatial Dynamic Panels -	
	Unstable Models with Fixed Effects	154
