

A Unified Theory of Party Competition

**A Cross-National Analysis Integrating Spatial
and Behavioral Factors**

JAMES F. ADAMS

1 Modeling Party Competition	1
1.1 Introduction to the Unified Theory of Party Competition	1
1.2 Data and Methodology	5
1.3 Justifying Our Theoretical Focus: Why Assume a Unified Model of Party Competition with Vote-Maximizing Parties?	6
1.4 Plan of the Book	10
2 How Voters Decide: The Components of the Unified Theory of Voting	15
2.1 Introduction	15
2.2 The Policy-Only Model	16
2.3 Nonpolicy Factors: The Unified Model	19
2.4 The Unified Discounting Model	23
2.5 Discussion	26
3 Linking Voter Choice to Party Strategies: Illustrating the Role of Nonpolicy Factors	28
3.1 Introduction	28
3.2 The Logic of Policy Competition in the Unified Spatial Model: Illustrative Examples of How Nonpolicy Considerations Matter	31

3.3	Party Competition and the Concept of Equilibrium in Policy Strategies	40
3.4	Empirical Application to the 1988 French Presidential Election	46
4	Factors Influencing the Link between Party Strategy and the Variables Affecting Voter Choice: Theoretical Results	52
4.1	Introduction	52
4.2	The Model	53
4.3	Centrifugal Incentives for Candidate Strategies	57
4.4	An Empirical Illustration	63
4.5	Robustness of Equilibrium Positions to the Salience of Partisanship	67
4.6	Discussion	70
5	Policy Competition under the Unified Theory: Empirical Applications to the 1988 French Presidential Election	72
5.1	Introduction	72
5.2	The Context of the 1988 French Presidential Election	73
5.3	Candidate Competition under the Policy-Only Model	77
5.4	Candidate Competition under a Unified Model with Nonpolicy Factors	79
5.5	Candidate Competition under a Unified Discounting Model	85
5.6	Conclusion	93
6	Policy Competition under the Unified Theory: Empirical Applications to the 1989 Norwegian Parliamentary Election	94
6.1	Introduction	94
6.2	Ideology and Policy Issues in the 1989 Parliamentary Election	96
6.3	Party Competition in the Policy-Only Model	99
6.4	Party Competition in the Unified Model	102
6.5	Party Competition in a Unified Discounting Model	105
6.6	Coalition-Seeking Motivations	111
6.7	Conclusion	116

7 The Threat of Abstention: Candidate Strategies and Policy Representation in U.S. Presidential Elections	117
7.1 Introduction	117
7.2 Incorporating the Turnout Decision into the Unified Voting Model	120
7.3 Candidate Strategies under the Unified Turnout Model: Illustrative Arguments	123
7.4 Conclusion	130
8 Candidate Strategies with Voter Abstention in U.S. Presidential Elections: 1980,1984,1988,1996, and 2000	132
8.1 Introduction	132
8.2 Hypotheses on Voting Behavior and Candidate Strategies under the Unified Turnout Model	133
8.3 Candidate Competition in the 1988 American Presidential Election	134
8.4 Unified Turnout Models for the 1980, 1984, 1988, 1996, and 2000 U.S. Presidential Elections	142
8.5 Candidate Equilibrium under the Unified Turnout Model	144
8.6 The Unified Turnout Model with Policy Discounting	147
8.7 Discussion	150
9 Policy Competition in Britain: The 1997 General Election	152
9.1 Introduction	152
9.2 Ideology and Policy Issues in the 1997 General Election	154
9.3 Party Competition under the Policy-Only Model	156
9.4 Party Competition under the Unified Model	160
9.5 Party Competition under a Unified Turnout Model: The Strategic Effects of Abstention due to Alienation	164
9.6 Conclusion	168
10 The Consequences of Voter Projection: Assimilation and Contrast Effects	170
10.1 Introduction	170
10.2 Data Analysis	171
10.3 Discussion	182

11 Policy-Seeking Motivations of Parties in Two-Party Elections: Theory	184
11.1 Introduction	184
11.2 Spatial Models with Full Information: How Valence Advantages Motivate Divergence between Policy-Seeking Candidates	187
11.3 A Policy-Seeking Model with Incomplete Information, Part 1: The Effects of Uncertainty about the Impact of Valence Issues	188
11.4 A Policy-Seeking Model with Incomplete Information, Part 2: The Effects of Uncertainty about the Voter Distribution	195
11.5 Conclusion	199
12 Policy-Seeking Motivations of Parties in Two-Party Elections: Empirical Analysis	201
12.1 Introduction	201
12.2 Equilibrium Strategies under Electoral Certainty	204
12.3 Modeling Election Uncertainty over Valence Issues in Empirical Applications	208
12.4 Candidate Equilibria under Valence-Related Election Uncertainty	212
12.5 Equilibria under Policy-Related Uncertainty: Application to France	222
12.6 Discussion	225
13 Concluding Remarks	227
13.1 Introduction	227
13.2 Evaluating the Unified Model: Does It Satisfactorily Explain Party Behavior?	232
13.3 Directions for Future Research	234
13.4 Final Remarks	239
Appendix 1.1 Literature Review: Work Linking Behavioral Research to Spatial Modeling	241
Appendix 2.1 Alternative Statistical Models of Voter Choice	245
Appendix 2.2 Controversies in Voting Research: The Electoral Impact of Party Identification	247

Appendix 2.3 Relationship between the Unified Discounting Model and the Directional Model of Rabinowitz and Macdonald	251
Appendix 3.1 Spatial Models That Incorporate Valence Dimensions of Candidate Evaluation	254
Appendix 4.1 Uniqueness Theorem and Algorithm for Computing Nash Equilibria	258
Appendix 4.2 Proof of Theorem 4.1	263
Appendix 4.3 Simulation Analysis and an Approximation Formula for Nash Equilibria	265
Appendix 4.4 Derivations of Formulas Relating Electoral Factors to the Shrinkage Factor, c_k	268
Appendix 6.1 Equilibria for Outcome-Oriented Motivations: The Kedar Model	270
Appendix 7.1 Proof of Lemma 7.1	275
Appendix 7.2 Derivations for the Unified Turnout Model	277
Appendix 8.1 Coding and Model Specifications	279
Appendix 8.2 Alternative Turnout Models	282
Appendix 11.1 Proof of Theorem 11.1	287
Appendix 11.2 Empirical Estimation of the Mean and Standard Deviation of Valence Effects	289
