Preface xiii
List of Sources xxxi

1 Econometric Methods for Modeling Producer Behavior 1
Dale W. Jorgenson
1.1 Introduction 1
1.2 Price Functions 8
1.3 Statistical Methods 20
1.4 Applications of Price Functions 31
1.5 Cost Functions 45
1.6 Applications of Cost Functions 55
1.7 Conclusion 63

2 Empirical Studies of Depreciation 73
Dale W. Jorgenson
2.1 Econometric Models 75
2.2 Studies of Depreciation 81
2.3 Applications 87
2.4 Conclusion 93

3 An Economic Theory of Agricultural Household Behavior 97
Dale W. Jorgenson and Lawrence J. Lau
3.1 Introduction 97
3.2 The Welfare Function 98
3.3 The Utility Functions 108
3.4 The Technology 109
3.5 The Constraints 112
3.6 The Complete Model 115
3.7 An Example of Functional Form Econometric Implementation: Bernoulli Utility Function and Cobb-Douglas Production Function 122

Transcendental Logarithmic Production Frontiers **125**
Laurits R. Christensen, Dale W. Jorgenson, and Lawrence J. Lou
4.1 Introduction 125
4.2 Additivity and Homogeneity 127
4.3 Transcendental Logarithmic Frontiers 134
4.4 Testing the Theory of Production 138
4.5 Empirical Results 146
4.6 Summary and Conclusion 153

The Duality of Technology and Economic Behavior **159**
Dale W. Jorgenson and Lawrence J. Lan
5.1 Introduction 159
5.2 Technology 160
5.3 Economic Behavior 170
5.4 Duality 177
5.5 Conclusion 182
5.6 Historical Note 185

Duality and Differentiability in Production **189**
Dale W. Jorgenson and Lawrence J. Lau
6.1 Introduction 189
6.2 Differentiability 190
6.3 Duality 194
6.4 Production Possibilities 198
6.5 Extensions 202

Efficient Estimation of Nonlinear Simultaneous Equations with Additive Disturbances **209**
Dale W. Jorgenson and Jean-Jacques Laffont
7.1 Introduction 209
7.2 The Model 211
7.3 Cramer-Rao Bound 212
7.4 Minimum Distance 222
7.5 Instrumental Variables 229
7.6 Efficiency 232

Tests of a Model of Production for the Federal Republic of Germany, 1950-1973 **241**
Klaus Conrad and Dale W. Jorgenson
8.1 Introduction 241
8.2 Translog Production and Price Functions 242

8.3 Integrability 247
8.4 Monotonicity and Convexity of Translog Functions 249
8.5 Tests of the Theory of Production 252
8.6 Estimation and Test Statistics 255
8.7 Economic Interpretation 260

9 The Structure of Technology: Nonjointness and Commodity Augmentation, Federal Republic of Germany, 1950-1973 267
Klaus Conrad and Dale W. Jorgenson
9.1 Introduction 267
9.2 Translog Production and Price Functions 269
9.3 Nonjointness 273
9.4 Technical Change 277
9.5 Tests 281
9.6 Estimation and Test Statistics 283
9.7 Conclusion 286

10 The Structure of Technology and Changes of Technology over Time, Federal Republic of Germany, 1950-1973 291
Klaus Conrad and Dale W. *Jorgenson*
10.1 Introduction 291
10.2 Separability 295
10.3 Technical Change 298
10.4 Tests 301
10.5 Estimation and Test Statistics 303
10.6 Conclusion 307
10.7 Summary 310

11 Statistical Inference for a System of Simultaneous, Nonlinear, Implicit Equations in the Context of Instrumental Variable Estimation 311
A. Roland Gallant and Dale W. *Jorgenson*
11.1 Introduction 311
11.1 Three-Stage Least-Squares Estimation 313
11.2 The Statistical Model Subject to a Maintained Hypothesis 313
11.3 The Test Statistics *T°:* An Analog of the Likelihood Ratio Test 315
11.4 Regularity Conditions 316
11.5 The Asymptotic Distribution of *T°* 317

11.6 The Test Statistic T^A: The Wald Test . ' 323
11.7 The Asymptotic Distribution of T^A 324
11.8 An Example: The Hypothesis of Symmetry 326
11.11 Two-Stage Least-Squares Estimation 329
11.9 The Statistical Model 329
11.10 The Test Statistic $T°$: An Analog of the Likelihood Ratio Test 330
11.11 Regularity Conditions 331
11.12 The Asymptotic Distribution of r° 332
11.13 The Test Statistics 7^: The Wald Test 333
11.14 The Asymptotic Distribution of T 333
11.15 An Example: The Hypothesis of Homogeneity 334
Appendix 335

12 Relative Prices and Technical Change 341
Dale W. Jorgenson and Barbara M. Fraumeni
12.1 Introduction _ 341
12.2 Econometric Models 344
12.3 Empirical Results 354
12.4 Conclusion 369

13 Relative Price Changes and Biases of Technical Change in Japan 373
Masahiro Kuroda, Kanji Yoshioka, and. Dale W. Jorgenson
13.1 Introduction 373
13.2 Theoretical Framework 379
13.3 Design of Experiment and Data Sources 388
13.4 Estimated Results 392

14 The Role of Energy in Productivity Growth 403
Dale W. Jorgenson
14.1 Introduction 403
14.2 Econometric Models 408
14.3 Summary and Conclusion 437
14.4 Appendix 442

15 Bilateral Models of Production for Japanese and U.S. Industries 457
Dale W. Jorgenson, Masahiro Kuroda, Hikaru Sakuramoto, and Kanji Yoshioka
15.1 Introduction 457

15.2 Theoretical Framework 458
15.3 Empirical Results 462
15.4 Conclusion 472
Appendix A 476
Appendix B 480
