Preface xi
-.Biography and appreciation of Professor David Boyce by Tschangho John Kim xiii
Introduction xv

1. Themes in the development and application of transport planning models 1
Huw C. W.L. Williams
2. A combined distribution, hierarchical mode choice, and assignment network model with,multiple user and mode classes 25
K.I. Wong, S.C. Wong, J.H. Wu, Hai Yang and William U.K. Lam
3. Combined travel forecasting models: formulations and algorithms 43
Hi lie! Bar-Gera and David Boyce
4. Iteration-free microassignment 58
Michael Wegener
5. Cost minimizing behavior in random discrete choice modeling 70
Sven Erlander and Jan T. Lundgren
6. A modified iterative scheme for the equilibrium traffic signal setting problem 83
CI audio Meneguzzer
7. Transport and location effects of a ring road in a city with or without road pricing 113
Lars-Goran Mattsson and Lina Sjolin
8. Optimal integrated pricing in a bi-modal transportation network 134
Hai Yang, Qiang Meng and Timothy D. Han
9. Planning transport network improvements over time 157
Hong K. Lo and W. Y. Szeto
10. Estimating link delays for arterial streets 177
Elliott A. Torres, Peter C. Nelson, Nagui M. Rouphail and Joseph Raj
11. Modeling travel times along signalized streets using expected cumulative counts 210
Andrew P. Tarko and Gopalakrislman Rajaraman
12. System performance in network with parking and/or route information systems 232
William H.K. Lam, K.S. Chan anclB.F. Si
13. Real-time spatiotemporal data mining for short-term traffic forecasting 252
Hongyu Sun, Heng Xiao and Bin Ran
14. On-line traffic assignment and network loading 260
Pitu Mirchandani, Rohit Syal, David Lucas and Yang He

15. Multi-modal routing and navigation cost functions for location-based services (LBS) 278
Tschangho John Kim
16. Supply chain supernetworks with random demands 289
June Dong, Ding Zhang and Anna Nagurney
17. An efficient path-based algorithm for a dynamic user equilibrium problem 314
Huey-Kuo Chen, Hsiao-Chi Peng and Cheng-Yi Chou
18. Numerical experiments with a decision support methodology for strategic traffic management. 337
Torbjorn Larsson, Jan T. Lundgren, Michael Patriksson and Clas Rydergren
19. Free trade and transportation infrastructure in Brazil: towards an integrated approach 365
Paulo Resende, Joaquim J.M. Guilhoto and Geoffrey J.D. Hew ings
20. Accessibility and site rents in the C-economy 380
Ake E. Andersson and David Emanuel Andersson
