Contents

Introduction to the Series vii
Foreword ix
Contributors xiii

Part 1. Complex Dynamics in Non-Linear Aggregated Models

Chapter 1 **A Simple Growth-Cycle Model Displaying "Šil'nikov Chaos"** 3
L. Piscitelli and M.C. Sportelli
1.1 Introduction 4
1.2 The model 5
1.2.1 List of symbols 5
1.2.2 Assumptions and basic equations 6
1.2.2.1 The rate of growth of income 6
1.2.2.2 The share of income saved and the technical progress dynamics 9
1.2.2.3 The expected income rate of growth 15
1.3 The dynamic system 16
1.3.1 The qualitative analysis 16
1.3.2 On the existence of homoclinic orbits 21
1.3.3 On the appearance of multi-circuit homoclinic loops 22
1.3.4 A two-parameter analysis 24
1.4 Concluding remarks 26
Acknowledgements 28
Appendix A 28
Appendix B 29
Appendix C 30

Chapter 2 **Real–Financial Interaction: A Reconsideration of the Blanchard Model with a State-of-Market Dependent Reaction Coefficient** .. 31
C. Chiarella, P. Flaschel and W. Semmler
2.1 Introduction 32
2.2 The model 38
2.2.1 Notation 38
2.2.1.1 Variables 39
2.2.1.2 Parameters 39
2.2.2 The equations of the model 40

2.2.2.1 Algebraic equations 40
2.2.2.2 Dynamic equations 41
2.3 Analysis of the model 42
2.3.1 Reduced form dynamics 43
2.3.2 The IS-curve: $\dot{Y} = 0$ 43
2.3.3 The LM-curve: $\dot{q} = 0$ 44
2.3.4 The positive steady states of the model and local stability issues 45
2.3.5 The dynamics according to the jump variable technique 49
2.4 State-of-market dependent reaction speed—an alternative to the JVT 51
2.4.1 Local stability analysis 53
2.4.2 The qualitative behavior of the financial dynamics—phase diagram switching 56
2.4.3 Some simulations 62
2.5 Conclusions 63
Acknowledgements 65

Chapter 3 Complex Remanence vs. Simple Persistence: Are Hysteresis and Unit-Root Processes Observationally Equivalent? 67
B. Amable, J. Henry, F. Lordon and R. Topol
3.1 Introduction 68
3.2 Weak and strong hysteresis: a fundamentally non-linear model 71
3.2.1 Weak hysteresis: an example of a so-called "hysteron" 72
3.2.2 Strong hysteresis: the aggregation of heterogeneous hysterons 74
3.2.3 Closed form expression of the output 76
3.2.4 Implied probability distribution of the output in the case of random input 79
3.3 Simulations of strong hysteresis: almost no unit-roots? 80
3.3.1 Some illustrations of the implied input–output relations 82
3.3.2 Stationarity tests on the resulting outputs 84
3.4 Summary and conclusions 88
Acknowledgements 89

Chapter 4 Multiple Equilibria, History Dependence, and Global Dynamics in Intertemporal Optimization Models 91
C. Deissenberg, G. Feichtinger, W. Semmler and F. Wirl
4.1 Introduction 92
4.2 Framework and optimality conditions 94
4.3 Thresholds and necessary conditions 97

4.3.1 Convexity and non-concavity 98
4.3.2 Thresholds in concave models 99
4.3.3 Models linear in the control 102
4.3.4 Common features and differences 103
4.3.5 Higher order systems 107
4.4 Numerical methods for detecting Skiba points 109
4.4.1 A numerical example 114
4.5 Economic applications 117
4.5.1 Intertemporal optimization under convex–concave technologies 117
4.5.2 Per capita variables 118
4.5.3 Regulatory economics 119
4.5.4 Models of addiction 119
4.5.5 Monetary policy models 120
4.5.6 Renewable resources 120
4.5.7 Related models 121
4.6 Conclusions 121
Acknowledgements 122

Part 2. Multi-Agent Economies

Chapter 5 On Information-Contagious Behavior 125
N.J. Vriend
5.1 Introduction 126
5.2 The agent-based computational model 127
5.2.1 The basic choice situation 128
5.2.2 Choice dynamics 130
5.2.3 Individual decision making and learning 131
5.3 Analysis of the model 133
5.3.1 Path-dependence and lock-in 134
5.3.2 Performance over time 139
5.3.3 The individual decision rules 148
5.4 Some related literature on information contagion and social learning 151
5.5 Discussion 154
Appendix A 155

Chapter 6 The Origins of the Deadline: Optimizing Communication in Organizations 159
C.H. Papadimitriou and E. Servan-Schreiber
6.1 Introduction 160
6.2 Definitions 162

6.3 Full information regime ... 167
6.3.1 One-level hierarchy ... 170
6.3.2 Two-level hierarchy ... 172
6.3.3 Bounds on the optimal policy ... 174
6.4 Local information regimes ... 174
6.4.1 Asynchronous local information regime ... 175
6.4.2 Synchronous local information regime ... 177
6.5 Open problems ... 180
Acknowledgements ... 181
Appendix: Proof of Lemma 1 and Theorems 4 and 6 ... 181

Chapter 7 Organization of Innovation in a Multi-unit Firm: Coordinating Adaptive Search on Multiple Rugged Landscapes ... 189
M.-H. Chang and J.E. Harrington Jr.
7.1 Introduction ... 190
7.2 Model ... 193
7.2.1 Consumers ... 193
7.2.2 Stores and the chain ... 194
7.2.3 Structure of the landscape ... 195
7.2.4 Innovation ... 196
7.3 Results ... 197
7.3.1 Simulation design ... 198
7.3.2 Benchmark result ... 198
7.3.3 Altering the store's landscape ... 201
7.3.4 Comparative dynamics ... 206
7.4 Concluding remarks ... 211
Appendix A ... 212
Appendix B ... 213

Chapter 8 Patterns of Consumption in a Discrete Choice Model with Asymmetric Interactions ... 215
G. Iori and V. Koulovassilopoulos
8.1 Introduction ... 216
8.2 Discrete choice models ... 218
8.2.1 Stochastic decision rules models ... 218
8.2.2 Glauber dynamics ... 221
8.2.3 Updating rules ... 223
8.2.4 Asymptotic attractors ... 224
8.3 Model ... 225
8.4 Simulations and results ... 227

8.4.1 Fashion good: $M = 1, T = 0, H = 0, C = 0$ 227
8.4.2 Fashion good with memory: $M > 1, T = 0, H = 0, C = 0$ 231
8.4.3 Fashion good with costs: $M \geq 1, T \geq 0, H = 0, C > 0$ 232
8.4.4 Status good: $M = 1, T = 0, H > 0, C > 0$ 233
8.5 Conclusions 235
Acknowledgements 236

Chapter 9 Interaction in Aggregate Demand for Investment and Regime Switching 237
A. Palestrini, D.D. Gatti and M. Gallegati
9.1 Introduction 238
9.2 Investment decisions in a mean-field model 241
9.3 Average investment in self-consistent equilibrium 246
9.4 Estimations using Markov switching models 251
9.5 Conclusions 256

Chapter 10 Speculative Bubbles and Fat-Tail Phenomena in a Heterogeneous Agent Model 259
T. Kaizoji
10.1 Introduction 259
10.2 The model 261
10.2.1 Fundamentalists 261
10.2.2 Chartists 263
10.2.3 Noise traders 263
10.2.4 The adjustment process of the price 264
10.2.5 Strategy switching 265
10.2.6 Deterministic dynamics 265
10.2.7 The local stability conditions 266
10.2.8 Global bifurcations 267
10.2.9 Speculative bubbles 267
10.3 Stochastic dynamics 270
10.3.1 Evolutionary competition 270
10.3.2 Fat-tail phenomenon 270
10.4 Concluding remarks 274
Acknowledgements 275

Chapter 11 Chaotic Price Instability Implies Benefit for Consumers 277
A. Matsumoto
11.1 Introduction 278
11.2 Pure exchange economy 279
11.3 Dynamic model 281

11.3.1 Piecewise linear equation ... 281
11.3.2 Transaction–consumption process ... 282
11.3.3 Density function ... 285
11.4 Long-run average behavior ... 286
11.4.1 Period-1 cycle ... 287
11.4.2 Construction of density function ... 289
11.4.3 The long-run average utility ... 290
11.4.3.1 Period-1 cycle in the tent-shaped case ... 290
11.4.3.2 Period-1 cycle in the check-shaped case ... 292
11.4.4 Preferable price instability ... 294
11.5 Simulation results ... 295
11.6 Concluding remarks ... 297
Acknowledgements ... 298

Part 3. Tâtonnement, Forecasting, and Learning

Chapter 12 A Dynamic Non-Tâtonnement Macroeconomic Model with Stochastic Rationing ... 301
F. Bignami, L. Colombo and G. Weinrich
12.1 Introduction ... 302
12.2 The model ... 303
12.2.1 Timing of the model ... 304
12.2.2 The consumption sector ... 304
12.2.3 The production sector ... 307
12.3 Temporary equilibrium allocations ... 309
12.4 Representation of equilibrium regimes ... 312
12.5 Dynamics ... 315
12.6 Numerical analysis ... 317
12.7 Concluding Remarks ... 326
Acknowledgements ... 326
Appendix A: Lemmas 1 and 2 ... 327
Appendix B: Existence and uniqueness of temporary equilibrium ... 328
Appendix C: The complete dynamic system ... 329
C.1 Keynesian unemployment system ... 330
C.2 Repressed inflation system ... 330
C.3 Classical unemployment system ... 331

Chapter 13 Expectational Leads in Economic Dynamical Systems ... 333
V. Böhm and J. Wenzelburger
13.1 Introduction ... 334
13.2 The general setting ... 335

13.3 Perfect foresight with expectational leads ... 338
13.4 The existence of perfect forecasting rules ... 341
13.5 Perfect-foresight dynamics ... 343
13.6 Two special cases ... 346
13.6.1 Linear models ... 346
13.6.2 Models of the Cobweb type ... 349
13.7 Perfect foresight in exchange economies ... 350
13.8 Equilibrium growth with perfect foresight ... 354
13.9 Conclusions ... 360
Acknowledgements ... 361

Chapter 14 Dynamics of Beliefs and Learning Under a_L-Processes—The Homogeneous Case ... 363
C. Chiarella and X.-Z. He
14.1 Introduction ... 364
14.2 Homogeneous beliefs and learning ... 366
14.3 Dynamics of homogeneous recursive L-processes ... 370
14.3.1 Local stability ... 370
14.3.2 Bifurcation analysis ... 371
14.4 Dynamics of general homogeneous $\mathbf{a}_L$-processes ... 372
14.4.1 Stability and bifurcation of the $\mathbf{a}_2$-process ... 374
14.4.1.1 Local stability ... 374
14.4.1.2 Bifurcation analysis ... 375
14.4.2 Stability and bifurcation of the $\mathbf{a}_3$-process ... 376
14.4.3 Remark ... 378
14.5 Cobweb dynamics with homogeneous learning process ... 381
14.5.1 The homogeneous recursive process ... 381
14.5.2 The homogeneous $\mathbf{a}_2$-process ... 384
14.5.3 The homogeneous $\mathbf{a}_3$-process ... 386
14.6 Conclusion ... 388
Acknowledgements ... 389
Appendix A ... 389
A.1 Rouche's theorem ... 389
A.2 Proof of Proposition 4.1 ... 390
A.3 Proof of Proposition 4.3 ... 390

Chapter 15 Genetic Learning of Nash Equilibria in Illicit Drug Markets and Prerequisites for a Successful Crackdown ... 391
D.A. Behrens and H. Dawid
15.1 Introduction ... 392
15.2 The model ... 393
15.2.1 The fitness of police ... 394

15.2.2 The fitness of dealers ... 396
15.3 The structure of a simple genetic algorithm ... 398
15.4 Results of numerical simulations ... 401
15.4.1 Description of the simulation setup ... 401
15.4.2 Unrestricted learning ... 402
15.4.2.1 The effect of the constraint on enforcement measures e_{max} ... 404
15.4.2.2 The effect of the minimum income level of availability a_{min} ... 405
15.4.3 Successful crackdowns ... 406
15.5 Conclusion ... 408
Acknowledgements ... 410

Chapter 16 The Dynamics of the Linear Random Farmer Model ... 411
R. Carvalho
16.1 Introduction ... 411
16.2 The model ... 415
16.2.1 The market impact function ... 415
16.2.2 The market metaphor ... 416
16.2.3 The strategies ... 416
16.3 Value investors only ... 417
16.4 Trend followers and value investors trading on the critical point ... 420
16.5 Discussion ... 425
Acknowledgements ... 426
Appendix A ... 426
Appendix B ... 427
Appendix C ... 429

Bibliography ... 431

Subject Index ... 457
