

Reasoning about Uncertainty

Joseph Y. Halpern

The MIT Press
Cambridge, Massachusetts
London, England

Contents

	Preface	xiii
1	Introduction and Overview	1
1.1	Some Puzzles and Problems	1
1.2	An Overview of the Book	4
	Notes	10
2	Representing Uncertainty	11
2.1	Possible Worlds	12
2.2	Probability Measures	14
2.2.1	Justifying Probability	17
2.3	Lower and Upper Probabilities	24
2.4	Dempster-Shafer Belief Functions	32
2.5	Possibility Measures	40
2.6	Ranking Functions	43
2.7	Relative Likelihood	45
2.8	Plausibility Measures	50
2.9	Choosing a Representation	54
	Exercises	56
	Notes	64
3	Updating Beliefs	69
3.1	Updating Knowledge	69
3.2	Probabilistic Conditioning	72
3.2.1	Justifying Probabilistic Conditioning	77

3.2.2	Bayes' Rule	79
3.3	Conditioning with Sets of Probabilities	81
3.4	Evidence	84
3.5	Conditioning Inner and Outer Measures	89
3.6	Conditioning Belief Functions	92
3.7	Conditioning Possibility Measures	95
3.8	Conditioning Ranking Functions	97
3.9	Conditioning Plausibility Measures	97
3.9.1	Constructing Conditional Plausibility Measures	99
3.9.2	Algebraic Conditional Plausibility Spaces	101
3.10	Jeffrey's Rule	105
3.11	Relative Entropy	107
	Exercises	110
	Notes	116
4	Independence and Bayesian Networks	121
4.1	Probabilistic Independence	121
4.2	Probabilistic Conditional Independence	124
4.3	Independence for Plausibility Measures	126
4.4	Random Variables	129
4.5	Bayesian Networks	132
4.5.1	Qualitative Bayesian Networks	132
4.5.2	Quantitative Bayesian Networks	135
4.5.3	Independencies in Bayesian Networks	139
4.5.4	Plausibilistic Bayesian Networks	141
	Exercises	143
	Notes	146
5	Expectation	149
5.1	Expectation for Probability Measures	150
5.2	Expectation for Other Notions of Likelihood	153
5.2.1	Expectation for Sets of Probability Measures	153
5.2.2	Expectation for Belief Functions	155
5.2.3	Inner and Outer Expectation	159
5.2.4	Expectation for Possibility Measures and Ranking Functions	161
5.3	Plausibilistic Expectation	162

5.4	Decision Theory	164
5.4.1	The Basic Framework	164
5.4.2	Decision Rules	166
5.4.3	Generalized Expected Utility	170
5.5	Conditional Expectation	176
	Exercises	177
	Notes	185
6	Multi-Agent Systems	189
6.1	Epistemic Frames	190
6.2	Probability Frames	193
6.3	Multi-Agent Systems	196
6.4	From Probability on Runs to Probability Assignments	201
6.5	Markovian Systems	205
6.6	Protocols	207
6.7	Using Protocols to Specify Situations	210
6.7.1	A Listener-Teller Protocol	210
6.7.2	The Second-Ace Puzzle	213
6.7.3	The Monty Hall Puzzle	216
6.8	When Conditioning Is Appropriate	217
6.9	Non-SDP Systems	221
6.10	Plausibility Systems	231
	Exercises	232
	Notes	235
7	Logics for Reasoning about Uncertainty	239
7.1	Propositional Logic	240
7.2	Modal Epistemic Logic	243
7.2.1	Syntax and Semantics	244
7.2.2	Properties of Knowledge	245
7.2.3	Axiomatizing Knowledge	249
7.2.4	A Digression: The Role of Syntax	251
7.3	Reasoning about Probability: The Measurable Case	254
7.4	Reasoning about Other Quantitative Representations of Likelihood	260
7.5	Reasoning about Relative Likelihood	263
7.6	Reasoning about Knowledge and Probability	268

7.7	Reasoning about Independence	271
7.8	Reasoning about Expectation	273
7.8.1	Syntax and Semantics	273
7.8.2	Expressive Power	274
7.8.3	Axiomatizations	275
	Exercises	278
	Notes	283
8	Beliefs, Defaults, and Counterfactuals	287
8.1	Belief	288
8.2	Knowledge and Belief	291
8.3	Characterizing Default Reasoning	292
8.4	Semantics for Defaults	294
8.4.1	Probabilistic Semantics	295
8.4.2	Using Possibility Measures, Ranking Functions, and Preference Orders	298
8.4.3	Using Plausibility Measures	301
8.5	Beyond System P	306
8.6	Conditional Logic	311
8.7	Reasoning about Counterfactuals	314
8.8	Combining Probability and Counterfactuals	317
	Exercises	318
	Notes	327
9	Belief Revision	331
9.1	The Circuit-Diagnosis Problem	332
9.2	Belief-Change Systems	339
9.3	Belief Revision	342
9.4	Belief Revision and Conditional Logic	354
9.5	Epistemic States and Iterated Revision	356
9.6	Markovian Belief Revision	359
	Exercises	361
	Notes	363
10	First-Order Modal Logic	365
10.1	First-Order Logic	366
10.2	First-Order Reasoning about Knowledge	373

10.3	First-Order Reasoning about Probability	376
10.4	First-Order Conditional Logic	381
	Exercises	390
	Notes	392
11	From Statistics to Beliefs	395
11.1	Reference Classes	396
11.2	The Random-Worlds Approach	398
11.3	Properties of Random Worlds	403
11.4	Random Worlds and Default Reasoning	411
11.5	Random Worlds and Maximum Entropy	416
11.6	Problems with the Random-Worlds Approach	420
	Exercises	423
	Notes	429
12	Final Words	431
	Notes	433
	References	435
	Glossary of Symbols	459
	Index	463
