Contents

<i>List of contributors</i>	vii
<i>Introduction and overview</i>	ix

PART I THEORETICAL PERSPECTIVES

1	Evolutionary foundations of economics	3
	<i>Kurt Dopfer and Jason Potts</i>	
2	On the methodology of assessing agent-based evolutionary models in the social sciences	24
	<i>Paul Onnerod and Bridget Rosewell</i>	
3	What do firms learn? Capabilities, distribution and the division of labour	38
	<i>Paolo Ramazzotti</i>	
4	Dynamic capabilities, tacit knowledge and absorption	62
	<i>Peter Hall</i>	

PART II MODELLING COMPLEXITY

5	The complexity of structure, strategy and decision making	85
	<i>Peter M. Allen</i>	
6	Knowledges, specialization and economic evolution: modelling the evolving division of human time	108
	<i>Esben Sloth Andersen</i>	

PART III EMPIRICAL PERSPECTIVES

7	Erring to be right: the paradox of error in the foundation of probability in economics	151
	<i>Francisco Louca</i>	
8	Technological and economic mobility in large German manufacturing firms	172
	<i>Uwe Cantner and Jens J. Kruger</i>	

9	A conceptual framework to model long-run qualitative change in the energy system <i>Andreas Pyka, Bernd Ebersberger and Horst Hanusch</i>	191
	<i>Index</i>	215
