CONTENTS

PREFACE

xv

CHAPTER 1 INTRODUCTION

1

*George Gelauff Luuk Klomp, Stephan Raes and
Theo Roelandt*

- | | | |
|----|---------------------|---|
| 1. | Introduction | 1 |
| 2. | Outline | 2 |
| 3. | Individual chapters | 3 |
| | References | 7 |

CHAPTER 2 AN INTERNATIONAL COMPARISON OF PRODUCTIVITY PERFORMANCE: THE CASE OF THE NETHERLANDS

9

Piet Donselaar, Hugo Erken and Stephan Raes

- | | | |
|----|-----------------------------------------------------------------|----|
| 1. | Introduction | 9 |
| 2. | Productivity performance at the macro level | 10 |
| | 2.1. Levels of productivity | 10 |
| | 2.2. Productivity growth | 13 |
| | 2.3. Total factor productivity growth | 15 |
| 3. | An analysis at the industry level | 16 |
| | 3.1. Productivity level and growth in the Netherlands by sector | 16 |
| | 3.2. International benchmark | 16 |
| | 3.3. Do (changes in) sector structure differences matter? | 18 |
| 4. | Future productivity growth | 20 |
| 5. | Conclusion | 21 |
| | References | 22 |
| | Appendix | 24 |

**CHAPTER 3 THE MEASUREMENT OF PRODUCTIVITY:
WHAT DO THE NUMBERS MEAN?** 29
Bart van Ark

L	Introduction	29
2.	Measurement of labour productivity and total factor productivity growth	30
2.1.	The main objectives of measurement of productivity growth	30
2.2.	Concepts of labour productivity and total factor productivity growth	31
2.3.	Data sources for productivity measurement	34
2.4.	Accuracy of the aggregate measures of productivity growth	36
3.	Measurement of comparative productivity levels	40
3.1.	The main objectives of measurements of productivity levels	40
3.2.	Purchasing power parities and accuracy of aggregate productivity level estimates	41
3.3.	Measurement of purchasing power parities and productivity levels by industry	42
4.	Measurement of productivity at industry level	44
4.1.	Manufacturing output measures	45
4.2.	Input measurement in manufacturing	46
4.3.	Input measurement in services	47
4.4.	Service output measures	47
4.5.	Improvements in measurement methods	47
5.	Measurement issues related to intangible capital	48
5.1.	Conceptualisation of intangible capital	49
5.2.	Measurement of intangible capital	50
6.	Conclusion	54
	References	56

**CHAPTER 4 HELPING THY NEIGHBOUR: PRODUCTIVITY,
WELFARE AND INTERNATIONAL TRADE** 63
Niek Nahuis and Ben Geurts

1.	Introduction	64
2.	Productivity, comparative advantage and the terms of trade	65
3.	Implications of recent trade and growth theory	66
3.1.	Modern trade models: product differentiation	67
3.2.	Country specific circumstances and competitiveness	67
3.3.	New growth theory	68

4.	Some empirical evidence	69
4.1.	The welfare effects of the ICT revolution	70
4.2.	The relation between productivity growth differences on relative price changes	71
5.	Conclusion and policy implications	73
	References	73

CHAPTER 5 R&D AND INNOVATION: DRIVERS OF PRODUCTIVITY GROWTH 75

Piet Donselaar, Hugo Erken and Luuk Klornp

1.	Introduction	75
2.	Analytical framework	76
3.	Innovation and productivity: review of the literature	78
3.1.	Effects of innovation in the empirical literature	78
3.2.	Related determinants: ICT, human capital and entrepreneurship	81
4.	Contribution of innovation to productivity growth	81
4.1.	Structural contribution of innovation to productivity growth	82
4.2.	Actual contribution of innovation to TFP growth in the Netherlands in the 1990s	84
4.3.	Role of the level of R&D intensity	85
4.4.	Potential contribution of a structural increase in the private R&D intensity on the level of TFP and labour productivity	86
5.	Conclusions, policy implications and future research	88
5.1.	How may the government stimulate R&D activities among firms?	88
5.2.	Future research: a model integrating the impact of drivers of productivity growth?	89
	References	90

CHAPTER 6 ICT AND PRODUCTIVITY 93

Henry van der Wiel and George van Leeuwen

1.	Introduction	93
2.	ICT and productivity: theoretical background, empirical models and data	95
2.1.	Theoretical background	95
2.2.	Empirical models	96
2.3.	Data	98
3.	Empirical evidence on aggregated levels	99
3.1.	An international comparison	101

4.	Empirical evidence at the firm level for market services	102
4.1.	ICT, innovation and productivity	103
4.2.	ICT and productivity: do spillovers matter?	106
5.	Do firm-level results match with aggregated results?	108
6.	Conclusions	109
	References	110
	Appendix: Estimation methods, econometric models, and data	112

**CHAPTER 7 HUMAN CAPITAL AND PRODUCTIVITY:
A LABOUR MARKET PERSPECTIVE** 115
Pieter van Winden and Anne Reitsma

1.	Introduction	115
2.	Private and social returns to education	117
2.1.	Private returns to education	118
2.2.	Participation effects	119
2.3.	Social rates of return	U9
2.4.	The Netherlands	120
3.	Participation as a source of post-initial human capital formation	122
3.1.	Learning by doing and job-related training	122
3.2.	Deterioration	123
3.3.	The Netherlands	123
4.	Participation and skill-biased technological change	124
4.1.	Skill-biased technological change	124
4.2.	The Netherlands	125
5.	Labour market institutions, participation and productivity	126
5.1.	Productivity effects of labour market institutions through participation	127
5.2.	Direct effects of institutions on human capital	130
5.3.	The Netherlands	132
6.	Conclusions	135
	References	136

**CHAPTER 8 WAGE MODERATION AND LABOUR
PRODUCTIVITY** 141
Peter Broer and Fredehk Huizinga

1.	Introduction	141
2.	A stylized model of wage moderation	142
3.	Exogenous labour augmenting technological progress	146
4.	Endogenous technological progress	146
5.	Creative destruction	149
6.	X-inefficiencies	152

7.	Application to the Netherlands	152
8.	Conclusion	157
	References	• 157

**CHAPTER 9 INTEGRATING EVIDENCE ON THE
DETERMINANTS OF PRODUCTIVITY** 159
Eric Bartelsman and Henri de Groot

1.	Introduction	159
2.	Empirical evidence on productivity	160
3.	Growth accounting	161
4.	Cross-country growth empirics: convergence	161
	4.1. Describing cross-sectional productivity developments: a-convergence	162
	4.2. Unconditional p-convergence	164
5.	Cross-country growth empirics: finding productivity determinants	164
	5.1. The growth accounting counterpart	165
	5.2. Barro regressions	165
6.	Evidence from convergence with productivity frontier	168
7.	Resource reallocation and aggregate productivity	171
8.	Integrating the evidence: a rough sketch for a model	171
	8.1. Firm-level choices and market interactions	172
	8.2. Qualitative effects of productivity determinants	174
	8.3. Choice of innovation strategy	174
	8.4. Within-firm innovative activity, capital accumulation and growth	176
9.	Quantification of the underlying determinants of growth	178
10.	Conclusion	180
	References	180
	Appendix: Data	183

**CHAPTER 10 FOUR SOURCES OF INNOVATION AND
STIMULATION OF GROWTH IN THE DUTCH
ECONOMY** 185
William Baumol

1.	Analysis for public sector growth and innovation policy: introduction	185
2.	Indicators of the magnitude of the free-enterprise growth miracle	187
3.	Market pressures for an enhanced large-firm role in technical progress	189
4.	Revolutionary breakthroughs: a small-firm specialty	190

5.	Revolutionary consequences of aggregated <i>incremental</i> improvements	192
6.	On the role of government and the university in innovation	193
7.	Dissemination of invention and rapid termination of the obsolete	194
8.	The invaluable contribution of "mere imitation"	196
9.	Concluding comments	197
	References	198

CHAPTER 11 MARKET STRUCTURE, INNOVATION AND PRODUCTIVITY: A MARRIAGE WITH CHEMISTRY 199
Erik Brouwer, Harry van Dalen, Theo Roelandt, Martin Ruiters and Henry van der Wiel

1.	The chemistry of competition and innovation	199
2.	Searching for the optimal market structure	201
	2.1. Views of the young Schumpeter: Mark I	201
	2.2. Views of the old Schumpeter: Mark II	201
	2.3. Empirical testing of Schumpeter's views	202
	2.4. The need for dynamic models	202
3.	Coping with the endogeneity problem	204
4.	What do we know about the Netherlands?	206
	4.1. Recent changes in Dutch innovation and competition policies	206
	4.2. Competition and innovation: empirical evidence for the Netherlands	207
5.	Concluding remarks and policy implications	208
	References	210
	Appendix: Static and dynamic efficiency	212

CHAPTER 12 FIRM DYNAMICS AND LABOUR PRODUCTIVITY 213
Wim Verhoeven

1.	Introduction	213
2.	Discussion of the literature	214
	2.1. Decomposition of aggregate labour productivity growth	214
	2.2. Labour productivity of start-ups and post-entry firms	217
	2.3. The labour productivity of exiting firms	218
	2.4. Expansion and contraction of firms	219
	2.5. Firm age	220
3.	Effects of changes in firm dynamics on aggregate labour productivity	224
	3.1. The theoretical framework of aspects influencing incumbents	225

3.2.	Case 1: Effects of changes in characteristics of start-ups	226
3.3.	Case 2: Effects of changes in characteristics of fast-growing firms	232
4.	Conclusions	237
	References	237

CHAPTER 13 THE CONTRIBUTION OF BUSINESS SERVICES TO AGGREGATE PRODUCTIVITY GROWTH 243
HenkKox

L.	Introduction	243
2.	Baumol disease?	244
3.	Business services industry as a provider of intermediary inputs	247
4.	Do measurement problems in business services industry affect macro-economic productivity?	248
5.	Knowledge spillovers by business services industry	250
6.	Stagnating productivity growth in business services <i>no fail accompli</i>	253
7.	Policy options for strengthening productivity and innovation	259
8.	Conclusions	261
	References	261

CHAPTER 14 INCREASING PRODUCTIVITY THROUGH INNOVATION AND ENTREPRENEURS!!!! IN BUSINESS SERVICES 265
Mark Visscher, Rob Becker and Menno van Dijk

1.	Introduction	265
2.	Determining productivity growth in the business services sector	266
3.	Understanding the impact on other sectors' productivity growth	270
4.	The importance of market dynamism as a driver of productivity growth	272
5.	Credible entrants and external triggers as drivers of market dynamism	275
6.	The role of business innovation	279
7.	Conclusions	282
	References	284

CHAPTER 15	THE OECD GROWTH STUDY: IMPLICATIONS FOR THE NETHERLANDS	285
	<i>Dirk Pilot</i>	
1.	Introduction	285
2.	Findings of the OECD Work	286
	2.1. Growth diverged in the OECD area	286
	2.2. Labour utilisation plays a key role	286
	2.3. Education and training support labour productivity growth	288
	2.4. The role of investment	289
	2.5. Strengthening TFP growth	290
3.	The role of fundamentals	300
4.	Conclusions for policy	301
	References	302
CHAPTER 16	A POLICY AGENDA FOR HIGHER PRODUCTIVITY GROWTH	305
	<i>Stephan Raes, George Gelauff, Luuk Klomp and Theo Roelandt</i>	
1.	Introduction	306
2.	Is higher productivity growth desirable?	306
3.	An overview of the determinants	309
4.	Is there a role for government?	312
5.	Macro-economic stability and physical capital	313
6.	Human capital	314
7.	Innovation	316
8.	ICT	317
9.	Competition and creative destruction	318
10.	Conclusion	319
	An agenda for productivity	319
	References	320
