Introduction 1
Joseph C. Cooper, Federico Perali and Marcella Veronesi

PART I ASSESSMENT

1. Estimating the level of functions supplied by a natural area using GIS information 7
Michele Carta, Nicola Gallinaro and Massimo Bianchi
1.1 Introduction 7
1.2 Methodology 7
1.3 Project stages 10
1.4 Data input and database set-up 11
1.5 The analysis stage 12
1.6 Results 14
1.7 Conclusions 37

2. The supply of functions by homogeneous area using cluster analysis 41
Paola De Agostini, Veronica Cicogna and Federico Perali
2.1 Introduction 41
2.2 Cluster analysis methodology 42
2.3 GIS database and definition of the functions of the natural area 44
2.4 Interpretation of results 47
2.5 Conclusions 66

3. A contingent valuation method incorporating fairness and citizen participation 70
Joseph C. Cooper, Federico Perali, Nicola Tommasi and Marcella Veronesi
3.1 Introduction 70
3.2 Comparison of the survey formats 73
3.3 A field test of the FOOHB and OOHB formats 81
3.4 Conclusions 89

4. Travel cost estimation conditional on leisure consumption 93
Joseph C. Cooper, Federico Perali, Nicola Tommasi and Marcella Veronesi
4.1 Introduction 93
4.2 Econometric models for the travel cost method conditional on leisure consumption 95
4.3 Study site and data gathering 100
4.4 Results 101
4.5 Conclusions 109
Appendix: econometric methods for censored variables 112

PART II MANAGEMENT

5. Identifying the best combination of environmental functions using multi-criteria analysis 121
Paola De Agostini
5.1 Introduction 121
5.2 Forest planning 123
5.3 Multi-criteria analysis 127
5.4 Multi-objective models: solution methodology 129
5.5 Identifying the best forest plan using multi-criteria analysis 135
5.6 Identifying the best forest plan integrating geographical information system, contingent valuation and multi-criteria analysis 146
5.7 Conclusions 149
Appendix: the concept of metric 156

6. Simulating the impact on the local economy of alternative management scenarios for natural areas 159
Paola De Agostini, Stefania Lovo, Francesco Pecci, Federico Perali and Michele Baggio
6.1 Introduction 159
6.2 The local social accounting matrix for the West Garda area: design and data requirements 162
6.3 The multiplier analysis 169
6.4 Simulations and results 173
6.5 Conclusions 177
Appendix: data sources 179

7. Resolving conflicts in a natural area 188
Michele Baggio
7.1 Introduction 188
7.2 Game theory and conflict resolution 190
7.3 Conflict resolution and search for consensus 202
7.4 Conclusions 208

Conclusions 212
Joseph C. Cooper, Federico Perali and Marcella Veronesi

Appendix: West Garda Regional Forest survey - a platform for policy analysis 220
Nicola Tommasi and Marcella Veronesi
