CONTENTS OF VOLUME 4

Introduction to the Series v
Contents of the Handbook vii
Contents of Volume 4 xv
Foreword xxvii

PART 1: CITIES AND URBAN SYSTEMS: FROM THEORY TO FACTS

Chapter 48
Micro-foundations of Urban Agglomeration Economies 2063
GILLES DURANTON and DIEGO PUGA
1. Introduction 2065
2. Sharing 2067
   2.1. Sharing indivisible goods and facilities 2067
   2.2. Sharing the gains from variety 2069
   2.3. Sharing the gains from individual specialisation 2077
   2.4. Sharing risk 2081
3. Matching 2086
   3.1. Improving the quality of matches 2086
   3.2. Improving the chances of matching 2092
   3.3. Mitigating hold-up problems 2096
4. Learning 2098
   4.1. Knowledge generation 2099
   4.2. Knowledge diffusion 2100
   4.3. Knowledge accumulation 2106
5. Concluding comments 2109
References 2111

Chapter 49
Evidence on the Nature and Sources of Agglomeration Economies 2119
STUART S. ROENTHAL and WILLIAM C. STRANGE
1. Introduction 2121
2. The scope of urban increasing returns 2124
   2.1. Introduction 2124
2.2. Strategies for evaluating the scope of agglomeration economies 2126
2.3. Industrial scope 2132
2.4. Geographic scope 2137
2.5. Temporal scope 2139
2.6. Industrial organization, "culture", and the transmission of agglomeration economies 2140
3. The sources of urban increasing returns 2144
  3.1. Increasing returns or natural advantage? 2145
  3.2. What do the productivity studies have to say about microfoundations? 2146
  3.3. Individual microfoundations 2148
  3.4. The relative importance of Marshallian microfoundations 2158
4. Case evidence 2162
  4.1. The New York Metropolitan Region Study 2163
  4.2. Regional Clusters of Innovation Project 2164
  4.3. Regional advantage 2165
5. Conclusion 2166
References 2167

Chapter 50
Neighborhood Effects 2173
STEVEN N. DURLAUF
1. Introduction 2175
2. Theory 2179
  2.1. Choice within neighborhoods 2180
  2.2. Equilibrium neighborhood configurations 2190
  2.3. Neighborhoods and networks 2199
  2.4. Stratification and efficiency 2202
3. Econometrics 2204
  3.1. Identification 2205
  3.2. Self-selection 2207
  3.3. Unobservables and sibling data 2209
4. Empirical studies 2211
  4.1. Ethnography 2211
  4.2. Experiments 2211
  4.3. Econometric studies with observational data 2212
  4.4. Correlation studies and sibling data 2220
  4.5. Quasi-experiments 2220
  4.6. Aggregate studies 2223
  4.7. Identifying neighborhoods 2224
5. Additional evidence on neighborhood effects 2225
  5.1. Classroom effects 2225
  5.2. Social capital 2226
  5.3. Segregation 2228
5.4. Social attitudes 2229
5.5. Home ownership and individual behavior 2230
5.6. Geography and social customs 2231
6. Conclusions 2231
Appendix: Selection correction for neighborhood effects regressions based on the multinomial logit model 2233
References 2234

Chapter 51
Human Capital Externalities in Cities 2243
ENRICO MORETTI

1. Introduction 2245
2. Recent trends in the geographic distribution of human capital across cities 2247
3. Theories of social returns to education 2254
   3.1. Productivity spillovers 2256
   3.2. Crime 2259
   3.3. Voting 2259
4. Estimating productivity spillovers in cities 2260
   4.1. Equilibrium with spillovers 2261
   4.2. Empirical models based on wages 2270
   4.3. Empirical models based on firm productivity 2281
5. Empirical evidence on other social benefits of education: crime and voting 2286
6. Conclusion 2288
References 2289

Chapter 52
Theories of Systems of Cities 2293
HESHAM M. ABDEL-RAHMAN and ALEX ANAS

1. Introduction 2295
2. Internal structure of cities 2298
3. Urban agglomeration and optimal city size 2300
   3.1. Local public good 2301
   3.2. Product variety and the home market effect 2302
   3.3. Labor productivity as an external economy 2304
   3.4. Discussion and notes on the literature 2305
4. City formation mechanisms 2306
   4.1. Community planning: welfare maximization 2306
   4.2. City development 2308
   4.3. Self-organization by atomistic defection: are developers needed? 2310
5. Key issues and a summary of historical developments in the literature 2312
   5.1. Key issues 2312
   5.2. Historical development of the field 2315
6. Homogeneous labor 2317
   6.1. The simplest case: identical isolated cities 2317
   6.2. Specialization versus diversification 2318
   6.3. Increasing returns with traded varieties 2323
7. Heterogeneous labor 2324
8. Efficiency and the role of central planning in city systems 2327
9. Growth 2330
   9.1. Exogenous population growth 2331
   9.2. Endogenous economic growth 2332
10. Challenges ahead 2335
References 2336

Chapter 53
The Evolution of City Size Distributions 2341
XAVIER GABAIX and YANNIS M. IOANNIDES

1. Introduction 2343
2. Zipf's law for the upper tail of the city size distribution 2344
   2.1. Zipf's law: definitions 2344
   2.2. Statistical methods to measure power law exponents 2345
   2.3. A methodological note: "estimate, don't test" 2350
   2.4. Empirical results on cities 2350
3. Random growth and Zipf's law 2354
   3.1. From Gibrat's law to Zipf's law 2354
   3.2. Deviations from Gibrat's law 2355
   3.3. Economic models that deliver Gibrat's law 2359
   3.4. Power laws at both ends of the city size distribution: random growth with exponential
        compounding 2361
4. Economic explanations for Zipf's law other than Gibrat's law 2361
   4.1. Zipf's law for cities coming from a power law of natural advantages 2361
   4.2. Zipf's law for cities in models of self organization and endogenous city formation 2362
5. Dynamics of the evolution of city size distributions 2364
   5.1. Spatial concentration of economic activity in the U.S. 2365
   5.2. Urban evolution in the U.S. 2366
6. The empirical evidence on the determinants of urban growth 2370
   6.1. Determinants of urban growth 2370
   6.2. The determinants of urban primacy 2371
   6.3. Studies of urban growth based on quasi "natural experiments" 2371
7. Conclusion 2373
Appendix: Zipf's law and urban primacy 2374
References 2375
# PART 2: THE DESIGN OF LOCAL GOVERNMENTS AND POLICIES

## Chapter 54
Urban Political Economics

ROBERT W. HELSLY

1. Introduction
2. Objectives and local policy formation
   2.1. Politics
   2.2. Property values
   2.3. Profits
   2.4. Complex politics
3. Local political institutions
   3.1. The institutions and their consequences
   3.2. The common pool problem in city councils
   3.3. Equilibrium models of distributive politics
4. Private government
   4.1. Supplementary provision
   4.2. Supplementary regulation
   4.3. Potential competition
   4.4. Gated communities
5. Conclusions
References

## Chapter 55
Fiscal Decentralization

DENNIS EPPLE and THOMAS NECHYBA

1. Introduction
2. Increasing fiscal decentralization around the World
3. Theoretical literature ion fiscal decentralization
   3.1. *From clubs to local public goods*: horizontal competition under local profit maximizing behavior
   3.2. *Government competition under local Pigouvian welfare maximization*: the role of inter-jurisdictional and intra-jurisdictional spillovers
   3.3. *Government competition under revenue maximizing governments*: local governments as Leviathan rent seekers
   3.4. *Voting with feet and ballots*: adding politics to Tiebout
   3.5. *Toward computational models for policy analysis*: competing local governments with heterogeneous households
4. Adding a hierarchical dimension to decentralized government competition
   4.1. *Central or local provision*: updating the “Decentralization Theorem”
   4.2. *Fiscal federalism*: hierarchical fiscal interactions between governments
5. Empirical research
   5.1. Capitalization
5.2. Jurisdictional fiscal inter-dependence, competition and efficiency 2463
5.3. Politics, institutions and fiscal outcomes 2465
5.4. Structural estimation of locational equilibrium models 2466
5.5. Collective choice and local fiscal institutions 2468
5.6. Stratification 2469
6. Conclusions 2471
References 2471

Chapter 56
Sprawl and Urban Growth 2481
EDWARD L. GLAESER and MATTHEW E. KAHN

1. Introduction 2483
1.1. Plan of the paper 2483
2. The extent of sprawl 2486
3. The causes of sprawl 2492
4. Evaluating the transportation cost hypothesis 2497
4.1. Transport costs over time 2498
4.2. The empirical connection between cars and sprawl 2500
5. Evaluating other causes of sprawl: the demand for land and flight from blight 2504
6. Evaluating other causes of sprawl: the political roots of sprawl 2506
7. Is sprawl bad? 2508
7.1. Housing prices and quantities 2509
7.2. Congestion and cars 2510
7.3. Sprawl and the environment 2512
7.4. Agglomeration and productivity consequences of sprawl 2516
7.5. Social consequences of sprawl 2517
7.6. Zoning 2519
8. Conclusion 2520
Appendix: Proofs of propositions 2521
References 2525

Chapter 57
Factor Mobility and Redistribution 2529
HELMUTH CREMER and PIERRE PESTIEAU

1. Introduction 2531
2. The benchmark model and the "race to the bottom" result 2533
2.1. Setting and closed economy solution 2533
2.2. Small open economy 2534
2.3. Strategic interaction: Nash equilibrium 2535
3. Qualifications 2537
3.1. National asymmetries 2537
3.2. Objective function with varying population 2538
PART 3: ECONOMIC GEOGRAPHY AND THE GEOGRAPHY OF MODERN ECONOMIES

Chapter 58
Agglomeration and Economic Geography
GIANMARCO OTTAVIANO and JACQUES-FRANCOIS THISSE

1. Introduction
2. The legacy of location theory
   2.1. The location of a firm
   2.2. The location of an industry
   2.3. Where did we stand in 1990?
3. Where do firms locate: the home market effect
   3.1. The market structure problem
   3.2. The framework and two models
4. The core-periphery structure
   4.1. The labor mobility framework
   4.2. The vertical linkage framework
5. The bell-shaped curve of spatial development
   5.1. More on spatial costs
   5.2. Heterogenous workers
6. Where do we go from here
References

Chapter 59
The Empirics of Agglomeration and Trade
KEITH HEAD and THIERRY MAYER

1. Introduction
2. Defining, delimiting, and testing the NEG
   2.1. Essential ingredients for NEG
2.2. Alternative explanations of agglomeration 2614
2.3. Testing NEG propositions 2615

3. Preliminaries: defining and measuring market potential 2616
3.1. Measuring access to markets 2617
3.2. Profits as a function of market potential 2620

4. Market potential raises factor prices 2621
4.1. Market potential and international income inequality 2622
4.2. Market potential and interregional wage differences 2624

5. Market potential attracts factor inflows 2627
5.1. Firm locations and downstream demand 2627
5.2. Worker locations and forward linkages 2630

6. Home market/magnification effects 2633
6.1. The magnification of production 2633
6.2. The impact of "home biased" demand 2639
6.3. The magnification of exports 2641
6.4. The robustness of the relationship 2642

7. Trade-induced agglomeration 2644
7.1. Concentration regressions 2644
7.2. Taking NEG theory seriously 2649

8. Instability, persistence, and agglomeration 2658
8.1. Stability of historical location rankings 2659
8.2. The long-term impact of temporary shocks 2660

9. Conclusion 2662

Appendix: Data appendix of Figure 4 2664
References 2665

Chapter 60
Agglomeration and Regional Growth 2671
RICHARD E. BALDWIN and PHILIPPE MARTIN

1. Introduction 2673
2. The basic framework of growth and agglomeration 2675
3. The case without localized spillovers: growth matters for geography 2679
3.1. The growth equilibrium 2679
3.2. Perfect capital mobility: the location equilibrium 2681
3.3. No capital mobility: "new growth" and "new geography" 2684
3.4. Concluding remarks 2688

4. The case with localized spillovers: geography matters for growth (and vice versa) 2689
4.1. Necessary extensions of the basic model 2690
4.2. The case of perfect knowledge capital mobility 2691
Chapter 63
Spatial Distribution of Economic Activities in North America 2797
THOMAS J. HOLMES and JOHN J. STEVENS

1. Introduction 2799
2. Data 2801
2.1. United States 2801
2.2. Canada 2807
3. Patterns of regional specialization 2807
3.1. Broad sectors and broad regions 2807
3.2. Narrow industries and more detailed geography 2811
3.3. Regional specialization in manufacturing 2815
4. Specialization by urbanization 2819
4.1. A measure of urbanization 2819
4.2. Specialization 2821
4.3. Canadian data 2826
5. Some facts about specialized industries 2828
5.1. Across industry comparisons 2828
5.2. Within industry comparisons 2830
6. Understanding the location of industry 2831
6.1. Natural advantage 2831
6.2. Concentrated market factor 2834
6.3. Government policy 2837
7. Conclusion 2839
Appendix A: Data sources 2839
A.1. Sources of the CBP data 2839
A.2. Mean employment by size class 2840
A.3. Economic Census data 2840
A.4. Canadian Business Patterns and Census data 2840
A.5. BEA data 2841
A.6. Other data 2841
References 2841

Chapter 64
The Spatial Distribution of Economic Activities in the European Union 2845
PIERRE-PHILIPPE COMBES and HENRY G. OVERMAN

Introduction 2847
1. Data for studying the spatial distribution of economic activity in the European Union 2848
2. Facts about the spatial distribution of economic activity in the European Union 2852
2.1. Aggregate economic activity and the EU core-periphery pattern 2852
2.2. Concentration and specialisation in the EU 2857

Chapter 67
The Historical Geography of European Cities: An Interpretive Essay 3021
PAUL M. HOHENBERG

1. Introduction 3023
2. A systems perspective 3025
3. Pre-industrial spatial patterns 3030
4. The early-modern period (1500-1800) 3032
5. Proto-industrialization and towns 3034
6. The early modern city: an appraisal 3036
7. Cities and industrialization 3036
8. Urban formations of the industrial age 3037
9. Migration 3040
10. Metropolitan areas and their transformations in the industrial age 3041
11. Laggards and losers 3042
12. Urban growth and urban systems in the industrial age 3042
13. The first twentieth century 3043
14. The second twentieth century 3044
15. Urban growth and migration 3047
16. Recent urban formations 3048
17. Urban spatial structure in post-industrial Europe 3049
18. Conclusion 3050
