PART I: ADVANCED INFORMATION TECHNOLOGY IS A MOVING TARGET

1 Technology and the Real-Time Enterprise	3
1.1 Introduction	3
1.2 Foresight, Insight, and Competitive Advantages	5
1.3 Reinventing the Functions of Management	9
1.4 Knowledge Navigation and the Real-Time Enterprise	13
1.5 Past Breakthroughs, Advanced Knowledge, and Efficiency. ...	16
2 Strategic Planning, Technology, and Organization	21
2.1 Introduction	21
2.2 A Long, Hard Look into the Future	22
2.3 Organization, Identification, and Fast Deliverables	27
2.4 Coordination through Management by Objectives	31
2.5 Strategic Plans Should Account for New Technology's Impact	35
3 New Trends in Information Technology	39
3.1 Introduction	39
3.2 A Concept of the Internet Ecosystem	41
3.3 Trends in Networked Sophisticated Applications	43
3.4 Back to Basics	47
3.5 Miniaturization and Sensing Technology	50
3.6 What Can Be Expected from Smart Dust?	55
4 What Is Meant by High Tech?	59
4.1 Introduction	59
4.2 Using High Technology for Business Survival	61
4.3 Extending the Current Technology's Frontier	64
4.4 Managing Information as a Product	67
4.5 R&D is an Integral Part of High-Tech Implementation	74
4.6 High Technology and the Virtual Company	76

**PART II: STRAIGHT THROUGH PROCESSING, REALITY ONLINE,
AND KNOWLEDGE MANAGEMENT**

5	Straight Through Processing	83
5.1	Introduction	83
5.2	A Practical Example with STP: Continuous Link Settlement	85
5.3	Continuities and Discontinuities in STP Implementation	88
5.4	Exception Handling and Straight Through Processing	91
5.5	Connecting STP to Enterprise Resources Planning	94
5.6	Cost and Benefit with Straight Through Processing	96
6	Reality Online as an Integrative Solution	101
6.1	Introduction	101
6.2	System Design for Reality Online	102
6.3	Reality Online and Smart Cars	105
6.4	System Integration by the Swiss Customs Authority: A Case Study	108
6.5	Prerequisites for and Payoffs from System Integration	112
6.6	Likely Social Impact of Reality Online	115
7	Executive Information Systems	119
7.1	Introduction	119
7.2	Concepts Underpinning Executive Information Systems	121
7.3	Executive Information System Examples with BNP Paribas and Wal-Mart	127
7.4	A Corporate Memory Facility: Case Study with Magellan	130
7.5	The Important Role of Visualization in Executive Information Systems	133
7.6	A Well-Designed EIS Is Always User Centered: A Case Study	136
8	Client Information Systems	141
8.1	Introduction	141
8.2	The New Age of Retail	142
8.3	Prerequisites to the Design of a Client Information System	146
8.4	MIT's Virtual Customer and Accenture's Virtual Double	149
8.5	Implementing the Customer Mirror	152
8.6	Using Customer Relationship Management Software	155

PART III: CASE STUDIES WITH REAL-TIME ENTERPRISES

9	Real-Time Applications in the Banking Industry	163
9.1	Introduction	163
9.2	A 21st-century IT Solution for a Commercial Bank	165
9.3	Real-Time and Realspace Applications by Top-Tier Institutions	169
9.4	Bankers Trust: Repositioning to the Right Side of the Balance Sheet	173
9.5	Use of Expert Systems by the Deutsche Bundesbank	176
9.6	Taking an Integrated View of EIS and CIS	178
10	Real-Time Treasury Operations	183
10.1	Introduction	183
10.2	Pillars of Treasury Control: A Case Study	185
10.3	A Closer Look into Assets and Liabilities Management	190
10.4	Crisis of Fund Management. A Case Study	193
10.5	Benefits from an A&L Acid Test	197
10.6	Challenges with Home-Host Financial Reporting	199
11	Real-Time Risk Management	203
11.1	Introduction	203
11.2	Organization, Technology, and Enterprise Risk Management	204
11.3	Uncertainties Connected to Credit Risk	208
11.4	Uncertainties Resulting from Market Risk	213
11.5	The Real-Time Evaluation of Gains and Losses	216
11.6	Isaac Newton's Policy for Effective Control	219
12	Implementing Realspace Solutions to Replace Office Automation	223
12.1	Introduction	223
12.2	Office Automation Must Be Upgraded with Real-Time Technology	225
12.3	Case Study on the Revamping of Office Automation	228
12.4	Cultural Change Is Inevitable, No Matter What the New System Is	231
12.5	Advanced Solutions Rest on Reengineered Real-Time Applications	235
12.6	Offshoring the Back Office and Real-Time Connectivity	240

PART IV: PREREQUISITES FOR REAL-TIME SOLUTIONS

13 Business Architecture for a Real-Time Enterprise	247
13.1 Introduction	247
13-2 Designing a Business Architecture to Promote Client Focus and Innovation	249
13-3 Challenges a Business Architecture Must Overcome	253
13.4 The Interim Business Architecture of a Money Center Bank: A Case Study	256
13-5 Converging Toward Implementation of a Realspace Environment: A Case Study	259
14 Data Mining Anywhere, at Any Time, on Any Subject	263
14.1 Introduction	263
14.2 End Users and the Need for Real-Time Databases	264
14.3 Increasing Return on IT Investments through Data Mining	269
14.4 Improving the Sophistication of Interactive Database Access	273
14.5 Database Solutions and Quality of Service	277
15 Case Studies on Internet-Intrinsic Models	283
15.1 Introduction	283
15.2 Internet Technology Toward 2010	284
15.3 Internet-Intrinsic Business Models	289
15.4 Case Studies on Internet Use in Retail Banking	292
15.5 Rethinking the Horizon of Internet Retail Banking Services	295
15.6 Internet and the Securities Industry	298
16 End-to-End Deliverables through Internet Ecosystems	301
16.1 Introduction	301
16.2 End-to-End on the Internet	303
16.3 Time and Its Challenges	306
16.4 Virtue Is Knowledge That Cannot Be Taught	309
16.5 Learning How to Do Internet Ecosystem Studies	311
16.6 Deliverables for the SMEs and the Virus Threat	313
16.7 Who Can Make Money on the Internet?	318
17 Business Continuity and Contingency Planning	321
17.1 Introduction	321
17.2 Management of Business Continuity and the Terrorist Threats	222
17.3 Learning a Lesson from the Law of Unexpected Consequences	327
17.4 Operational Risk Control, Contingency Planning, and Disaster Recovery	330
17.5 Controlling the Company's Cost Structure through Technology	334

PART V: INDEX
