Excel® Dashboards and Reports

2nd Edition

by Michael Alexander and John Walkenbach

WILEY

Contents at a Glance

Introduction 1

PART I: Getting Started with Excel Dashboards

Chapter 1: Introducing Dashboards 11
Chapter 2: Table Design Best Practices 29
Chapter 3: Using Excel Sparklines 47
Chapter 4: Chartless Visualization Techniques 61

PART II: Introducing Charts into Your Dashboards

Chapter 5: Excel Charting for the Uninitiated 89
Chapter 6: Working with Chart Series 107
Chapter 7: Formatting and Customizing Charts 131
Chapter 8: Components That Show Trending 171
Chapter 9: Components That Group Data 193
Chapter 10: Components That Show Performance Against a Target 209

PART III: Advanced Dashboarding Concepts

Chapter 11: Developing Your Data Model 225
Chapter 12: Adding Interactive Controls to Your Dashboard 247
Chapter 13: Macro-Charged Reporting 265

PART IV: Pivot Table Driven Dashboards

Chapter 14: Using Pivot Tables 281
Chapter 15: Using Pivot Charts 311
Chapter 16: Adding Interactivity with Slicers 329
Chapter 17: Using the Internal Data Model and Power View 343

PART V: Working with the Outside World

Chapter 18: Integrating External Data into Excel Reporting 365
Chapter 19: Sharing Your Work with the Outside World 381

Part I: Getting Started with Excel Dashboards

Chapter 1: Introducing Dashboards 11
What Are Dashboards and Reports? 11
Defining reports 12
Defining dashboards 12
Establish the User Requirements 13
Define the message(s) 14
Establish the audience 14
Define the performance measures 14
List the required data sources 16
Define the dimensions and filters 16
Determine the need for drill-down details 17
Establish the update schedule 17
A Quick Look at Dashboard Design Principles 17
Rule number 1: Keep it simple 18
Use layout and placement to draw focus 22
Format numbers effectively 22
Use titles and labels effectively 23
Key Questions to Ask Before Distributing Your Dashboard 24
Does my dashboard present the right information? 24
Does everything on my dashboard have a purpose? 24
Does my dashboard prominently display the key message? 24
Can I maintain this dashboard? 25
Does my dashboard clearly display its scope and shelf life? 25

Is my dashboard well documented? 25
Is my dashboard user-friendly? 26
Is my dashboard accurate? 26

Chapter 2: Table Design Best Practices 29

Table Design Principles 30
Use colors sparingly 30
De-emphasize borders 31
Use effective number formatting 34
Subdue your labels and headers 35
Enhancing Reporting with Custom Number Formatting 36
Number formatting basics 37
Formatting numbers in thousands and millions 39
Hiding and suppressing zeros 41
Applying custom format colors 42
Formatting dates and times 44
Adding conditions to customer number formatting 45

Chapter 3: Using Excel Sparklines 47

Understanding Sparklines 48
Applying Sparklines 49
Creating Sparklines 50
Customizing Sparklines 52
Sizing and merging sparkline cells 52
Handling hidden or missing data 53
Changing the sparkline type 54
Changing sparkline colors and line width 54
Using color to emphasize key data points 55
Adjusting sparkline axis scaling 55
Faking a reference line 56
Specifying a date axis 58
Auto-updating sparkline ranges 59

Chapter 4: Chartless Visualization Techniques 61

Enhancing Reports with Conditional Formatting 61
Applying basic conditional formatting 62
Adding your own formatting rules manually 70
Show only one icon 73
Show Data Bars and icons outside of cells 75
Representing trends with icon sets 77
Using Symbols to Enhance Reporting 79
Using Excel's Camera Tool 82
Finding the Camera tool 82
Using the Camera tool 83
Enhancing a dashboard with the Camera tool 85

Part II: Introducing Charts into Your Dashboards

Chapter 5: Excel Charting for the Uninitiated **89**

What Is a Chart? 89
How Excel Handles Charts 90
Embedded charts 92
Chart sheets 93
Parts of a Chart 93
Basic Steps for Creating a Chart 96
Creating the chart 96
Switching the row and column orientation 98
Changing the chart type 98
Applying chart styles 99
Applying a chart style 99
Adding and deleting chart elements 100
Moving and deleting chart elements 101
Formatting chart elements 101
Working with Charts 102
Moving and resizing a chart 102
Converting an embedded chart to a chart sheet 103
Copying a chart 103
Deleting a chart 104
Copying a chart's formatting 104
Renaming a chart 104
Printing charts 105

Chapter 6: Working with Chart Series **107**

Specifying the Data for Your Chart 107
Adding a New Series to a Chart 109
Adding a new series by copying a range 110
Adding a new series by extending the range highlight 111
Adding a new series using the Select Data Source dialog box 111
Adding a new series by typing a new SERIES formula 112
Deleting a Chart Series 113
Modifying the Data Range for a Chart Series 113
Using range highlighting to change series data 113
Using the Select Data Source dialog box to change series data 115
Editing the SERIES formula to change series data 116
Understanding Series Names 117
Changing a series name 118
Deleting a series name 119
Adjusting the Series Plot Order 120
Charting a Noncontiguous Range 121
Using Series on Different Sheets 122

Handling Missing Data 123
Controlling a Data Series by Hiding Data 124
Unlinking a Chart Series from Its Data Range 125
Converting a chart to a picture 126
Converting a range reference to arrays 127
Working with Multiple Axes 128
Creating a secondary value axis 128
Creating a chart with four axes 129

Chapter 7: Formatting and Customizing Charts 131

Chart Formatting Overview 131
Selecting chart elements 132
Common chart elements 134
UI choices for formatting 135
Adjusting Fills and Borders: General Procedures 138
About the Fill tab 138
Formatting borders 140
Formatting Chart Background Elements 140
Working with the chart area 141
Working with the plot area 141
Formatting Chart Series 143
Basic series formatting 143
Using pictures and graphics for series formatting 143
Additional series options 145
Working with Chart Titles 146
Adding titles to a chart 147
Changing title text 147
Formatting title text 147
Linking title text to a cell 148
Working with a Chart's Legend 149
Adding or removing a legend 150
Moving or resizing a legend 150
Formatting a legend 150
Changing the legend text 150
Deleting a legend entry 151
Identifying series without using a legend 151
Working with Chart Axes 151
Value axis versus category axis 152
Value axis scales 153
Using time-scale axes 159
Creating a multiline category axis 161
Removing axes 162
Axis number formats 163
Working with Gridlines 163
Adding or removing gridlines 164

Working with Data Labels 164
Adding or removing data labels 164
Editing data labels 165
Problems and limitations with data labels 167
Working with a Chart Data Table 169
Adding and removing a data table 169
Problems and limitations with data tables 169

Chapter 8: Components That Show Trending 171
Trending Dos and Don'ts 171
Using chart types appropriate for trending 172
Starting the vertical scale at zero 173
Leveraging Excel's logarithmic scale 175
Applying creative label management 176
Comparative Trending 179
Creating side-by-side time comparisons 179
Creating stacked time comparisons 181
Trending with a secondary axis 182
Emphasizing Periods of Time 184
Formatting specific periods 184
Using dividers to mark significant events 185
Representing forecasts in your trending components 186
Other Trending Techniques 187
Avoiding overload with directional trending 187
Smoothing data 188

Chapter 9: Components That Group Data 193
Listing Top and Bottom Values 193
Organizing source data 194
Using pivot tables to get top and bottom views 195
Using Histograms to Track Relationships and Frequency 197
Adding formulas to group data 198
Adding a cumulative percent 201
Using a pivot table to create a histogram 202
Emphasizing Top Values in Charts 204

Chapter 10: Components That Show Performance Against a Target 209
Showing Performance with Variances 210
Showing Performance Against Organizational Trends 210
Using a Thermometer-Style Chart 212
Using a Bullet Graph 212
Creating a bullet graph 213
Adding data to your bullet graph 216
Final thoughts on formatting bullet graphs 217
Showing Performance Against a Target Range 219

Part III: Advanced Dashboarding Concepts

Chapter 11: Developing Your Data Model **225**

Building a Data Model 225
Separating the data, analysis, and presentation layers 226
Data Model Best Practices 230
Avoid storing excess data 230
Use tabs to document and organize your data model 231
Test your data model before building presentation components 232
Excel Functions for Your Data Model 233
Understanding lookup tables 233
The VLOOKUP function 233
The HLookup function 237
The SUMPRODUCT function 238
The Choose function 241
Working with Excel Tables 243
Converting a range to an Excel table 244
Converting an Excel table back to a range 245

Chapter 12: Adding Interactive Controls to Your Dashboard **247**

Getting Started with Form Controls 248
Finding Form controls 248
Adding a control to a worksheet 250
Using the Button Control 251
Using the Check Box Control 251
Check box example: Toggling a chart series on and off 253
Using the Option Button Control 255
Option button example: Showing many views through one chart 256
Using the Combo Box Control 258
Combo box example: Changing chart data with a drop-down selector 259
Using the List Box Control 261
List box example: Controlling multiple charts with one selector 262

Chapter 13: Macro-Charged Reporting **265**

Why Use a Macro? 265
Recording Your First Macro 266
Running your macros 269
Assigning a macro to a button 270
Enabling Macros in Excel 2013 272
Viewing the new Excel security message 272
Setting up trusted locations 272
Excel Macro Examples 274
Building navigation buttons 274
Dynamically rearranging pivot table data 275
Offering one-touch reporting options 276

Part IV: Pivot Table Driven Dashboards

Chapter 14: Using Pivot Tables **281**

Introducing the Pivot Table 281

Anatomy of a pivot table 282

Creating the basic pivot table 284

Customizing Your Pivot Table 291

Changing the pivot table layout 291

Renaming the fields 292

Formatting numbers 293

Changing summary calculations 294

Suppressing subtotals 295

Removing all subtotals at one time 295

Removing the subtotals for only one field 296

Removing grand totals 297

Hiding and showing data items 297

Hiding or showing items without data 299

Sorting your pivot table 301

Examples of Filtering Your Data 302

Producing top and bottom views 302

Creating views by month, quarter, and year 305

Creating a percent distribution view 307

Creating a YTD totals view 308

Creating a month-over-month variance view 309

Chapter 15: Using Pivot Charts **311**

Getting Started with Pivot Charts 311

Creating a pivot chart.. 312

Understanding the link between pivot charts and pivot tables 314

Limitations of pivot charts 316

Using conditional formatting with pivot tables 316

Customizing conditional formatting 319

Alternatives to Pivot Charts 324

Disconnecting charts from pivot tables 324

Create standalone charts that are connected to your pivot table .. 326

Chapter 16: Adding Interactivity with Slicers **329**

Understanding Slicers 329

Creating a Standard Slicer 331

Formatting slicers 333

Controlling multiple pivot tables 336

Creating a Timeline Slicer 337

Using Slicers as Form Controls 339

Chapter 17: Using the Internal Data Model and Power View **343**
Understanding the Internal Data Model 344
Building out your first data model 344
Using your Data Model in a pivot table 348
Using external data sources in your internal Data Model 350
Creating a Power View Dashboard 353
Creating and working with Power View charts 354
Visualizing data in a Power View map 358
Changing the look of your Power View dashboard 360

Part V: Working with the Outside World

Chapter 18: Integrating External Data into Excel Reporting **365**
Importing Data from Microsoft Access 366
The drag-and-drop method 366
The Microsoft Access Export Wizard 367
The Get External Data icon 368
Importing Data from SQL Server 372
Passing Your Own SQL Statements to External Databases 375
Manually editing SQL statements 375
Running stored procedures from Excel 376
Using VBA to create dynamic connections 377

Chapter 19: Sharing Your Work with the Outside World **381**
Securing Your Dashboards and Reports 381
Securing access to the entire workbook 381
Limiting access to specific worksheet ranges 384
Protecting the workbook structure 387
Linking Your Excel Dashboards to PowerPoint 388
Creating the link between Excel and PowerPoint 388
Manually updating links to capture updates 390
Automatically updating links 391
Distributing Your Dashboards via a PDF 392
Distributing Your Dashboards to SkyDrive 394
Limitations when publishing to the web 397

Index **399**
