1.4 Conclusions	18
2 Time allocation and household production	20
2.1 Introduction	20
2.2 The standard consumer model	20
2.3 The Becker model	23
2.4 The Pollak and Wachter critique	26
2.5 Market substitutes, implicit prices and the value of household production	30
2.6 Conclusions	34
3 Household models: theory	36
3.1 Introduction	36
3.2 Cooperative models	39
3.3 Non-cooperative models	75
3.4 Equilibrium models	80
3.5 The Pareto property and Pareto (in)efficiency	81
4 Empirical household models	88
4.1 Introduction	88
4.2 The household utility function model	88
4.3 Estimation of models on time-use data	94

Contents

4.4	Empirical work on the collective model	101
4.5	Conclusions	108
5	Labour supply, consumption and saving over the life cycle	109
5.1	Introduction	109
5.2	Life cycle models	109
5.3	A model of the 'family life cycle'	129
5.4	Evidence on family life cycle profiles	135
5.5	Conclusions	155
6	Household taxation: introduction	157
6.1	Introduction	157
6.2	Taxation systems	158
6.3	The simple analytics of redistributive tax systems	163
6.4	Income tax systems in practice	181
6.5	Conclusions	194
7	Optimal linear and piecewise linear income taxation	202
7.1	Introduction	202
7.2	Taxation and the within-household income distribution	204
7.3	Optimal linear taxation	208
7.4	Piecewise linear taxation	214
8	Optimal non-linear taxation	221
8.1	Introduction	221
8.2	The two-type case	221
8.3	A continuum of types	234
8.4	Two-person households	246
9	Tax reform	254
9.1	Introduction	254
9.2	Tax reform policies	256
9.3	Tax reform, joint taxation and the tax unit	272
9.4	Conclusions	275
	<i>Bibliography</i>	<i>111</i>
	<i>Index</i>	<i>286</i>
