## SECTION I: BUSINESS MODELS FOR A CIRCULAR ECONOMY: INTRODUCTION 1

|  |           |
|--|-----------|
| <b>1. Business models for a circular economy: Linking waste management and sanitation with agriculture</b>   | <b>3</b>  |
| <i>Pay Drechsel, Miriam Otoo, Krishna C. Rao and Munir A. Hanjra</i>   |           |
| <b>2. Defining and analyzing RRR business cases and models</b>   | <b>16</b> |
| <i>Miriam Otoo, Solomie Gebrezgabher, Pay Drechsel, Krishna C. Rao, Sudarshana Fernando, Surendra K. Pradhan, Munir A. Hanjra, Manzoor Qadir and Mirko Winkler</i> |           |

## SECTION II: ENERGY RECOVERY FROM ORGANIC WASTE 33

*Edited by Krishna C. Rao and Solomie Gebrezgabher*

|   |           |
|---|-----------|
| Recovering energy from waste: An overview of presented business cases and models      | 34        |
| <b>3. Business models for solid fuel production from waste</b>                        | <b>39</b> |
| Introduction  | 40        |
| Case – Briquettes from agro-waste (Kampala Jellitone Suppliers, Uganda)               | 41        |
| <b>Business model 1: <i>Briquettes from agro-waste</i></b>                            | <b>51</b> |
| Case – Briquettes from municipal solid waste (COOCEN, Kigali, Rwanda)                 | 61        |
| Case – Briquettes from agro-waste and municipal solid waste (Eco-Fuel Africa, Uganda) | 72        |
| <b>Business Model 2: <i>Briquettes from municipal solid waste</i></b>                 | <b>82</b> |
| <b>4. Business models for in-house biogas production for energy savings</b>           | <b>91</b> |
| Introduction  | 92        |
| Case – Biogas from fecal sludge and kitchen waste at prisons                          | 93        |
| Case – Biogas from fecal sludge at community scale (Sulabh, India)                    | 103       |

|   |            |
|---|------------|
| Case – Biogas from fecal sludge at Kibera communities at Nairobi (Umande Trust, Kenya)                      | 114        |
| <b>Business model 3: <i>Biogas from fecal sludge at community level</i></b>                                 | <b>124</b> |
| Case – Biogas from kitchen waste for internal consumption (Wipro Employees Canteen, India)                  | 133        |
| <b>Business model 4: <i>Biogas from kitchen waste</i></b>   | <b>142</b> |
| <b>5. Business models for sustainable and renewable power generation</b>                                    | <b>149</b> |
| Introduction  | 150        |
| Case – Power from manure and agro-waste for rural electrification (Santa Rosillo, Peru)                     | 152        |
| Case – Power from swine manure for industry's internal use (Sadia, Concordia, Brazil)                       | 162        |
| Case – Power from manure and slaughterhouse waste for industry's internal use (SuKarne, Mexico)             | 172        |
| <b>Business model 5: <i>Power from manure</i></b>   | <b>182</b> |
| Case – Power from agro-waste for the grid (Greenko, Koppal, India)  | 193        |
| Case – Power from rice husk for rural electrification (Bihar, India)  | 203        |
| <b>Business model 6: <i>Power from agro-waste</i></b>   | <b>215</b> |
| Case – Power from municipal solid waste at Pune Municipal Corporation (Pune, Maharashtra, India)            | 222        |
| <b>Business model 7: <i>Power from municipal solid waste</i></b>  | <b>232</b> |
| Case – Combined heat and power from bagasse (Mumias Sugar Company, Mumias District, Kenya)                  | 238        |
| Case – Power from slaughterhouse waste (Nyongara Slaughter House, Dagorretti, Kenya)                        | 248        |
| Case – Combined heat and power and ethanol from sugar industry waste (SSSSK, Maharashtra, India)            | 257        |
| Case – Combined heat and power from agro-industrial wastewater (TBEC, Bangkok, Thailand)                    | 268        |
| <b>Business model 8: <i>Combined heat and power from agro-industrial waste for on- and off-site use</i></b> | <b>278</b> |
| <b>6. Business models on emerging technologies/bio-fuel production from agro-waste</b>                      | <b>284</b> |
| Introduction  | 285        |
| Case – Bio-ethanol from cassava waste (ETAVEN, Carabobo, Venezuela)   | 286        |
| Case – Organic binder from alcohol production (Eco Biosis S.A., Veracruz, Mexico)                           | 296        |
| <b>Business model 9: <i>Bio-ethanol and chemical products from agro and agro-industrial waste</i></b>       | <b>307</b> |

**SECTION III: NUTRIENT AND ORGANIC MATTER RECOVERY****315***Edited by Miriam Otoo*

|  |            |
|--|------------|
| Nutrient and organic matter recovery: An overview of presented business cases and models   | 316        |
| <b>7. Business models on partially subsidized composting at district level</b>   | <b>321</b> |
| Introduction   | 322        |
| Case – Municipal solid waste composting for cost recovery (Mbale Compost Plant, Uganda)  | 324        |
| Case – Public-private partnership-based municipal solid waste composting (Greenfields Crops, Sri Lanka)                            | 333        |
| Case – Fecal sludge and municipal solid waste composting for cost recovery (Balangoda Compost Plant, Sri Lanka)                    | 341        |
| <b>Business model 10: Partially subsidized composting at district level</b>  | <b>351</b> |
| <b>8. Business models on subsidy-free community-based composting</b>   | <b>359</b> |
| Introduction   | 360        |
| Case – Cooperative model for financially sustainable municipal solid waste composting (NAWACOM, Kenya)                             | 362        |
| <b>Business model 11: Subsidy-free community-based composting</b>  | <b>371</b> |
| <b>9. Business models on large-scale composting for revenue generation</b>   | <b>378</b> |
| Introduction   | 379        |
| Case – Inclusive, public-private partnership-based municipal solid waste composting for profit (A2Z Infrastructure Limited, India) | 381        |
| Case – Municipal solid waste composting with carbon credits for profit (IL&FS, Okhla, India)                                       | 391        |
| Case – Partnership-driven municipal solid waste composting at scale (KCDC, India)  | 400        |
| Case – Franchising approach to municipal solid waste composting for profit (Terra Firma, India)                                    | 411        |
| Case – Socially-driven municipal solid waste composting for profit (Waste Concern, Bangladesh)                                     | 422        |
| <b>Business model 12: Large-scale composting for revenue generation</b>  | <b>434</b> |
| <b>10. Business models on nutrient recovery from own agro-industrial waste</b>   | <b>447</b> |
| Introduction   | 448        |
| Case – Agricultural waste to high quality compost (DuduTech, Kenya)  | 450        |
| Case – Enriched compost production from sugar industry waste (PASIC, India)  | 459        |
| Case – Livestock waste for compost production (ProBio/Viohache, Mexico)  | 468        |
| <b>Business model 13: Nutrient recovery from own agro-industrial waste</b>   | <b>478</b> |

|  |            |
|--|------------|
| <b>11. Business models on compost production for sustainable sanitation service delivery</b>       | <b>484</b> |
| Introduction   | 485        |
| Case – Fecal sludge to nutrient-rich compost from public toilets (Rwanda Environment Care, Rwanda) | 487        |
| <b>Business model 14: Compost production for sustainable sanitation service delivery</b>           | <b>496</b> |
| <b>12. Business models for outsourcing fecal sludge treatment to the farm</b>                      | <b>504</b> |
| Introduction   | 505        |
| Case – Fecal sludge for on-farm use (Bangalore Honey Suckers, India)                               | 508        |
| <b>Business model 15: Outsourcing fecal sludge treatment to the farm</b>                           | <b>516</b> |
| <b>13. Business models on phosphorus recovery from excreta and wastewater</b>                      | <b>523</b> |
| Introduction   | 524        |
| Case – Urine and fecal matter collection for reuse (Ouagadougou, Burkina Faso)                     | 527        |
| <b>Business Model 16: Phosphorus recovery from wastewater at scale</b>                             | <b>538</b> |

#### **SECTION IV: WASTEWATER FOR AGRICULTURE, FORESTRY AND AQUACULTURE**

547

*Edited by Pay Drechsel and Munir A. Hanjra*

|  |            |
|--|------------|
| Wastewater for agriculture, forestry and aquaculture: An overview of presented business cases and models | 548        |
| <b>14. Business models on institutional and regulatory pathways to cost recovery</b>                     | <b>553</b> |
| Introduction   | 554        |
| Case – Wastewater for fruit and wood production (Egypt)  | 556        |
| Case – Wastewater and biosolids for fruit trees (Tunisia)  | 569        |
| Case – Suburban wastewater treatment designed for reuse and replication (Morocco)                        | 584        |
| <b>Business model 17: Wastewater for greening the desert</b>   | <b>595</b> |
| <b>15. Business models beyond cost recovery: Leapfrogging the value chain through aquaculture</b>        | <b>604</b> |
| Introduction   | 605        |
| Case – Wastewater for the production of fish feed (Bangladesh)   | 606        |
| Case – A public-private partnership linking wastewater treatment and aquaculture (Ghana)                 | 617        |
| <b>Business Model 18: Leapfrogging the value chain through aquaculture</b>                               | <b>631</b> |

|   |            |
|---|------------|
| <b>16. Business models for cost sharing and risk minimization</b>                                       | <b>639</b> |
| Introduction  | 640        |
| Case – Viability gap funding (As Samra, Jordan)   | 642        |
| <hr/>   |            |
| <b>Business model 19: <i>Enabling private sector investment in large scale wastewater treatment</i></b> | <b>656</b> |
| <b>17. Business models on rural–urban water trading</b>   | <b>664</b> |
| Introduction  | 665        |
| Case – Fixed wastewater-freshwater swap (Mashhad Plain, Iran)   | 670        |
| Case – Flexible wastewater-freshwater swap (Llobregat delta, Spain)                                     | 679        |
| <hr/>   |            |
| <b>Business model 20: <i>Inter-sectoral water exchange</i></b>  | <b>691</b> |
| Case – Growing opportunities for Mexico City to tap into the Tula aquifer (Mexico)                      | 698        |
| Case – Revival of Amani Doddakere tank (Bangalore, India)   | 710        |
| <hr/>   |            |
| <b>Business model 21: <i>Cities as their own downstream user (Towards managed aquifer recharge)</i></b> | <b>720</b> |
| <b>18. Business models for increasing safety in informal wastewater irrigation</b>                      | <b>728</b> |
| Introduction  | 729        |
| <b>Business model 22: <i>Corporate Social Responsibility (CSR) as driver of change</i></b>              | <b>733</b> |
| <b>Business model 23: <i>Wastewater as a commodity driving change</i></b>                               | <b>745</b> |
| <b>Business model 24: <i>Farmers' innovation capacity as driver of change</i></b>                       | <b>760</b> |
| <hr/>   |            |
