

Valuing Rural Amenities

Table of Contents

Chapter 1. Introduction <i>by Douglas Macmillan</i>	9
---	---

Part I

ASSESSING DEMAND AND DERIVING VALUE

Chapter 2. Valuation Techniques and Benefit Transfer Methods: Strengths, Weaknesses and Policy Utility <i>by Ståle Navrud</i>	15
1. Whose preferences should count?	15
2. Valuation techniques based on individual preferences	18
3. Use of valuation techniques in policy	23
4. Benefit transfer approaches and their reliability	25
5. Potential for increased policy use of original and transferred value estimates	31
6. Conclusion	33
References	34
Comments by Mitsuyasu Yabe, National Research Institute of Agricultural Economics, Japan	39
 Chapter 3. Problems and Potential in Valuing Multiple Outputs: Externality and Public-Good Non-Commodity Outputs from Agriculture <i>by José Manuel Lima e Santos</i>	41
1. Policy context	41
2. The valuation problem	44
3. The basic valuation model	47
4. Demand interactions and aggregation across policy effects	50
5. Approaches to empirical valuation of multiple non-commodity outputs	61
6. Conclusions and further issues raised by policy uses	67
Annex 1: Demonstration of Additivity of Sequential Values	73
Notes	74
References	76
Comments by Peter Berkowitz, European Commission, DG Agriculture	80
Comments by Gonzague Pillet, University of Fribourg, Fribourg, And Ecosys® Inc., Geneva	83
Comments by Mikitaro Shobayashi, Agriculture Directorate, OECD	87

Chapter 4. Valuation by Whom, for Whom? Questions of Legitimacy	
<i>by John Foster and Robin Grove-White</i>	91
1. Some problems	91
2. A fresh approach	95
Comments by John A. Dixon, World Bank	100

Part 2

**THE SUPPLY SIDE:
TRANSFORMING VALUES INTO REVENUES**

Chapter 5. Current Policy Instruments: Rationale, Strengths and Weaknesses	
<i>by Ian Hodge</i>	105
1. Who cares for amenities?	105
2. The amenity of nature or the nature of amenity	108
3. The scope and limits of valuation	111
4. The range of policy instruments	112
5. The governance of rural amenities	121
References	123
Comments by Mary Bohman, Economic Research Service, USDA	126
References	128
Chapter 6. Establishing Effective Incentives in Practice: the Role of Valuation and Influence of Other Factors	
<i>by Ralph Heimlich</i>	129
1. The nature of public goods	129
2. Some roles for valuation in policy articulation	130
3. US incentive programs for promoting rural amenities from agriculture	132
4. Evolution of incentive program design: CRP and Wetlands case studies	141
5. Incentive programs in practice: conclusions	152
References	154
Comments by Urs Gantner, Swiss Office of Agriculture	160
Chapter 7. Rural Amenities and their Valuation: Wider Questions for Policy-Makers	
<i>by David Baldock</i>	161
1. The context	161
2. Answering policy questions	162
3. The international arena	166
Chapter 8. Contributions to the Concluding Round Table	
1. Hans-Christian Beaumont, European Commission, DG Agriculture	169
2. Eva Blanco, Head of International Agriculture Policies Division, Ministry of Agriculture, Spain	170
3. Bruce Bowen, Director, International Branch, Agriculture, Forestry and Fisheries, Australia	170
4. Carmel Cahill, Head of the Policies, Trade and Adjustment Division of the Directorate for Food Agriculture and Fisheries of the OECD	171
5. Kenji Yoshinaga, Director, National Research Institute of Agricultural Economics, Japan	173

Chapter 9. Conclusions	175
1. Main results	175
2. Conclusions on future work	177

List of Principal Contributors

1. Experts	179
2. OECD Contacts	180

List of Tables

1. Classification of environmental valuation techniques	16
2. IVS bias for a series of 4 CVM studies of agricultural landscapes in the UK and Portugal	59
3. Empirical valuation of externalities in different agro-processes and regions	85
4. Contrasting features of Contingent Valuation (CVM) and Citizens' Juries as methods for eliciting value statements	94
5. Levels of confidence in estimates of the economic value of biodiversity	101
6. A classification of amenities	106
7. USDA conservation expenditures, by activity and program, fiscal years 1983-2000	134
8. Economic losses associated with wetland losses, 1954-1992	137

List of Figures

1. Diagram of change in the level of amenity	39
2. Externalities vs. externalities	84
3. Positive externalities where government intervention is unnecessary	88
4. Amenities associated with rural land use	107
5. Environmental impacts of alternative agricultural production intensities	109
6. Alternative linkages in the provision of rural amenities	113
7. Physical relationship between agricultural inputs, outputs and externalities	126

List of Boxes

1. Variety of types of CART	116
2. Dedicated Environmental Funds in the UK	119
