

Michael Bungert

Termination of Price Wars

A Signaling Approach

With a Foreword by Prof. Dr. Oliver P. Heil

Deutscher Universitäts-Verlag

Contents

Foreword	V
Preface	VII
Contents	IX
List of Figures	XIX
List of Tables	XXI
List of Abbreviations	XXIII
1. Introduction	1
1.1 Background of the Research Problem	1
1.2 Scientific Contribution, Focus and Particularities of the Analysis	3
1.3 Course of the Analysis	5
2. Basic Aspects of Price Wars	9
2.1 Definition Approaches of the Term ‘Price War’	9
2.1.1 Definition of ‘Price War’: Overview on Approaches in Economics	9
2.1.2 Definition of the Term ‘Price War’: Approaches in Marketing Literature	10
2.1.2.1 The Price War Definition Approach by Cassady	10
2.1.2.2 The Price War Definition Approach by Brühlwiler	11
2.1.2.3 The Price War Definition Approach by Heil and Helsen	11
2.1.3 Conclusions on Definition Approaches to the Term ‘Price War’	12
2.2 General Factors Leading to Price Wars	13
2.3 The Termination of Price Wars, and Rationales for their Termination	15
2.3.1 Reasons to Terminate a Price War from the Perspective of the Involved Firm	15
2.3.1.1 Firms’ Strategic Rationale for Price War Termination	15
2.3.1.2 Possible Negative Effects of Price Wars on the Firms	16
2.3.2 Possible Negative Effects of Price Wars on Consumers and the Public	17
2.3.3 Technical Approaches to Price War Termination, and Potentially Critical Factors for Firms’ Termination Willingness	18
2.4 Price War Dynamics: Empiric Findings and a Phase Scheme Suggestion	19
	IX

4.2.4 A Conception of Possible Mediation and Moderation Effects of Signals	88
4.2.4.1 A Conception of the Mediation Role of Signals on the Relation between Action and Reaction	88
4.2.4.2 A Possible Moderating Role of Impressions	89
4.2.5 Approaches to an Improvement of the Signaling Process	91
4.2.5.1 Considering the Attributes of Moves	91
4.2.5.2 Considering the Attributes of Signals	91
4.2.5.2.1 Signal Clarity and Noisiness	91
4.2.5.2.2 Signal Commitment and Credibility	92
4.2.5.2.3 Signal Consistency	93
4.2.5.2.4 Signal Aggressiveness	93
4.2.5.3 Considering the Similarity of the Signal Initiator and the Signal Generator	93
4.2.6 Benefits and Costs of Signaling	94
4.2.6.1 Some Empirical Results on the Benefits of Signaling	94
4.2.6.2 The Potential Costs and Risks of Signaling	94
4.2.6.2.1 The Costs and Risks of Initiating Signals	94
4.2.6.2.2 The Costs and Risks of Generating Signals (Interpretation)	95
4.2.7 Legal Aspects and Limitations of Signaling with Concern to Pricing	95
4.3 Approaches to Conflict Resolution from other Social Sciences	97
4.3.1 Pure Reciprocity and Tit-for-Tat	97
4.3.1.1 Investigations on Tit-for-Tat Performance	98
4.3.1.2 Properties of Tit-for-Tat, and Related Experimental Results	99
4.3.1.3 Critique with Axelrod's Findings, and Tit-for-Tat Modifications	101
4.3.2 De-Escalation and Trust through GRIT	104
4.3.2.1 Trust as a Precondition for Co-operation	104
4.3.2.2 The GRIT Proposal	105
4.3.2.2.1 Basic Idea and Historical Context of GRIT	105
4.3.2.2.2 The Single Points of the GRIT Proposal	106
4.3.2.2.3 Empirical Results on the Effectiveness of GRIT	108
4.3.2.2.3.1 Cases of GRIT from Diplomacy, and GRIT Simulation Results	108
4.3.2.2.3.2 Experimental Analysis of GRIT Effectiveness: An Overview	109
4.3.2.2.4 Potential Weaknesses of the GRIT Strategy	110
4.3.3 Tit-for-Tat and GRIT: Differences and Commons of the Concepts	112
4.3.4 The Use of Tit-for-Tat and GRIT in the Termination of Price Wars: Approaches and Problems	113
4.3.4.1 The Use of Tit-for-Tat for the Termination of Price Wars: Approaches and Problems	113
4.3.4.2 The Use of GRIT for the Termination of Price Wars: Approaches and Problems	115

5. A Signaling Approach to Price War Termination, and Hypotheses on Price War Termination Moves and Termination-Relevant Signals	117
5.1 Signaling as an Approach to Terminate Price Wars	117
5.1.1 Operationalization of Price War Termination, and Formulation of the Basic Research Idea	117
5.1.2 Particularities of the Price War Conflict Situation and its Termination	118
5.1.3 Signaling Aspects of Traditional Approaches to Conflict Resolution	119
5.1.3.1 Approaches from Sociology: GRIT and Tit-for-Tat Signaling	119
5.1.3.2 Signaling Approaches on the Basis of Expected Utility	120
5.1.3.2.1 The Use of ‘Switch-Blockers’ to Affect Expected Utility	120
5.1.3.2.2 Signaling Reciprocity to Affect Expected Utility	121
5.2 Hypotheses on Moves and Interpretations concerning their Potential to Induce Co-operation	122
5.2.1 Hypotheses on Moves to Avoid Brand Switching, and the Effect of a Technically Correct Understanding	123
5.2.1.1 The Use of Individual Refund Guarantees as a Means of Reducing Switching	123
5.2.1.2 The Use of Coupons as a Means of Reducing Brand Switching	124
5.2.1.3 The Use of Image Advertising as a Means of Reducing Brand Switching	125
5.2.1.4 The Technical Interpretations of Moves Aiming to Reduce Switching and its Effect on Competitor Price Reaction	127
5.2.1.5 A Comparison of Consumer Switch-Blockers	127
5.2.2 Hypotheses on Moves Meant to Affect Reciprocity Awareness	129
5.2.2.1 Price Matching Guarantees to Signal Reciprocation Credibly	129
5.2.2.2 Verbal Messages to Competitors as Reciprocation Signals	130
5.2.2.3 Interpretation of Signals of Reciprocation Intent, and the Effect on Competitor Price Reaction	131
5.2.2.4 Comparison of Moves to Signal Reciprocation	131
5.3 Hypotheses on the Impact of Other Types of Interpretations	132
5.3.1 Co-operative Signals and the Effect on Competitor Price Reaction	132
5.3.2 Mediation Effects of Perceived Weakness and Hostility	133
5.3.2.1 Perceived Weakness and the Effect on Competitor Price Reaction	133
5.3.2.2 Perceived Hostility and the Effect on Competitor Price Reaction	135
5.3.3 Moderation Effects of Perceived Weakness and Hostility	136
5.3.3.1 Weakness and Hostility as Moderators on the Relation between Interpretations and Competitor Reaction	136
5.3.3.2 Weakness and Hostility as Moderators on the Relation Between Moves and Interpretations	137

6. Methods of Data Collection and Analysis for the Price War Termination Experiment	139
6.1 Basics on Experimental Design and Interaction Analysis	139
6.1.1 Alternatives for Data Generation on Price Wars, and a Rationale for an Experimental Approach	139
6.1.2 Basics on Experimental Design	140
6.1.2.1 Definition of Experiments, and a Notion of Causality	140
6.1.2.2 Preconditions for Valid Causal Inferences in Experiments	141
6.1.2.3 Key Aspects of Experimental Research	141
6.1.2.3.1 Key Issues in Experimental Designs	141
6.1.2.3.2 Types of Experimental Designs	142
6.1.2.3.3 Statistical Designs and Experimental Layout	142
6.1.2.3.4 Orthogonality and Goodness of an Experimental Design	143
6.1.2.4 Basics and Measurement Issues on Moderation and Mediation	143
6.1.2.4.1 Basic Considerations on Interaction Effects	144
6.1.2.4.2 Moderation Effects	144
6.1.2.4.2.1 Basics on Moderation	144
6.1.2.4.2.2 Measurement of Moderation	145
6.1.2.4.2.3 Relevant Statistical Power Aspects of Moderation Analysis	145
6.1.2.4.3 Formal Aspects of Mediation	146
6.1.2.5 Differentiation Between Mediators and Moderators	147
6.2 Experimental Method and Data Collection	147
6.2.1 Particularities in the Design of the Price War Termination Experiment	147
6.2.1.1 The Experimental Price War Prisoner's Dilemma Game Structure	147
6.2.1.2 Rationale for a One-shot Sequential Play Mode for Signaling Analysis	148
6.2.2 Design of the Price War Termination Experiment, and Subject Instructions	150
6.2.2.1 Experimental Subjects and Basic Instructions	150
6.2.2.2 Experimental Briefing and the Conception of the Experiment	150
6.2.2.3 Experimental Design, Questionnaire Formulation, Treatments, and Coding Issues	151
6.2.3 Formulation of Variables Used in the Model	152
6.2.3.1 Subjects' Price Reaction as Dependent Variable	152
6.2.3.2 Moves and Interpretations as Independent Variables	152
6.2.4 Formulation of Treatments and Coding	152
6.2.4.1 Formulations of Treatments	152
6.2.4.2 The Coding of Interpretations and Competitor Reaction	153

6.3 Basics on Regression and Logistic Regression	155
Data Analysis Procedures	155
6.3.1 Scaling of Variables and the Use of Data Analyzing Techniques	155
6.3.2 An Introduction to Linear Regression	156
6.3.2.1 The Linear Regression Approach	156
6.3.2.2 Validation of the Regression Model	158
6.3.2.3 Premises of the Regression Model	159
6.3.3 Logistic Regression for the Analysis of Categorical Data	160
6.3.3.1 Categorical Scaling of Data	160
6.3.3.2 Prediction of Probabilities through Logistic Regression	160
6.3.3.3 The General (Multiple) Binary Logit Model	161
6.3.3.4 Discrete Choice as Random Variable, and Distribution Issues	163
6.3.3.5 Estimation of the Logistic Regression Coefficients	165
6.3.3.5.1 Maximum Likelihood-Estimation of Logistic Regression Coefficients	165
6.3.3.5.2 Properties of the ML Estimator and a Comparison of Alternative Parameter Estimation Procedures	167
6.3.3.5.3 Number of Observations or Sample Size as a Prerequisite for Validity	167
6.3.3.6 Meaning and Interpretation of the Logistic Regression Coefficient	168
6.3.3.6.1 Meanings of Beta Coefficients in Logistic Regression	168
6.3.3.6.2 Interpretation Approaches of the Logistic Regression Coefficient	170
6.3.3.6.2.1 Interpretation of β_j as Partial Derivative	170
6.3.3.6.2.2 Interpretation of β_j as Sensitivity Analysis	170
6.3.3.6.2.3 The Effect Coefficient	170
6.3.3.7 Tests of Logistic Regression Model Estimation	171
6.3.3.7.1 Tests for the Entire Logistic Regression Model	171
6.3.3.7.1.1 Deviance as a Measure for Model Quality	171
6.3.3.7.1.2 Likelihood Ratio Test (F-test)	172
6.3.3.7.1.3 R^2 Statistics in Logistic Regression	172
6.3.3.7.1.3.1 McFadden's R^2 (McF- R^2)	172
6.3.3.7.1.3.2 Cox & Snell R^2 and Nagelkerke R^2	173
6.3.3.7.1.3.3 Adjusted R^2 in Logistic Regression	173
6.3.3.7.1.4 Goodness-of-Fit Test in Logistic Regression	174
6.3.3.7.1.5 Conclusion on Tests for the Logistic Regression Model	174
6.3.3.7.2 Wald Test of Individual β Coefficients	174
6.3.3.7.3 Outlier Diagnostics in Logistic Regression	175
6.3.3.7.4 Independence of Irrelevant Alternatives - IIA Property	175
6.3.4 Proposal for a Logistic Mediation Model of Signaling	176
6.4 Logistic Regression Models of the Hypothesized Relations	178
6.4.1 Model of the Effects of Interpretations on Competitor Reaction	178
6.4.2 Model of the Effects of Moves on Competitor Interpretations	178

6. Methods of Data Collection and Analysis for the Price War Termination Experiment	139
6.1 Basics on Experimental Design and Interaction Analysis	139
6.1.1 Alternatives for Data Generation on Price Wars, and a Rationale for an Experimental Approach	139
6.1.2 Basics on Experimental Design	140
6.1.2.1 Definition of Experiments, and a Notion of Causality	140
6.1.2.2 Preconditions for Valid Causal Inferences in Experiments	141
6.1.2.3 Key Aspects of Experimental Research	141
6.1.2.3.1 Key Issues in Experimental Designs	141
6.1.2.3.2 Types of Experimental Designs	142
6.1.2.3.3 Statistical Designs and Experimental Layout	142
6.1.2.3.4 Orthogonality and Goodness of an Experimental Design	143
6.1.2.4 Basics and Measurement Issues on Moderation and Mediation	143
6.1.2.4.1 Basic Considerations on Interaction Effects	144
6.1.2.4.2 Moderation Effects	144
6.1.2.4.2.1 Basics on Moderation	144
6.1.2.4.2.2 Measurement of Moderation	145
6.1.2.4.2.3 Relevant Statistical Power Aspects of Moderation Analysis	145
6.1.2.4.3 Formal Aspects of Mediation	146
6.1.2.5 Differentiation Between Mediators and Moderators	147
6.2 Experimental Method and Data Collection	147
6.2.1 Particularities in the Design of the Price War Termination Experiment	147
6.2.1.1 The Experimental Price War Prisoner's Dilemma Game Structure	147
6.2.1.2 Rationale for a One-shot Sequential Play Mode for Signaling Analysis	148
6.2.2 Design of the Price War Termination Experiment, and Subject Instructions	150
6.2.2.1 Experimental Subjects and Basic Instructions	150
6.2.2.2 Experimental Briefing and the Conception of the Experiment	150
6.2.2.3 Experimental Design, Questionnaire Formulation, Treatments, and Coding Issues	151
6.2.3 Formulation of Variables Used in the Model	152
6.2.3.1 Subjects' Price Reaction as Dependent Variable	152
6.2.3.2 Moves and Interpretations as Independent Variables	152
6.2.4 Formulation of Treatments and Coding	152
6.2.4.1 Formulations of Treatments	152
6.2.4.2 The Coding of Interpretations and Competitor Reaction	153

6.3 Basics on Regression and Logistic Regression	155
Data Analysis Procedures	155
6.3.1 Scaling of Variables and the Use of Data Analyzing Techniques	155
6.3.2 An Introduction to Linear Regression	156
6.3.2.1 The Linear Regression Approach	156
6.3.2.2 Validation of the Regression Model	158
6.3.2.3 Premises of the Regression Model	159
6.3.3 Logistic Regression for the Analysis of Categorical Data	160
6.3.3.1 Categorical Scaling of Data	160
6.3.3.2 Prediction of Probabilities through Logistic Regression	160
6.3.3.3 The General (Multiple) Binary Logit Model	161
6.3.3.4 Discrete Choice as Random Variable, and Distribution Issues	163
6.3.3.5 Estimation of the Logistic Regression Coefficients	165
6.3.3.5.1 Maximum Likelihood-Estimation of Logistic Regression Coefficients	165
6.3.3.5.2 Properties of the ML Estimator and a Comparison of Alternative Parameter Estimation Procedures	167
6.3.3.5.3 Number of Observations or Sample Size as a Prerequisite for Validity	167
6.3.3.6 Meaning and Interpretation of the Logistic Regression Coefficient	168
6.3.3.6.1 Meanings of Beta Coefficients in Logistic Regression	168
6.3.3.6.2 Interpretation Approaches of the Logistic Regression Coefficient	170
6.3.3.6.2.1 Interpretation of β_j as Partial Derivative	170
6.3.3.6.2.2 Interpretation of β_j as Sensitivity Analysis	170
6.3.3.6.2.3 The Effect Coefficient	170
6.3.3.7 Tests of Logistic Regression Model Estimation	171
6.3.3.7.1 Tests for the Entire Logistic Regression Model	171
6.3.3.7.1.1 Deviance as a Measure for Model Quality	171
6.3.3.7.1.2 Likelihood Ratio Test (F-test)	172
6.3.3.7.1.3 R^2 Statistics in Logistic Regression	172
6.3.3.7.1.3.1 McFadden's R^2 (McF- R^2)	172
6.3.3.7.1.3.2 Cox & Snell R^2 and Nagelkerke R^2	173
6.3.3.7.1.3.3 Adjusted R^2 in Logistic Regression	173
6.3.3.7.1.4 Goodness-of-Fit Test in Logistic Regression	174
6.3.3.7.1.5 Conclusion on Tests for the Logistic Regression Model	174
6.3.3.7.2 Wald Test of Individual β Coefficients	174
6.3.3.7.3 Outlier Diagnostics in Logistic Regression	175
6.3.3.7.4 Independence of Irrelevant Alternatives - IIA Property	175
6.3.4 Proposal for a Logistic Mediation Model of Signaling	176
6.4 Logistic Regression Models of the Hypothesized Relations	178
6.4.1 Model of the Effects of Interpretations on Competitor Reaction	178
6.4.2 Model of the Effects of Moves on Competitor Interpretations	178

6.4.3 Model of the Effects of Moves on Competitor Reaction	179
6.4.4 Models of Moderation Effects	179
6.4.5 Models of the Effects of a Matching of Moves	180
6.5 Framework of Hypothesized Relations	180
7. Results of the Signaling Experiment on Price War Termination	181
7.1 Some Descriptive Statistics on Subject Responses	181
7.2 Experimental Results of the Mediation Role of Signals on the Effects of Moves on Competitor Reaction	181
7.2.1 Effects of Interpretations on Competitor Price Reaction – Mediation Step Two	182
7.2.2 Effects of Treatments on Interpretations – Mediation Step One	184
7.2.2.1 Effects of Treatments on Technically Correct Interpretations of Moves, and Mediation Aspects of Technically Correct Interpretation	184
7.2.2.2 Effects of Treatments on Reciprocity Awareness, and Mediation Aspects of Reciprocity Awareness	185
7.2.2.3 Effects of Treatments on the Generation of Price War Termination Signals, and Mediation Aspects of Price War Termination Signals	187
7.2.2.4 Effects of Treatments on the Generation of Signals of Weakness, and Mediation Aspects of Signals of Weakness	189
7.2.2.5 Effects of Treatments on the Generation of Signals of Hostility, and Mediation Aspects of Signals of Hostility	190
7.2.3 Effects of Treatments on Competitor Price Reaction, and Complete Mediation Issues	190
7.3 Experimental Results on the Moderation Effects of Impressions	191
7.3.1 Moderation Effects of Weakness and Hostility on the Relation between Interpretations and Competitor Reaction	191
7.3.2 Moderation Effects of Weakness and Hostility on the Relation Between Moves and Interpretations	191
7.4 The Matching of Marketing Moves as Enhancer of the Chance for a Co-operative Price Increase	192
7.4.1 Subjects' Matching of Coupons	192
7.4.2 Subjects' Matching of Advertising	193
7.5 The Reactions of Non-cooperative Subjects: A Closer Look	196
7.6 Discussion of the Concept and the Results of the Signaling Experiment on Price War Termination	197

8. Research and Managerial Implications	203
8.1 Research Implications	203
8.2 Managerial Implications	204
List of Appendices	207
Bibliography	219
